THE JAMBAR

Thursday, October 3, 1968

YOUNGSTOWN STATE UNIVERSITY

VOLUME 46-NO. 1

Campus Welcomes Freshmen

Freshmen relaxing during a break from the rigors of orientation.

Activities All Weekend

The Freshmen social activities begin tomorrow night with a dance in the Kilcawley Student Center sponsored by the Major Events Committee of Student Council. The highlight of the dance will be a display by some 41 campus organizations of their various activities from 8:30 to 10 that evening. The dance will begin at 9 with the live music being provided by "The Wispers."

The Pershing Rifle Drill Team will perform at the dance at 10:45. Co-Chairmen for the dance are Roseann Tucci and Patty Minchin.

During the dance, Freshmen will have the opportunity to sign up for a bus trip Saturday to Berea, Ohio to see YSU play football against arch-rival Baldwin Wallace. Tickets for the game are \$1, and the cost for the bus ride is \$5.00.

The buses have room for just 50 people, so accommodations will be made for the first 90 to sign up. The buses will load at 10:30 A.M. Saturday on Bryson St. across from Kilcawley Student Center and leave promptly at 11 A.M.

Sunday's activities will be highlighted by a Freshman Women's Tea at the Pollock House from 2 to 4 that afternoon. The tea is also sponsored by the Major

Events Committee with the University Committee on Women also participating.

During the Tea the Miss Co-Ed Shop will hold a style show with student models. The girls are: Tammy Tabak, 1967-68 Homecoming Queen; Lesley Emery, the 1968 Spring Weekend Queen; Sandy Madison; Lynn Murphy; and Patsy Nepolitano. Roseann Tucci of the Major Events Committee will act as moderator. Mrs. Edith Painter, Dean of Women, is the chairman of the Committee of Women.

Later that evening the Newman Student Organization will hold an open house in their headquarters at 26 W. Rayen Ave. The open house will begin at 8 P.M. Fr. Anthony Esposito is the Newman advisor.

All freshmen are invited to attend all of the activities planned for them during this Freshman Week.

IBM Delivers—

JAMBAR Goes Cold

The JAMBAR is starting out the new school year with a new look, a new office and, perhaps most important, the newest and most sophisticated typesetting equipment available. This equipment is the Magnetic Tape Selectric Composer System which is manufactured by International Business Machines.

The JAMBAR is one of only twenty-five Universities across the nation to be using the IBM System, and is the first of the Ohio State schools to have the IBM machines, but it is certain we will not be the last. The Selectric Computer system is quickly being recognized as the most advanced method in existence for printing work.

The system is made up of two basic units. The Selectric Recorder Input machine and the Selectric Composer Output unit.

The machines, which are not much more complicated to use than a standard typewriter, not only eliminate the high cost of

having copy set in lead by professional linotype operators, but also give the JAMBAR staff an infinitely greater amount of freedom in layout design. Also, with the new machines, a much later deadline is possible.

In years past all material had to be taken in several trips to Repro-Type Incorporated on Glenwood Ave. The copy would then be set in lead, and each page made up by fitting the given stories together, wedging them tight with thin strips of lead.

Two copies would then be printed from these pages and then the lead would be discarded. A photograph would be taken of the printed pages, and

Cont'd on page 8

CHANGES FOR FALL AT YSU

So many new things have occurred at Youngstown State University during the past Summer that it is impossible to deal with them all in this, our first issue of the 1968-69 year.

On July 26, the North Central Association of Colleges and Secondary Schools gave full accreditation to YSU's new graduate program in English, History, Music, Education, Engineering, etc. Already several hundred graduate students have been registered for the new program.

The NEON (editor Dave Costello) is now housed in the Student Publications Building. This was formerly Mr. Minotti's Student Placement Office, now moved to the second floor of East Hall.

The JAMBAR is located in this little old red building; in fact, it occupies most of it. There have been so many changes on the JAMBAR that we'll only mention a few: the most sophisticated of "cold type" equipment, and, of course, twice-weekly publication.

Miss Margaret Opsitnik, educational director, William Knecht, IBM sales representative, and Michele DUBYAK, of the JAMBAR staff, watch Lauri Berry master the JAMBAR's new cold type machine.

Saxbe To Speak Tuesday On Law Order & Justice

William B. Saxbe, Ohio Attorney General and Republican Senatorial Nominee, will be on the YSU campus Tuesday, October 8.

Alpha Delta Omicron, Honorary Police Science Society, will host a 10 a.m. coffee hour reception in the Pollock House open

to members of the society and invited guests only.

Mr. Saxbe, who encourages students to participate in "constructive discussion of government and change in American political processes," will speak on "Law, Order, and Justice."

At 11 a.m., Mr. Saxbe will address all interested students and faculty in the Dana Recital Hall.

Saxbe's opponent for the senatorial seat from Ohio being vacated by veteran Senator Frank Lausche is Democratic City Councilman from Cincinnati John Gilligan.

Pugsley To Frosh:

You're Lucky To Be Here

Some 4,000 Freshmen attended the President Albert L. Pugsley's last night in Stambaugh Auditorium. The number of Freshmen was so great that it was necessary for President Pugsley to make the address twice, to half of the incoming class at the time.

In his welcoming Speech President Pugsley reminded the students that to succeed in college, as in almost anything in life, the individual must have motivation. He also warned against over-confidence or over-exhuberance which can lead to academic problems in the way over-loading.

A major portion of President Pugsley's address was concerned with the student unrest which has been disrupting classes on campuses across the nation.

Citing a policy statement by the University Board of Trustees last year President Pugsley stated that the University will not allow the operation of the institution be disrupted by any dissident group. He recommended that any grievances be lodged through legal means, that is primarily through the student government.

Finally, President Pugsley urged the students to attend University sports events in an attempt to promote the school spirit which is almost naturally lacking in a computer school.

President Pugsley's last words to the new Freshmen were that we are neither a research nor a public service institution, but,

"we are a teaching institution, and in this day and age I think you are lucky to be in such a school."

The Freshmen, 4,000 strong, listen attentively as they are addressed by President Albert Pugsley.

Coffelt: How & Why—

Story Behind The New VP

A six-year working relationship between two men, in connection with the Oklahoma State Regents for Higher Education, has culminated in the appointment of Dr. John J. Coffelt as the No. 3 man of Y.S.U., Vice President of Administrative Affairs, as of July 1, 1968.

President Albert L. Pugsley was the consultant to the Oklahoma State Regents for Higher Education, while Dr. Coffelt was its Vice Chancellor for Research and Planning.

This organization submits reports to the North Central Association, showing results of study and research concerning higher education in the state.

The Chancellor of the Oklahoma State Regents asked the Secretary of the North Central Association, Dr. Norman Burns, to suggest the names of a few of the most capable men available, of whom one might act as an out-of-state consultant, for the purpose of providing an objective and technical guide, and advice in methods and procedure.

One was Dr. Pugsley, then Vice President of Kansas State University. The Chancellor called Dr. Pugsley, who made a half-dozen trips to Oklahoma in connection with a state-wide survey of long-range building needs of Oklahoms, involving 18 institutions (colleges and universities). This study took 14 or 15 months to complete.

A year ago Dr. Coffelt decided to leave the state level of higher administration and return to institutions of higher learning. He notified certain persons of his intentions. Dr. Pugsley was one of these.

When Dr. Pugsley, knowing Dr. Coffelt's qualifications and background, learned of his availability, he recommended him for this post.

Sees Great Challenge

"I came here," avers Dr. Coffelt, "because I was cognizant of the challenge and opportunities inherent in the development of this fast-growing state institution in an urban area, and because I was impressed with the qualities of leadership possessed by Dr. Pugsley."

Concerned With Campus Change
Important coming events, such as radio and television stations on campus, and huge expansion of the campus itself, will now be Dr. Coffelt's particular concern.

Among the individual offices responsible to him as he carries out his duties here are: Ad-

ministrations Office, Registrar's Office, Student Records, Dean of Men, Dean of Women, University Counseling Center, Student Health, Placement Office, and the Director of Institutional Research.

Will Serve As Liason

In addition, he will serve as a liason, working with Dr. Pugsley, between the Board of Trustees and the Ohio Board of Regents.

The Vice President of Administrative Affairs will also coordinate the special research projects, such as planning the development of an educational television station on campus; and

making application to the Federal Communications Commission for an educational FM radio station.

He will coordinate, too, the preparation of a long-range master plan for campus development. The Board has engaged the services of an architectural planning firm from Houston, Texas—Caudill, Rowlett and Scott, to prepare a plan showing how the campus will be developed.

Matters of individual discipline will be handled the same as last year. Group discipline will also be taken care of as before. In the absence of Dr. Pugsley, however, Dr. William H. Coffield, Vice President of Academic Affairs, will be acting President.

In the event of the absence of both, Dr. Coffelt will be in charge.

Dr. John J. Coffelt

ISO NEWS

by Costaikis Papacostas

The number of foreign students has been increased by sixty, as forty-nine new undergraduate and eleven graduate level students entered this fall.

Of the 49 undergraduates, 10 are from India, 12 from Thailand, 4 from Italy, 5 from the Arabian countries, 3 from Germany, 3 from Canada, 2 from Iran, 2 from Hong Kong and one from each of the following countries: Cyprus, Yugoslavia, Hungary, Turkey, Spain, Cuba and Korea.

Scholastically the undergraduates were distributed as follows: 18 students were enrolled in the School of Engineering, 13 in the School of Liberal Arts, 14 students in the School of Business Administration, two students in the School of Education, one in the School of Music and one in the Secretarial school.

A special registration procedure was employed, since incoming foreign students do require additional attention. Over the three-day registration period starting on Wednesday, September 18, the new students were given a short orientation with respect to the University, as well as assistance in selecting appropriate courses, by Mrs. Edna K. McDonald, Instructor in Sociology and International Student Advisor.

On Wednesday, the students were tested on their knowledge of the English language, as they took an English proficiency exam administered by Mr. Thompson of

the English Department.

The purpose of the test was to determine whether the student had a sufficient knowledge of English so as to be enrolled in the regular Communication classes, or whether he had to take a special six credit English course.

Coming from different countries with different cultures, these students are faced with several problems. That most commonly encountered is having to communicate in a language other than their own. The University has assisted in this area by initiating several programs designed to overcome this difficulty.

Housing presents another common problem. The hospitality of newly made friends has made this problem easier, as a number of the new students were invited to stay in their fellow countrymen's houses until they found residence for themselves.

To the foreign students we extend a warm welcome and the wish that their stay here will be beneficial and enjoyable.

Let's Get It Straight

SCIENCE CAN---

Science can produce bigger and more destructive bombs, but it cannot control those who get hold of them.

Science can discover and apply new remedies for physical and mental illness, but it cannot make men stop hurting each other.

Science can open up limitless doors of exploration and speculation, projecting the universe out to infinity, but it cannot comfort the heart of a bereaved mother with any hope of reunion with her child.

Science can sometimes take away a young student's faith in God and the Bible, but it cannot control the reckless course of his life thereafter.

Christians need science and scientific advancements in order to function in a modern world, and they do not belittle its magnificent achievements. But conversely science needs the regulatory influence of Christianity if it is to function for the good of all.

No scientific fact is opposed to God and the Bible, though scientific speculation may be. If God made the world and inspired the Holy Scriptures, He certainly knows more about true science than any mere mortal. How, then, could true science conflict with God? If a conflict occurs, it is because

science has not yet caught up with God, or because the scientist has a bias against God and leaves Him completely out of his calculations.

God knew from the beginning that man, grown wise in his own conceits, would depart from the truth. "For after that in the wisdom of God the world by wisdom knew not God, it pleased God by the foolishness of preaching to save them that believe," says the Bible. In other words, the Gospel of salvation through the atoning death of Christ on the cross is self-authenticating to those who are open-minded enough to listen. Read the Gospels for yourself. They are the wisdom of God who made you and all that exists—including the scientists.

For free booklet, "SCIENCE SPEAKS," write to Box 327, RIDGEFIELD, N. J. 07657, DEPT.

MUSIC on CAMPUS

by Nicholas DeToro
PIANIST TO OPEN SERIES
 Robert Elliott Hopkins, D.M.A., chairman of the keyboard faculties at the Dana School of Music, will present the first concert of the Dana Artists' Series Monday, October 7, at 8:00 P.M. in the Dana Recital Hall.

Dr. Hopkins will play:
 Six Little Piana Pieces, Op. 19—Schoenberg.
 Sonata in F Minor, Op. 57, (The Appassionata)—Beethoven.
 Bacarolle—Chopin.
 Sonata for Piano—Ginastera.

Dr. Hopkins, who has given numerous recitals in this area on piano, organ, and harpsichord, including a performance with the Youngstown Symphony last fall, earned a Doctorate in Musical Arts and a Performer's Certificate in Piano from the Eastman School of Music, where he studied with Cecile Staub Genhart. He later studies abroad at the Pablo Casal Summer Academy of Music at Zermatt,

and the Akademie fur Musik und Darstellende Kunst, Vienne, studying with Wlasylaw Kedra. Dr. Hopkins is also a Fellow of the American Guild of Organists.

The concert is free to students. All are invited to attend. The full schedule of the Dana Artists' Series for the 1968-69 year will be published in a subsequent issue.

The president, social chairman, and advisor of all campus organizations are required to attend an organizational meeting tomorrow afternoon at 4 o'clock in the Strouss Auditorium.

The purpose of this meeting is to distribute the social calendars to all organizations and to review the calendar procedures to be used for scheduling functions throughout the year.

The president and social chairman must attend.

Admission to Games by I.D.

A new admission procedure for Youngstown State's athletic events has been put into effect.

Full time students need only present their YSU identification card with a current validation sticker on it at the admission gate.

No admission price is charged the full time students however, part time students must pay the general admission price.

All home football games are played at Rayen Stadium, located at Benita and Ohio Avenues in Youngstown.

YSU plays at Baldwin-Walace on October 5. The first home game is with Pensacola Navy on October 12. Our other home games are South Dakota State, October 26; Eastern Kentucky, November 15; and Akron November 22.

A schedule of all YSU fall and winter sports events or further ticket information can be obtained at the Athletic Office in Kilcawley, room 104.

State Theatre and Northside Drive-in

Sports Scene

With a solid week of rest behind them, the Youngstown State University Penguins set their sights in Berea, Ohio, and the High-flying Baldwin-Walace Yellow Jackets. B-W sports a two-game winning streak while YSU has a one and one record.

The open date on the schedule last Saturday has provided the Penguins with a much-needed breather, and now finds them in A-1 shape for the game tomorrow with B-W. The starting line-up will feature Klembara at quarterback, with Ken Kacenga and Calvin Mason at the halfback slots. Filling out the offensive backfield will be Craig Cotton at fullback. Ends will be DelSignore and Jim Burns, tackles Mike Roman and Greg Gary, guards Larry Kitt and Gary Smith, with Lou Lowery set at center.

Youngstown will be out to avenge last year's 36-33 setback at Berea at the hands of B-W, a game that saw the Penguins set their all-time total offense mark at 488 yards.

B-W set their own record this weekend with a 48-8 count Saturday over the University of Wisconsin, Milwaukee. The Yellow Jackets totaled a whopping 676 yards gained, their best effort in two years.

YSU will open their home campaign Saturday, October 12, when Roger Staubach of Heisman Trophy and All-American fame appears with the Pensacola Navy team for the Second Annual Shrine Game. In two games this year Staubach has shown his old Naval Academy form, averaging over 250 yards per game passing.

FAILURE

You'll never get anywhere without it.

Nothing helps a young engineer's career like being given a challenge. Which is another way of saying a chance to fail now and then. To make his own mistakes.

At Western Electric we give our newly recruited engineers responsibility almost immediately. They make their own decisions. Learn from their own errors.

Don't get us wrong. We keep our

demands reasonable enough so that our recruits can make their decisions at their own pace. But our thinking is, a man feels awfully good about even a small decision when it's his.

If you're the type who'd like the chance to make your own moves, see our recruiter or write College Relations, 222 Broadway, New York, N. Y. 10038.

A lot of hard work never hurt anyone.

Students Get Special Discount at Playhouse

Student Government, acting on a motion passed in April, has completed plans which will permit university students to participate in the cultural activities of the Youngstown Playhouse, Symphony, and Monday Musical.

The plan is for Student Council to subsidize students wishing to attend the above mentioned activities by paying half the admission cost.

Students wishing to attend a performance should follow the procedure indicated below for purchasing tickets.

Present your currently validated student ID card to the Athletic Business Office located in room 104 of Kilcawley. Full or part time students may purchase one ticket for each nights performance.

You will be given a reservation request form which you are to exchange at the house office, "will call window," for your actual reserve seat tickets.

Tickets must be claimed 10 minutes prior to curtain time. Unclaimed tickets will be put on sale to the general public.

Couples will be seated together and groups will be accommodated whenever possible.

Reservations for the shows can now be placed at the Athletic Business Office and in the

case of Symphony and Monday Musical it is suggested that the order be placed well in advance of the actual performance.

"A Delicate Balance" will be presented at the Youngstown Playhouse October 9-13 and 16-20.

A complete list of plays, symphonies and musicals can be obtained at the Athletic Business Office.

Dr. Nyardi Addresses A.A.U.W. Sat.

Dr. Nicholas Nyardi, Director of the School of International Studies at Bradley University, Peoria, Illinois will speak at the fall luncheon of The American Association of University Women on Saturday, October 5, at 12:30.

His lecture, "Shall We Survive?" will provide an opportunity for members of AAUW to gain a knowledge about the activities of the Soviet Union.

Dr. Nyardi was born and educated in Hungary where he held several government positions, but was forced to flee to America by Soviet pressure because of his anti-communist activities. He is now an American citizen.

Mr. Nyardi is the author of the book *My Ringside Seat in Russia*.

THE TOPS ARE COMING.

WATCH FOR THEM.

OCTOBER 27, 1968

Neon News

Any NEW FRATERNITY or SORORITY should forward the following information to the NEON: 1) number of members, 2) name of advisors and officers, 3) name of sweetheart (if one is to be chosen), 4) time and place of meetings, 5) main social function, and 6) picture of coat-of-arms or seal.

The NEON asks that you please select one of your members as a NEON representative, who will serve as a contact with them for any future information they may need.

The above information and the name of the representative must be sent to the NEON office no later than October 18. Failure to do this will result in your group's picture being omitted from this year's NEON!

Sign-up for Fraternity and Sorority pictures will begin on October 21 and continue through November 1. The appointment schedule will be posted on the Kilcawley Student Council bulletin board, next to the Circle K office door.

It is mandatory that you select an appointment. If you fail to do so, your picture will be omitted from this year's NEON.

An astounding entertainment experience, a dazzling trip to the moon, the planets and the still more distant stars.

Dream Now Reality—

800 In Tech School

The long-awaited Technical and Community College dream is now a reality, as over 800 students are presently enrolled for the School's "kick-off" quarter at this University.

According to Dr. Nicholas Paraska, dean of the new Technical College, a great deal of interest has been shown in the widely diversified two-year study programs which will lead to Associate degrees in General Studies, Applied Sciences and Associate in Arts.

The division of Engineering Technology includes Civil Engineering Technology, Computer Technology, Electrical Engineering Technology, and Metallurgical Engineering Technology, which upon completion of the requirements, leads to the Associate in Applied Science degree.

The Associate in Applied Science is also awarded for completion of the nursing program.

Business Degree

To earn an Associate in Applied Business a student must successfully complete the requirements for Secretarial Studies, Accounting Technology, General Business Technology, or Merchandising Technology.

In the division of General Studies it is possible to earn an Associate in Arts degree in the Associate in Arts study program, Police Science Technology and Food Service Technology.

Several of the two year programs were available before this fall but the two year graduate received merely a title and not a degree.

Fields Expanding

Dean Paraska stated that formerly established major areas are drawing the most interest but the new study fields such as nursing and police science are rapidly gaining in numbers registered.

The Technical College is an integral part of the University and students must fulfill basic university requirements within the 90 quarter hours required for graduation from the Technical College.

An advisory board is being planned to establish communications between the school and local

businesses and to help students as to study areas that would best suit their career plans.

Includes Locals

The board's members will include local businessmen and representatives from civic and professional organizations as well as members from the Technical College faculty.

Dean Paraska explained that although many of the students hold part or full time jobs while attending the University the school does not offer college credits for outside experience except for the nursing course which includes practical experience at one of the local hospitals.

Except for informal contacts, such as requests from businesses for names of available students or graduates, the Technical College will use the regular University placement service in helping its students find employment.

All Pros

Instructors in the Technical College are all professionals with experience in the subject they teach, and it is hoped that as instructors are added to the faculty they will all have professional experience in their areas.

Since the Technical College is intergrated in the University it uses the same grading system and academic standards as the University.

Take Basic Courses

Students attend classes such as communications and social sciences with the regular four year people, as these are basic University requirements.

Credits earned in the Technical

College are transferrable to other schools in the University as far as they apply to the newly chosen field.

A Technical College was begun in order to provide ALL high school graduates with a chance for higher education and to qualify individuals as trained technicians.

The school would also provide local business and industry with a source of trained technicians.

Dr. Nicholas Paraska

SENIORS

All seniors planning to graduate December 1968 or March 1969 and interested in taking job interviews during the months of October and November 1968 should contact the Placement Office located on the second floor of East Hall immediately.

Engineering and Science at IBM

"The interdisciplinary environment keeps you technologically hot."

"Working in data processing today pretty much means you work in a broad spectrum of technologies," says Nick Donofrio.

An Associate Engineer at IBM, Nick is a 1967 graduate in Electrical Engineering. He's using his technical background to design circuits for computer memory systems.

"Circuit design used to be a narrow job," he says. "Today it can take you into the front yard of half a dozen different fields. In my job, for example, I work with systems design engineers, chemists, physicists, metallurgists, and programmers."

Nick describes a hypothetical case history: "A systems man comes to me with tentative memory design requirements. Before I can design memory circuits to satisfy these needs, I must first identify an appropriate device technology. The physicists who make our monolithic circuits provide me with device data and specifications.

"As the design progresses, I use the services of a circuit-testing group and keep constantly in touch with systems and device people to spot potential problems."

Keeping up

The interdisciplinary environment at IBM helps you keep up to date technologically. As Nick puts it, "You're constantly exposed to what's happening in other fields."

IBM needs technical graduates to work in research, design and development, manufacturing, product test, field engineering, and space and defense projects. We also need technical people in programming and marketing.

WELCOME FROSH

By the time you Freshmen read this, you will have already heard all the trite expressions and instructional phrases that go with the typical welcoming speeches. I do not care to burden your already spinning intellect with more of the same garbage. My welcome to you will consist of one simple line of advice—YOU CAN BEAT THE SYSTEM, IF YOU UNDERSTAND HOW IT WORKS.

The first step in understanding the workings of an urban university is to throw away all your stereotyped ideas of "television colleges" and ivy-covered halls and realize that this is a COMMUTER university. This means that a great majority of your fellow classmates, and very possibly yourselves, live at home and either (1) work part time and go to school full time, or (2) work full time and go to school full time.

Because of this great traffic turnover every day, you will find no extremely high occurrence of that peculiar feeling of group homogeneity known as "School Spirit". Please do not misunderstand. There are numerous worthwhile social and service organizations present on this campus. I merely wish you to realize the limitations of such homogenizing factors at a commuter institution, and therefore not waste your precious, draft-free time by becoming totally absorbed in any all-out effort to unify this campus.

Unity on a commuter campus cannot be attained by buying penguins, burning logs at pep rallies, wearing blue Barracudas and pull-over sweaters or any other such rot. Which brings me to the second step, which is the answer to the first step, and therefore more important.

The answer fellow students, is COMMUNICATION. What is communication? It is becoming interested and involved in areas that will expose you to the widest possible range of thought and opinion on this campus. It is the ability to express your viewpoint and listen tolerantly to someone else's. It is an acquired gift that re-shapes your entire outlook on things by simply expanding your conscious world (drugs aren't needed).

Communication is attending speakers' lectures and poetry readings, it is box-lunch seminars, and yearbooks, and student literary magazines, and student-run radio stations, and student newspapers and anything that will for a little while get you away from that circle you've been traveling in for so long.

It is the answer to student vs. student, student vs. faculty, faculty vs. faculty and everybody vs. the administration conflicts. If you are beginning to think that this is a pitch to join one of the communications media here on campus, you are partially correct. But look at it this way. We may just have an answer. We think we do. In fact, we're positive. There's only one way for you to find out.

In any event, my sincere best wishes in all your endeavors at this University.

Joe's Summer Job

Editor's note: To those freshman who never have seen a copy of the JAMBAR, Joe College is our mythical character who goes through all sorts of misadventures each week. You might very well strike an amazing parallel between Joe and some students at YSU; but that is Pure coincidence, as Joe is fictional.

Joe had quite an interesting summer. Most college students spend their summers at the beach, working, or at home working, but Joe spent his summer working on the American political scene with the candidates of his choice.

All summer Joe was traveling from coast to coast with various members of the McCarthy Campaign Committee. Everywhere they went they seemed to get a fantastic response from all the people they met.

Most people seemed to agree with Senator McCarthy that we should pull our troops out of Vietnam. The people just loved the Senator from the same state as that guy who does the commercials for the mentally retarded on the television.

The time finally came for the Federalist National Convention, and Joe just couldn't wait. He was a member of the official delegation from his home state to California pledged to Senator McCarthy.

The first day of the convention finally arrived, so Joe made his way to the Convention Hall. He got to the door, and one of the uniformed guards asked to see his identification card.

"I know I have my card here someplace, sir. Oh yes, here it is," Joe said as he presented his official card to the guard.

"Sorry dere, fella, ya can't go in da hall." "Please, sir, I know my credentials are in order. Just why can't I enter?"

"Mayor Day said nobody can't go in dere wit long hair. You got long hair like dem hippies, so ya can just watch dis on T.V."

As Joe was about to cause a scene, the chairman of the Californial State Delegation,

Jesse Under, came to his rescue and got him admitted from his home state of Californial pledged to Senator McCarthy. Maddy wouldn't sit next to Julian Bind, but he figured it must have been some sort of political move he wasn't familiar with.

After the first session, Joe walked back to his hotel. On the way he saw a lot of his friends sitting in a park singing some very pretty songs. He knew a lot of these kids from school, so he joined them for a while.

They were just ditting there singing when a group of uniformed men representing Mayor Day came over to them. These uniformed men apparently were afraid of a Soviet invasion of their city, because they were all carrying big guns, grenades, and tear gas.

By this time, Joe's group was just sitting there singing, smiling, and smelling flowers.

Joe wasn't completely sure how everything happened after that. Things were a little hazy for him, but the next thing he knew he was in jail with a broken arm.

He wasn't sure whether one of King, I mean, Mayor Day's men hit him with a rifle or just twisted his arm too hard, but his

arm did hurt a lot. He was afraid he would miss the next day's proceedings at the convention, again Jesse Under came to the rescue and bailed him out of jail.

On the way out of the jail, Joe said hello to Dr. Moccasin.

The next day at the convention the party nominated the T.V. star to run as the candidate for President. Joe again couldn't understand how they could nominate the big bird's pidgeon, but then Joe was not a seasoned politician.

One big decision had been made, now all the delegates were waiting for the pidgeon's choice to be his pidgeon. Everyone remembered who the Whig's candidate chose to be his pidgeon—someone no one knew. They all were sure that the T.V. star would pick a real big name.

When the decision came that the little guy was to be Sen. Monkey, no one laughed. They all cried. They asked whether this Monkey guy was from our country. No one ever heard of him.

Joe decided Mayor Day must know Se. Monkey, Mayor Day knows everybody. Joe went over to the mayor's area to talk to him.

Joe wasn't exactly sure what had happened, but the next thing he knew he was in jail with his other arm broken. Joe was not very happy over the whole situation.

They were just sitting there singing when a group of uniformed men hotel. Joe said good-bye to Mr. Moccasin.

Joe didn't go back to the Convention. Joe didn't go back to his hotel.

He decided his life at Young City College or anyplace in the world out of the reach of Mayor Day must be heaven. Surely, Dr. Moccasin must agree with Joe.

JAMBAR Goes Cold

Continued from page one.

from the negatives, zinc printing plates would be made for the offset printing press.

Now, all the processes except the making of the plates and the actual printing of the newspaper can be done right at the JAMBAR offices. The IBM machines produce "camera ready" copy. This is pasted up on sheets of tabloid size paper, and one trip is made to the printers only hours before the 7,000 copies of the paper arrive on campus.

The IBM Machines, a Verity-type Headline setter and various smaller items which are needed for the new system cost over twenty thousand dollars. This however, will be saved in about two years in decreased printer costs, with the added increased flexibility.

Also necessary this year, both because of the new equipment and the twice weekly printing schedule, was a much larger staff. Four girls, two of them in cooperation with a secretarial

training program offered at Boardman High School, have been hired to operate the machines and act as general secretaries for the paper's Business Staff.

The girls are Sandra Moller and Michele DUBYAK, university students, and Lori Berry and Cindi DiCicco of Boardman High School.

These girls, along with JAMBAR Advisor Dr. Robert R. Hare, and most of the editorial staff, have been trained in the use of the machines by IBM. Our teacher was Miss Margaret Opsitnik, one of IBM's very capable Educational Service Representatives.

The salesman who handled our account, and has been practically on-call twenty-four hours a day for those little things that are bound to come up the first few weeks of installation, is Bill Knecht. Both of these people, plus several others from International Business Machines who have been involved with the

JAMBAR during the installation and first use of the machines, have rendered invaluable assistance.

So it is almost "All New JAMBAR" which will circulate on this campus this year, but that does not mean that we can overlook our perennial plea. No matter how changed the paper is, reliable new staff members, with or without newspaper experience—Freshman or Upper-classman, are always welcome. Any student interested in working for the paper is invited to apply at the JAMBAR office, Publications Building, 39 Spring St.

With the obvious advantages of new equipment, new staff and the much needed new office space, this should turn out to be a very interesting year for the JAMBAR, and for everyone involved with it.
