

## Dr. C. Worley, Biology Head, Completing Text

Dr. Clair L. Worley, biology department head, has neared completion a new general biology book, organized as a text and lab manual combined.

The Wm. C. Brown Co., Dubuque, Iowa, printers of scientific literature, has the second part of the book on press, to be completed by Christmas. The first section is now in use by the biology department here.

Dr. Worley has named his book "Basic Principles of General Biology"

gy" because it lays a very definite and basic foundation of many branches of biological science. He feels the work, a combinations of functions and observations of the last 10 years, will supply the answers to many questions asked by seniors.

This is the first of Dr. Worley's writings to be published.
