Mailed November 5, 1987

YOUNGSTOWN, Ohio - "A coming together" is one of the descriptive phrases Robert Ciotola uses when discussing the benefits of attending college credited classes at Hubbard High School.

Ciotola, coordinator of the Mathematics Lab at Youngstown State University, says the phrase refers to the classroom dynamics that take place when a recent high school graduate, along with older adults, exchange ideas in academic settings--as in his Hubbard classes.

Ciotola will serve as instructor for Math 510, a high school level Algebra course to be offered beginning Jan. 5 at Hubbard High School by YSU's Office of Continuing Education/Education Outreach.

The Hubbard resident has been in public education for 19 years, 16 of those as a math instructor, including three years coordinating the program for the gifted, district-wide.

Ciotola has worked extensively in the area of math education with emphasis on curriculum development. He has been coordinator of YSU's Math Lab since March 1982.

The University's Math Lab is one of the many support systems offering tutorial assistance to those currently enrolled in math courses ranging from elementary Algebra through Calculus II.

The "where-you-live" concept of evening classes is a convenient way to obtain a variety of college courses for personal enrichment or for a degree.

The Office of Continuing Education at YSU implements these programs at two off-campus locations, Hubbard and Boardman high schools.

ADD ONE

The Hubbard High School classes were initiated in the Winter Quarter of 1985 and by that spring, 79 students had enrolled. Last year, 189 attended classes at Hubbard High School, where a total of 448 students have now participated in YSU's outreach program.

Also, the Office of Continuing Education/Education Outreach is currently offering one-on-one advisement and registration sessions in community public libraries in the five county area.

More than 1,500 persons have been counseled since 1983 when the public library/YSU advisement sessions were initiated.

To explore educational opportunities, or for personal enrichment, call the YSU Office of Continuing Education/Education Outreach at 742-3221 to make an appointment with an advisor at a "where-you-live" location.

FOR RELEASE: IMMEDIATE

Mailed November 5, 1987

YOUNGSTOWN, Ohio - Another "Peace Pole" has established roots on the Youngstown State University campus.

The six-foot pole, with a message written in a different language on each of its four sides, will be dedicated during a brief ceremony at 11:50 a.m. Tuesday, Nov. 10.

The original pole, dedicated on June 2, disappeared shortly after it was placed on the campus and the Rev. Jim Ray, advisor for the Cooperative Campus Ministry, is seeking information or the return of the original pole.

The new pole was provided through the Cooperative Campus Ministry, the Newman Center Community and Students United for Peace. The slender pole is located between walkways just west of Tod Hall. It is inscribed with the message "May Peace Prevail on Earth," written in English, Japanese, Arabic and Spanish.

Rev. Ray said the idea of "peace poles" originated in Japan, where there are now some 60,000, and has spread around the world with over 800 appearing on U.S. campuses, in parks and other public areas.
