

SIG DELTA FACE PHI GAMMA IN INTER-FRATERNAL GAME TONIGHT

Sigs Delta Won First Game Of Series Last Year

The second annual fraternity basketball game will be played Wednesday, April 3 at Central "Y" gym. The Phi Gamma fraternity will be out to avenge a scorching 23-13 defeat received last year at the hands of the Sig Deltas, while the Sig Deltas will be in the thick of the fight to defend their lead.

The Sig Deltas roster includes: Fred McFarland, Ray Codrea, Bob Lewis, Bill Litvin, and Bill McDonald from the varsity squad; Harry Peterson, an alumni member; Del Bene, Logan, and Smith, active members.

The Phi Gammas will have Joe Centrello and Harold Wicks from the varsity; Ben Kunicki, Bud Cole, Don Boylan and Bob Schultz, alumni members; Williams and Brooks, active members of the fraternity.

Probable line up—
 Sigma Delta Beta Phi Gamma
 Bill MacDonald F Bud Cole
 Bob Lewis F Don Boylan
 Harry Peterson C Ben Kunicki
 Ray Codrea G H. Wicks
 Fred McFarland G Joe Centrello
 Referee—Mike Jaffee
 Scorers—Frank Evans, Ludt Welsh.
 Timekeeper—Doc Foard.

The Open Road Club

The would be hearty pioneers of the club traveled over to Mercer for an overnight trip. The only trouble was that they picked a night when everything was covered with snow. Even Dr. Waldron (the Pennsylvania Hill Billy) was unable to stay on the road. He was pulled out of the drifts only three times. Even at that he had to have some young rustic drive his car for him. The good Doctor was very much embarrassed when he found out that his chains were not at home as he had imagined, but were in the trunk of his car. I forgot to mention that he didn't look until he was safely home. These absent minded professors! Outside of this foolish trip there has been no real activity in the club for some time. Perhaps it needs a good spring tonic. At any rate, I would really enjoy seeing it doing some good around the school.

Third Annual Science Open House April 10-11

The third annual Open House of Youngstown College will be Thursday and Friday, April 10 and 11, from 2 to 5 and from 7 to 10. It will include interesting displays presented by the students in the Chemistry, Physics, Botany, Psychology, Art and Music departments. Prof. Bare expects to bring to the auditorium a hypnotist, and a magician who will demonstrate the ease with which the human mind accepts illusions. The experiments in the Psychology department will also include the blindfold tobacco test, lie detector, personality test, and mental case clinic.

Besides the usual interesting Chemical exhibits there will be presented experiments with cosmetics, gas liquefaction, oil refining, polarized light, drugs, and a natural scenery exhibit. The Physics department will demonstrate three dimension isagous figure, which are produced by a beam of light in three dimensions, the use of the electric eye, and will display singing tubes.

All students are asked to cooperate in making this a better Open House than has ever been presented at Youngstown College, and the Freshmen are asked to serve as guides to the visitors.

Phi Gamma Fraternity News

Phi Gamma fraternity held their installation services at the Clairnell Tea Room. Installation was in charge of Mr. James Williams, the president. The following pledges became active members of the fraternity: Harold Wicks, Bill Pound, Don Elser, Joe Centrella, Elmer Davis, Joe Margo, Laverne Sample, and Don McCollough.

The fraternity has enjoyed a successful year thus far.

Johnny: "I hear your boy friend lives a dog's life."

Becky: "Yes, it is similar. Every evening he comes in with muddy feet, makes himself comfortable by the fire, and waits to be fed."

(O. C. Wilcox, is your face red?)

U. S. Can Stay Out Of Another War

Men Students Vote In Favor Of Government Ability

Results of College Peace Poll. Ninety-two votes were cast in all.

1. Do you believe that the U. S. could stay out of another great war?
 Yes—51; No—35; Undecided—3.

(a) If the borders of the U. S. were invaded would you bear arms in defense of your country?
 Yes—75; No—10; Undecided—1.

(b) Would you bear arms for the U. S. in the invasion of the borders of another country?
 Yes—19; No—68; Undecided—1.

2. Do you believe that a national policy of an American navy and air force second to none is a sound method of insuring us against being drawn into another great war?
 Yes—43; No—45; Undecided—1.

3. Do you advocate government control of a armament and munition industries?
 Yes—84; No—5.

4. In alignment with our historic procedure in drafting man-power in time of war, would you advocate the principle of universal conscription of all resources of capital and labor in order to control all profits in time of war?
 Yes—76; No—12.

5. Should the U. S. enter the League of Nations?
 Yes—33; No—54; Undecided—1.

COSMOPOLITAN CLUB

The Cosmopolitan Club held a social meeting at Wick Hall, Friday evening, March 15. A very interesting program was planned by the committee which consisted of Mary Louise Gambrel, chairman, assisted by Mayme Tucciarone, Anne Volk, and Elvira Tartan.

The Cosmopolitan club is one of the most active organizations on the campus.

Social Science Club Formed

Dr. Bowden Acts As Counselor

Youngstown College has long felt the need for an open forum, an informal discussion group, in which those students who were interested in studying current events could discuss with their fellow students, the various ramifications of the subjects in which they were interested.

In an attempt to fill this need, the social science students have taken the initiative and, with the guiding counsel of Prof. Bowden, have formulated definite plans for the carrying into actual practice of this discussion group.

The first meeting of those interested in forming a discussion club was held Friday, March 15 in Wick Hall. The students interested in forming this club agreed that the present semester should be a trial period in which the idea should be tried and, if proven successful, the group could be organized more strongly and an attempt be made to secure recognition from Pi Gamma Nu, the national honorary Social Science fraternity.

The first regular meeting was held Wednesday, March 20th in Wick Hall. The student leaders will be Eunice Price, Arthur Halferty, and William Best. Their subject will be Cincinnati, a Study in Modern Civic Government.

All students who are interested in being active members of such a discussion group are cordially invited to join in making this group one of the outstanding campus organizations.

TENSE MOMENTS

You see a beautiful girl walking down the street. She is singular, feminine and nominative. You walk across the street, changing to verbal, and then become dative. If she is not objective, you become plural—you walk home together. Her brother is an indefinite article and her mother is accusative and becomes imperative. You talk about the future and she changes the subject. Her father is present and you become past tense.

EDITORIAL

Another basketball season has reached its end. The dying embers of victory cease to glow. The defeats are a thing of the past. In the coming years only the ghosts of four players of this year's team will play with the team of tomorrow. Ghosts or no ghosts, however, their spirit will live in the minds of faculty, student, and team alike. Giving their all and taking hard knocks in return. Their names are forever inscribed in the scorebooks as individuals working as a team.

LETTERS TO THE EDITOR

WHAT HAS HAPPENED TO OUR INTRA-MURALS?

The students of Youngstown College pay for an intra-mural program, but what has become of the program? According to the statement issued there is quite a bit of money to be expended for intra-murals.

The cause of our lack of program must be the fault of our intra-mural director. Does he lack the initiative to formulate a plan or is he just plain lazy.

So far, last semester we had touch football. We were supposed to get awards. Where are the awards? Furthermore this was the first and last item of the small program.

If the intra-mural director can't find time to make a series of good intra-mural sports, perhaps we need a new intra-mural director. The present one has had his chance and hasn't made much of it. And he gets paid for doing nothing.

A Student.

BRIGHT SAYINGS OF OUR PROFESSORS

The other day Professor Bare's psychology class was discussing the subject of habits. During the course of the discussion Professor Bare said, "one of the reasons why habits are formed is that it is too much trouble to change to the new". And to illustrate, he went on further, "because it is too much trouble to change, I have been eating the same breakfast for the last five years."

Well, don't give up hope, professor—you may finish yet.

The Neon

The editors and the staff of the Youngstown College Neon are striving to give Youngstown College its first real annual. This means that the support and cooperation of everyone in the college is needed. We want you to feel that this is your annual. True enough, it does mean just a bit more to the seniors than to the rest of the college. But then, the annual is a reflection of the type of college we have. If the annual is one of which we are ashamed, then what will outsiders think of it? Now, the average student will wonder what he can do to help the Neon. All we ask is the support of the student body for our social affairs that are for the purpose of raising money for the Neon. This year the Neon will carry individual pictures of all students of Youngstown College. It makes no difference whether they are day, night, or special students. Everyone is to be represented in our book.

Phi Sigs Hold Stag At Prof. Benkner's

Faculty advisor, Prof. Karl Benkner, took a chance of having his happy home wrecked when he invited the hungry members of Phi Sig to his home for one of their well known stags. It will be long remembered by all those who attended as one of the most successful of parties. William Lackey was the hero of the evening when he decided to take over the job of chief cook and sandwich maker. The excellence of his sandwiches was exceeded only by their size. Bill forgot that he wasn't throwing tires around and constructed sandwiches of the same size. Roy Walters was a bit late, but he arrived just in time to eat.

Karl Sherfel states that his girl doesn't pet, but that she'll hold still if he wants to.

They tell me that one nite Frank Del Bene dialed the number supposedly of the theater where the "Vanities" were being shown.

"Can you give me a box for two?" he asked.

"No, we can't," replied the feminine voice at the other end of the wire.

"You can't?" inquired Frank. "Tell me, who is this?"

"This is the undertakers" replied the girl.

Here Are 10 Good Reasons

1. I know many members of the class who did not do such good work as I did and who got better marks. I was recognized among my classmates as a good student—you can ask any of them.

2. This is the only course in which I have received a poor grade. Surely all of the other instructors have not been mistaken in their appraisal of my work.

3. It is not a higher grade I seek. I care not for marks. I think marks are wicked and disapprove of them, as I also disapprove of compulsory attendance and all other requirements. However, this pernicious system of which I am the victim requires marks for achieving success; and, therefore, I seek a higher grade.

4. I do not ask for a higher grade; I am merely discussing the matter to prove why I should be given a higher mark.

5. I am not asking for a higher mark, but I ask that it be proved to my satisfaction that I did not deserve a higher mark. I offer to cooperate with the instructor in a re-consideration of my papers.

6. The reason I did not do better is that I am very honest, and I do not wish to say anything against any of the other members of the class, but

7. I am a poor boy who has to work for a living and on that account am occasionally late, or absent, or had not the opportunity to study. Therefore, I should not be marked as others are who, like high-school boys, are sure of their dinner.

8. I have studied this subject from the broad philosophical standpoint; and, therefore, I was unable to answer your technical catch-questions.

9. The questions were ambiguous, and therefore my answers should be graded according to the ambiguous interpretation that I made of your questions.

10. I am a conscientious objector to examinations. Therefore, as in the case of conscientious objectors to wars, I am not responsible for the results of them.

—From Central News.

A startling confession comes from Eunice Price. She claims that when she was away to school that she had all kinds of strange animals in her room.

Dr. Waldron really pulled a classic in heredit last Friday, but because of lack of space we are unable to print it here.

George Schoenhard claims that he will be the best dressed man in college after the Junior class has had its rummage sale.

Barnum said that one was born every minute. A lot of them were taken in last week. That's right—they bought a Watsit. I wonder if the Watsit staff couldn't be arrested for obtaining money under false pretenses. They say that the Watsit was created to furnish an outlet for the literary talent of the college. That's fine, but why didn't they use some of it in their last issue?

"Father", said Ted, "remember that you told me that you were expelled from college."

"Yes," replied the father. "Why?"

"Well, then it's certainly true that history repeats itself."

Alpha Pi Sigma News

The depression is not affecting Alpha Pi Sigma as it has some of the local sororities. The reason is that they were recently given the contract for the making of charts for all of the other chapters of their organization. It certainly was fortunate for them that they had some good artists in their group. Nor have they been neglecting the social side of life. They recently, to be exact, on February 22, held one of their famous social meetings. Bridge seemed to be the main sport of the evening.

An Alpha Pi Sigma Event

At any rate one of the girls has a right to be congratulated. Mrs. Hayden Cain is the proud mother of a baby girl, born on January 26.

Junior Prom Plans Now Underway

The plans for the fourth annual Junior Prom are rapidly being completed under the direction of the officers of the Junior Class. A general chairman has been appointed and the various committees are already working hard with their aim being to make this year's Junior Prom the most outstanding Prom in the history of the college.

The definite date set for the Prom is Friday evening, May 3rd. The function will be carried out in the delightful atmosphere of the beautiful main ballroom of the Stambaugh Auditorium. Efforts are being made to find an orchestra who will be a worthy successor to Russ Lyons who provided the music of the preceding Prom.

Pursuing the policy of electing the Junior Prom Queen, the men of the class have nominated three of the fairest maidens in college as candidates for the coveted honor of being Prom Queen. These three are Miss Mildred Bothwell, Miss Helene Snyder and Miss Helene Robinson. The men of the entire student body of the college will be asked to vote as to which one of these three they wish to preside as Queen. The results of their balloting will be kept secret until midnight at the Prom. At that time, the lucky lady will preside with the Prom King with the runners-up acting as ladies-in-waiting.

Adopting another new policy, the Junior Class announces that friends of college students will be eligible to attend this function. Invitations can be secured by those who wish to sponsor any outside couple from any member of the Junior class. The affair will be strictly formal.

Some people who go to college may be dumb, but some are just too dumb for words. I heard about a football player at a leading college who was flunking Economics. The professor, trying to help the boy for the sake of the school, gave the boy the examination questions and warned the student to keep the matter quiet. The next day the student arrived in the class, but much to the surprise of the prof., the boy did not write anything. At the end of the examination period, the boy turned in his answers TYPEWRITTEN.

Women's Intra-Murals

Basketball started the middle of February with Rosina Jones as manager. A group of girls play every Wednesday afternoon at the Y. W. C. A. Instructions were given and the fundamentals of the game were taught to those who were learning. Then, as progress was shown, teams were chosen and games were played. Honor points for admittance into the Women's Athletic Association are given for attending each practice. The most loyal basketweavers are: Rosina Jones, Helen Thomas, Constance Sabatino, Helen Creed, Clarabelle Walker, Sarah Gardner. Basketball will end the last of March.

Swimming is still in progress. So many girls have requested that the swimming season be continued that the Y. W. C. A. has consented to allow us to go into the pool, free of charge. This is a grand opportunity for us to adopt the motto, "Every girl a swimmer and every swimmer a life saver." Certain girls have attended almost every period. They are: Marion Smith, Jean McCorkle, Helen Creed, Sally Allan, and Constance Sabatino.

A Junior Orchestral group was organized in February under the able direction of Miss Dorothy Charleson. A dozen girls have regular attendance and more are asking for admittance. Instructions are given in the fundamentals of creative dancing, control of muscles, and rhythm in expression. It is the aim of this group to organize a Senior Orchestral group. To do this, we must have a larger number of girls, more hours of instruction, and certain tests for entrance.

JIBS AND JABS

(Mostly Jabs)
Wonder if Peggy got Jack Raupple on a puppy leash. He can't get far away.

'Tis rumored "Diggle" is considering moving to the county jail. My what beautiful bars.

Frank "Giggy" Del Bene is going steady again girls. Too bad. MAH FRAN.

Henry McNicholas seems to be getting the spring fever. If you don't think so, ask Peggy?

Frank Gambrel wants Clay Wilcox to bring a blanket, so it won't be so cold, when he is saying Good-night.

Rose is getting more of the But-ton every day. My, my! Rose!

Phyllis Moench can't be forgetting about some certain boy? I wonder.

What's that—Alyce (or Alice) on the loose again. Here's your chance fellows.

Two social Frat. presidents from day-school seem to be that way about THE girl. Jim and Fred may know.

Charlotte had her suitors eliminated to two. NOW its getting difficult.

Fiat-tires don't stop Betty Bush from getting places. Ask Bill.

Bit of advice girls—Be good—May is coming.

Gamma Sigma wishes to announce the following pledges: Julia Herr, Georgia Paul, Fay Treffert, and Ella Mae Kirby.

ANNUAL STAFF DUTIES

1. Editor and Assistant Editors.
Supervise the planning of the annual and the making of dummy; the making of printing specifications; the making of contracts with printers and photographers; counselling with the departmental heads; ordering photographs; ordering art work; assignments to staff members; preparations of engraver's copy; counsel, direct, and supervise the activities of each department.

2. Business Manager.
1. Handle money for Jubilee and other money-making projects of the annual (including the money gained from advertising).
2. Assist the editor and assistant editors in making printing specifications, contracts with printers and photographers, preparing engraver's copy, and ordering the engraving.
3. Responsible for raising money for annual (with exception of advertising.) This includes arrangements as soon after Lent as possible for show at Keith's—and arrangements for 10c assembly program from 11-12 o'clock. Also other ways of raising money.

Society Editor.
1. Writeups for all societies and activities except sports.
2. Class calendar.

Additional Duty of Business Manager.
1. Examine dummy with editor and assistant editors with the view in mind of determining whether staff can afford to put out the annual.

4. Literary Editor.

1. Correct grammar and punctuation of all written material handed in.
2. Class poem
3. Class Will (include names of each member of senior class.)
4. Faculty writeups: name, schools attended, degree, subjects taught.
5. Writeups under pictures of seniors: name, sorority, fraternity and other activities in present school, transfer from which school, date of transfer, line of poetry.
6. One or more short poems to be used if necessary.

7. Complete charge of Vaudeville.
8. Complete charge of popularity pole.

5. Sports Editor.
1. Writeups for all sports.
2. Aid Photography editor and editor in grouping sport pictures.

6. Photography Editor.

1. Arrangement and grouping of pictures.
2. Gathering of pictures from various sources.
3. Examine all pictures before accepting them.
4. Arrange appointments for taking pictures.

Advertising Manager.
1. Handle all advertising in annual.

2. Get High Schools for the Octoroon.
3. Handle publicity for vaudeville. Publicity for the Octoroon will be handled by Johnny Paugh who has the leading role in the play.

Circulation Manager.
1. Sell as many extra annuals as possible.

2. Aid Advertising Manager and Business Manager in getting the co-operation of the night students.

Art Editor.
1. Art work in annual.

Note to Entire Staff.
Each departmental editor will write a detailed report of all that his de-

Just A Joke, Oh Yeah!

By Guyla Maze
Comical things have been happening in the chemistry "lab" lately. Overheard was this conversation the other day—

Gene Powers—"What did you do in 'lab' today?"
Joe Margo—"We were experimenting with hydrochloric acid."

Gene—"Well, what results did you get?"
Joe—"Two holes in my pants and a bad headache."

Have you heard the "chemical definition of women" which the boys in the lab have put their heads together and thought up? Here it is—

An element—Women
Symbol—Member of human family
Occurrence—Can be found wherever man exists

Seldom occurs in four native states
Quality depends on state in which it is found.

Physical properties—

1. All sizes and colors
2. Always appears in disguised condition
3. Surface of face seldom unprotected, usually covered by a coating of paint or a film of powder

4. Boils at nothing, and may freeze at any moment; however, melts when properly treated

5. Very bitter if not used correctly.

Chemical Properties—

1. Extremely active; possesses great affinity for gold, silver, platinum, and precious stones of all kinds.
2. Violent reactions when left alone by man.

3. Great ability to absorb expensive foods at all times.
4. Sometimes yields to pressure.

5. Some turn green when placed next to better appearing sample.
6. Ages very rapidly.

7. Highly explosive and very likely to be dangerous in inexperienced hands.

Here is one from the Astronomy class.

Eunice Price—"How high is up?"

Dr. Waldron—"Well, if you take the celestial addendum and relay it to the elliptical premanence to be measured by a secondary triangulation whose magnetic variation is one theodolite level, with the zenith toce and orientioted to the fiducial edge of a reverse pelosus, with a line of col-lemation painting the astrol position of Vega's internal arc respected to a stadean efficiency, the result would be a half-way up."

Eunice—"Oh! Thanks a lot."

Dr. Foard was heard to say while explaining a problem in Differentials class, "Now watch the board while I run through it again."

Watch the next issue for some other, shall we say, mishaps in other classes.

partment has done up to date. This report must be written as it will be used by the editor, the advisor, and the assistant editors. All reports will be in Dr. Bowden's box by noon Tuesday. Dr. Bowden's box is henceforth the annual post office.

Individual assignments will be in the box by noon Wednesday. A report of the completion of the assignment must be in the editor's envelope on the date specified on the assignment.

Phi Lambda Delta News

DINNER BRIDGE

The Phi Lambda Delta sorority entertained her rushees at a beautifully appointed dinner Tuesday evening, March 5th, at Wickliffe. Lovely pale pink roses formed the centerpiece. The same pastel shade was noted in the candles held by crystal candle sticks.

After dinner, bridge was the diversion of the evening. Prizes were awarded to the Misses Ruth Gill, Georgeana Farragher and Dee Mysenberg.

Miss Norma Hedrick and Miss Josephine Cook were the co-chairmen for the delightful affair. Mrs. Castle Foard, sponsor of the sorority, was an honor guest.

MEETING—SUNDAY, MARCH 10.

The Phi Lambda Delta sorority met Sunday afternoon, March 10, in the home of Miss Alyce Abrams, Hubbard, Ohio. Plans were made for a candy sale. The date for the annual Spring formal was announced as May 18.

Lovely yellow spring flowers formed the bouquet on the tea table. The same color note being carried out in the candles and other table appointments. Delicious refreshments were enjoyed.

Miss Mildred Strain entertained with Miss Abrams as co-hostess. The next meeting of the sorority will be held in the home of Miss Helene Snyder in Girard. New pledges will be welcomed at this time.

NEW PLEDGES

Phi Lambda Delta sorority wishes to announce the following pledges: Miss Jane Rukenbrod, Miss Ruth Gill, Miss Sally Allen, and Miss Eloise Geeseman.

Penguins Beat Y. M. H. A.

The Youngstown College Penguins met the strong Y. M. H. A. passers in a charity tussle at the Y boards and came out on top 35-23. The varsity squad played the first half of the game and at the half the score was 21-10 in their favor.

In the second half the alumni supplied the opposition for Y. M. H. A. Ben Kunicki, MacDonald, Cole, Boylan, Leyshon, Mahoney and McPhee made up the alumni roster. The half was played on a more even basis, the alumni scoring 14 points while the Jewish stars scored 13.

Leyshon and Lewis were high point men for the Youngstown College crew, while Silverman was outstanding for Y. M. H. A.

Some people do not show their age so easily as others. Such must be the case of Dr. O. L. Reid. It seems that the Doctor claims that he has seen Halley's comet twice. This comet appears only once every 75 years. So I guess he must have found the fountain of youth.

"My", said Jack to his friend (who was quite heavily bearded) "your face looks like the map of Ireland."

"Yes", agreed the cynical girl friend, "but you never saw a forest like that on the map of Ireland."

SPORT NEWS

Penguins Plan 500 for 1934-1935 Season

The Youngstown College Penguins ended the basketball season with a strong finish, winning 6 out of the last seven games, giving them an even break in wins and losses and the best record made by any Youngstown College Team.

Starting February 2 against Ohio College of Chirocopy, the locals were only beaten once and that was by Fenn College. The Penguins, having beaten the Fenn Team earlier in the season 37-23, expected an easy game but Fenn pulled a surprise and took home a 42-32 victory.

The last game of the season played in East Orange, New Jersey, against Upsala College proved to be a thriller with the lead changing hands at the making of every basket. The Penguins led 14-13 at the half—but with about a minute left in the ball game, they trailed 25-26. Mike Jaffee ended the fray by pushing the sphere through the basket for the final basket of the season and victory! The boys well earned the victory.

The Penguins can boast of their result as they played the toughest schedule the school has ever had, and managed to make a good showing. It took the team some time to find itself and with all those one point losses the moral of the team at certain times was very low, but once they found themselves, well, the six wins out of seven games showed what they could really do.

The Penguins will lose the services of McFarland and MacDonald but Jaffee, Lackey, Lewis, Centrello, Green and Williams will be back next season and McPhee hopes to have a bigger and better season.

1934-35 RESULTS

Youngstown—31; Ohio College—33
Youngstown—32; W & J—23
Youngstown—25; Thiel—30
Youngstown—35; Geneva—45

Youngstown—27; Upsala—26
Youngstown—601; Opponents—610

Word comes to us that Jane Ann Van Winkle, former local student, is doing quite well for herself at Miami U. We always knew that gal would get along.

Plans are under way now for the organization of a symphony orchestra next September.

With The Penguins On The Road

Do you know that Jaffee scored the first and last basket of the season?

McFarland, Lackey and Lewis had a hot contested race for the number of personal fouls committed. But the little man (Lackey) came out in the lead with a sum total of 44 for the season. McFarland, too, receives a medal for being asked to leave from the most ball games. Seven in all. Lewis and Lackey were tied for second place with four oustings apiece.

Mike Jaffee went East for three days and then came back to school wearing white shoes. How come, Mike?

Do you still think the blond you saw in Grand Union Station, New York, was Constance Bennett, Mac?

The Penguins went to watch the Penguins play at the Aquarium, New York.

"Doc" Foard claims a record. Drove from Mount Clair to Youngstown in 9 hours. And what a ride Doc. Never again, especially with the Irishman driving.

That reminds me. The squad will miss the quarrels between the Irishman and the Scotchman. What say Mc and Mac.

The Bing Crosbys of the squad, McFarland, Lewis and Jaffee. What singers!

The Penguins played nine games at home and won four; played eleven games away and won six.

Ten games were either won or lost by one or two points. Out of the ten the Penguins won four. One at home, and three away.

The locals averaged 30.05 points per game. The opponents averaged 30.5.

When the Playhouse presents its final production of the year, "A Midsummer Night's Dream," sometime in April, two students enrolled at Youngstown College will be included in the cast. Dee Meysenberg has the feminine lead as "Hermia", while William Pound, who has participated in several plays this season, will be featured in the role of Duke Theus.

Fred Detwiler, student at Youngstown College last semester is now associated with King's Funeral Home. Claims it's the buries!

Lorene Paden recently walked up to the scale at Hartzell's and stepped on. It failed to register. She shook it a little. It refused to work. She stepped off and quickly hopped back on. It still refused to give her "a weigh". She shook it some more. By this time a small crowd had gathered around. She repeated the process of stepping off and then stepping back on. When it refused to work this time, a young man in the crowd stepped forward, deposited a penny in the slot, and the scale went into action.

The Vogue Of Today

In Vogue there is a department entitled "On Her Dressing Table" — it tells of new and interesting things in the line of cosmetics. For instance: The most recent item to fall in this category is called (heaven help us) Lovli Lashes, and it is a brushless mascara. But don't be put off by its name, for it is a type of eye make-up that does things for your eyes in a simple and almost undetectable manner.

Lovli Lashes is in the form of a flat lipstick with a narrowed end which you moisten, and apply to your lashes. This procedure not only tints the lashes beautifully and evenly, but helps train them to turn up or down, depending upon whether they are upper or lower. The effect thus achieved is not only entirely natural, but the coloring doesn't come off at all during the day, and it won't smart one bit if you get it in your eyes. Or even if you get it in your mouth! It is that pure and harmless.

If you use this on your eyebrows you use it dry like a pencil. The case is a trim chromium-finished affair that opens to flip back and make the handle for the stick. The colours are blue (very flattering), black, green, and brown, and you can buy this new brushless mascara at most of the cosmetic counters at a surprisingly low price.

In case you are looking for a lipstick that is really a lipstick, and not a mascara in disguise, there is a new one made by the Elgin American Company that has a fine, clear mirror in its side. To us, this seems an excellent idea, because you can take the lipstick out of the case and use the little mirror without the bother of dragging a separate mirror out of your hand bag or opening a vanity case. Since the Elgin American Company have been designing vanity cases for years, the cases of these lipsticks have excellent mechanism and finish. The lipstick itself is much thinner and wider than the usual size, and you have to manoeuvre it a bit until you become accustomed to the new shape. The case is made in a variety of colours,—red, blue, and green, as well as black and white. These lipsticks can be found at the cosmetic counters in many of the leading department stores.

Everytime that life threatens to become too serious, something comes along to divert us. This latest something is Twissors. These look like a pair of scissors but are really a pair of tweezers. Twissors are made by Kurlash, the company that provides all sorts of accessories for the grooming and the beautifying of the eyes, and they are, of course, intended primarily for pulling out your eyebrows. The points of superiority of Twissors are the fact that they are unusually accurate, they get a good sure grip on wayward eyebrows, and, due to the way they are curved, don't get in your way when you are peering into a magnifying mirror during the pulling-out process. You can buy Twissors for a pittance, in shops everywhere.

The student farthest away from home attending Youngstown College is Josephine Cook. She hails from way out Kansas. "Heinie" Green is the closest. He lives directly across the street with his brother.

Chic

Sometimes we all wish we had the "ability" to be keyhole peekers when various groups of college students meet. But since we can't hear all the scandal and see all the quaint little smiles, Chic will try to let you in on part of the fun.

The story is told that one of our fair coeds entered a crowded street-car. After she had stood still for almost fifteen minutes, she heard a timid voice say: "Madam, you are standing on my foot".

In extreme surprise, the girl replied: "I beg your pardon, I thought it belonged to the man sitting next to you."

We heard about a pretty cute little incident which happened to Bill Litvin. One evening when he rang the doorbell of his girl friend's house, his girl friend (have you seen her yet?) greeted him with, "Hello, Pilgrim."

"Why call me pilgrim?" responded Chux.

To which she casually remarked: "Oh, because everytime you call, you make a little progress."

One day Mike Jaffe appeared to be very busy in the library, apparently reading from the dictionary. One of the girls noticing his eagerness for knowledge asked jokingly: "Trying to get a broad vocabulary?"

Then Mike very cleverly answered: "No, not a broad vocabulary—just a broad."

Not so long ago in Psychology class, Prof. Eare was giving an example of mental tests. He dictated a few numbers to Marjorie Krichbaum to be repeated backwards. Marjorie, not being quite able to repeat the numbers in such a fashion and still not wishing to be classed as mentally deficient, very uniquely blurted out: "But I can read the Burma Shave signs backwards!"

It is told that Therese Cronan went to the Warner theater one day, and after being seated for several moments she remarked to her girl friend: "My aren't these seats uncomfortable?"

Just then a shy little voice murmured: "It wouldn't be so bumpy if you'd get off of me."

Therese then realized that she had not been able to see the seat and had sat down on a tiny little fellow who came to see Shirley Temple.

They tell me Ray Codrea went to see his new friend one nite, and just to keep up the conversation he said: "Are you a friend of indoor sports?"

Nonchalantly the girl replied: "Yes, if they know when to go home."

One of the girls here at school went home and was telling about the losses caused by the well-known bug. Her mother in all sincerity warned her: "Be careful that you don't bring any home on your clothes dear; remember the trouble we had getting rid of the ants this summer."

When one of the girls was receiving a personality analysis from Prof. Eare, he asked if she were compelled to be in at a certain hour. One of the other girls broke out into laughter. I was just wondering if she were thinking about the time she had to crawl in the coal cellar window in order not to awaken the folks.
