

Deesz Is New Engineering School Dean

Louis A. Deesz, dean of the evening engineering division division of Youngstown College for the past year and a member of the part-time faculty for the past four years, has been appointed dean of the engineering school on a full-time basis effective immediately, President Howard M. Jones, announced today.

Deesz is a graduate of Carnegie Institute of Technology where he received his bachelor of science degree and his professor's degree in Electrical engineering. He has had nearly 25 years of practical engineering experience with Westinghouse Electric and Manufacturing Co., Pittsburgh, Pa., Colorado Fuel and Iron Co., Pueblo, Colorado, Fryen Engineering Co., Chicago, Ill., and Republic Steel Corp. of this city where he has been employed as commercial engineer for this district for the past ten years.

Deesz has been teaching engineering subjects in the evening school and during the past semester has taught ground school subjects in the flight training program offered under the direction of the Civil Aeronautics Administration Service.
