Recommendation to the President of the College

That all committee recommendations concerning the Faculty as a whole, be presented in mimeographed form to the individual faculty members prior to a regularly scheduled brief faculty meeting (biweekly or monthly) to which all faculty members, part-time included, be invited for a final approval of the recommendations. Such a system would have at least two advantages:

✓ No faculty member will be deprived of the opportunity of giving an influencing opinion of any major development in the College, nor will be justified in ~~ex-~~claiming ignorance of the policies of the College. It is agreed that regularly scheduled faculty meetings are necessary evils for the final approval of the committee recommendations and it is felt that such approval should be on record in the minutes of the faculty meetings.
