## - The problem of Non-Contact

- Aime Michel (in The Humanoids ; ed. by Charles Bowen)

**CONTACT**: an exchange as complete as possible between communities, at all levels and in all imaginable fields

1. Such contact does not exist between humanity and 'X'
2. Absence of contact is the #1 problem presented
  - Charles Fort "Why don't they show themselves to us openly?"
3. They are here, in our world, and we are not there in theirs
4. If 'X' system is multiple, they all obey one single law on one precise point .....  
abstention from contact
5. Physical contact is possible. We've seen them, heard them, touched them.
