**Peter Pan Syndrome** - a refusal to grow old in thinking

Most of us grow old in body  
I used to all of us, until I experienced Bill Koyak  
6 yrs ago

Koyak 6

Patterned  
Flux - Cycle

Go discover America

Ladies and Gentlemen, we can all, each and every one of us,  
go discover America, because America is here.

Let's get in the car

California Redwoods  
Gulfstream waters sub water woman  
New York island (statue of liberty)  
America the Beautiful

I'd love to

Oh I've read about

Pemberton Park  
Lake Geneva  
Men on the monument

① The Future of the AA league

② Peter Pan

Injuries wrenched shoulder in Canton in 74,

month worked in Lakewood in 75, Collarbone broken  
at Pemberton in 76, 2 Ribs busted in Warren in  
79, + hit by pitched balls 13 times in  
31 games last year. Give it up.

③ Theme: <sup>this summer</sup> Let's go discover America

I'd love to

④ But wait dear, we've got to think about flux and cycles  
flux? What in the heck is flux?

Flux is the big picture for everything

Flux is another name for change

Some Change is characterized by cycles

Cycles are patterns of change

Cycles are patterns of flux.

Cycles are patterns of growth and decay

Flux - growth and decay  
increase and then decrease

Change is growth - and decay

Repeated growth + decay in a pattern is a cycle

When I look at the AA league, I think we'll see a long period of decay, but I think it's a cycle, and it's now in a period of growth once again.
