

A Look at the Radiant Energy Research of John Bedini

Dr. Stephen A. Graf, Ph.D.
Emeritus Professor of Psychology
Youngstown State University

Websites

- TheOrionProject.org
 - Dr. Steven Greer
- Cheniere.org*
 - Tom Bearden

* Source where one can obtain DVD shown tonight

Background

- The Orion Project
 - A Manhattan Project-type attempt to provide low-cost off-the-grid non-polluting energy to the world
 - Videos featuring Dr. Greer explaining the project
- AERO
 - Alternative Energy Research Organization

Why these two DVDs?

- #1 and #5 feature Tom Bearden explaining Energy From the Vacuum from a theoretical viewpoint
- #2 and #6 feature John Bedini showing and discussing actual working devices
- #4 features Howard Johnson talking about his work with magnets
- #3 features Dr. Deborah Chung's negative resistor

COP = Coefficient of Performance

- Not equal to "efficiency"
- COP = Output (effective energy output) divided by Input (energy input by the operator)
- Example: Windmill
 - Efficiency < 50%
 - COP >> 1.0

Why I'm Here

- Number of devices built?
- Understanding of basic principles?
- Friends
- Profession
