MARCH

MEDICAL-LEGAL BANQUET

Tuesday, March 19, 1968

MURAL ROOM

SPEAKER:

Rev. Joseph R. Lucas, Youngstown State University

The Unitest System

A PROFITABLE
DIAGNOSTIC TOOL
DESIGNED TO REPLACE
THE PROBLEMS OF
THE OFFICE
LABORATORY

Bio Dynamics has added three (3) more tests to their present UNITEST SYSTEM of six (6), making a total of nine (9) tests in all, which are as follows:

- | | |
|------------------------|-------------------------|
| 1. True Glucose | 6. Bilirubin |
| 2. Hemoglobin | 7. Total Protein |
| 3. Cholesterol | 8. Globulin |
| 4. Blood Urea Nitrogen | 9. Alkaline Phosphatase |
| 5. Uric Acid | |

and with more to come in the near future.

If you already have the Model #250, then all that is needed is the additional Scale. Ask our Sales Representative who calls on you for the necessary information.

The UNITEST SYSTEM is designed for **your office** to be used by **your present personnel** to eliminate outside laboratory costs to you and **your patients**.

There are no difficult techniques to master—all reagents are premeasured and color coded. All glassware and pipettes are disposable.

There are approximately 3 thousand UNITEST SYSTEMS IN DAILY USE BY PHYSICIANS AND LABORATORIES THROUGHOUT THE UNITED STATES.

EDUCATION GAP?

By the time you read this message, Valentine's Day will be right under our nose, and "Heart Month" will have taken on a new meaning for all the world by the remarkable achievements performed by Dr. Barnard, and others in the successful transplantation of the human heart.

Such an achievement is only one of many remarkable medical advances which have taken place within the last year. The transplantation process would not have been possible without the development of new tissue matching techniques and immunity—blocking agents. New agents have been developed in the field of cancer research, and the laboratory synthesis of a man-made virus has opened up broad new fields of hope in the management of genetic diseases, viral disease and cancer research.

This is precisely what "Regional Medical Program" is all about. The plan as proposed by the Federal Government is designed to bring the existing major medical education and research centers into closer contact with the community physician so as to narrow the "information gap" which presumably exists between the medical center and the community hospital.

While there is still some reason to question the actual existence of this gap in applied medical knowledge, and while there is also reason to question whether the early application of drastic new treatment is wise, the fact remains that the Program is being developed and will no doubt have a profound effect on our treatment of patients in the future. Such a program is unique in that it represents the first Federal aid directed exclusively to the medical profession. Organized medicine, traditionally opposed to Federal interference, seems a little bewildered as to just what stance to take toward this new approach, now that the shoe is on the other foot.

By this time we should have learned some basic facts about Federal aid. First, the Federal government does not subsidize without regulation and control, and as we learned from Medicare, the recipients should have a strong voice in those controls. The American Academy of Pediatrics has set the stage by entering into a consultation contract with the government to guide the function of Project Head Start. This was both a historic and expedient move.

We have yet to learn just what means will be utilized to expedite this program, or what regulations and controls might be proposed to limit the doctor-patient relationship. But experience with such plans has taught us that lines of communication must be set up between our organization and any Federal program in the earliest stages, in order that we have a strong voice in the administration of such a program. You can rest assured that both the national and state organizations will be intimately involved in the formulation of the ground rules of this program, and we at the local level must keep a careful watch to see that this new plan benefits, rather than exploits, the doctor-patient relationship.

—Robert R. Fisher, M.D.
President

Editorial

Dr. Benjamin Spock has been indicted on charges of conspiracy to violate the Selective Service Act. Dr. Spock has not had his encounter with "The twelve tried and true", and certainly should not be prejudged guilty of breaking the law. However, Dr. Spock has been seen parading back and forth in front of President Johnson's home with groups of "hippie-like" people who seem to feel that draft card burning is an excellent way of showing their distain for the laws of their country.

Dr. Spock certainly has the legal right to form any opinion he chooses on any subject that interests him. He also has the legal right to voice these opinions at any time and at any place that he chooses. He may also prance about Washington demonstrating his fervour if he so desires. We do not question these rights, however, we believe the question of ethics and professional conduct must be raised.

Dr. Spock is a physician. In fact, he is one of the best known physicians in the country. His excellent and beloved guide to baby and child care can be found on the book shelves of the majority of American homes. As a result, Dr. Spock has gained an enormous amount of prestige and authority. We contend that people of this stature also must assume great responsibility, and this then, is the point.

When Dr. Spock lends his influence to forces outside his field of excellence, is he acting irresponsibly, and is he doing a great disservice to his profession, to himself, and in this instance, to his country?

OFFICERS INSTALLED AT ANNUAL BANQUET

In what was perhaps the most informal installation in the history of the Mahoning County Medical Society, Dr. Harold J. Reese administered the oath of office to the 1968 officers, delegates and council before a crowd of 110 members and wives, January 16 at the Mural Room.

In a jovial mood, Dr. Reese presented the gavel to Dr. Robert R. Fisher, a bound volume of the 1967 *Bulletin* to Dr. Elias Saadi, and a radio desk set (for contacting UFO's) to Howard Rempes. In turn, Dr. Reese was awarded an appreciation plaque and the past-president's pin.

In his acceptance speech, Dr. Fisher outlined the progress being made toward a medical school for Youngstown.

Principal speaker was Dr. Charles L. Hudson, of Cleveland, immediate past president of the American Medical Association. Dr. Hudson spoke on the Regional Medical Program for Northeastern Ohio and the part that the AMA played in making the program a meaningful one.

Those present observed a moment of silence for members who passed-on during the past year: Dr. William Allsop, Dr. R. V. Basso, Dr. Earl Brant, Dr. Joseph Colla, Dr. W. O. Mermis and Dr. Clyde Walter.

The invocation was given by Rev. Paul Coleman, pastor of Christ U. P. Church. Arrangements for the meeting were made by Dr. Elias Saadi, program chairman, who also introduced the speaker.

DIAGNOSIS

Taking part in the Diagnosis radio program during the month of January were:

Jan. 9 — Pneumonia — Dr. Harold Chevlen and Dr. Phillip Giber.

Jan. 16 — Influenza — Dr. Robert Jenkins, Dr. G. E. DeCicco.

Jan. 23 — Common Cold — Dr. Glenn Baublatt and Dr. William Martin.

Jan. 30 — Acute and Chronic Bronchitis & Emphysema — Dr. William Loeser.

The programs are heard over WFMJ at 8:05 p.m. each Tuesday. They are recorded at 9:30 a.m. on the same day. Any physician interested in presenting a topic on "Diagnosis" should contact the Medical Society office or Dr. McDonough, Radio-TV Chairman.

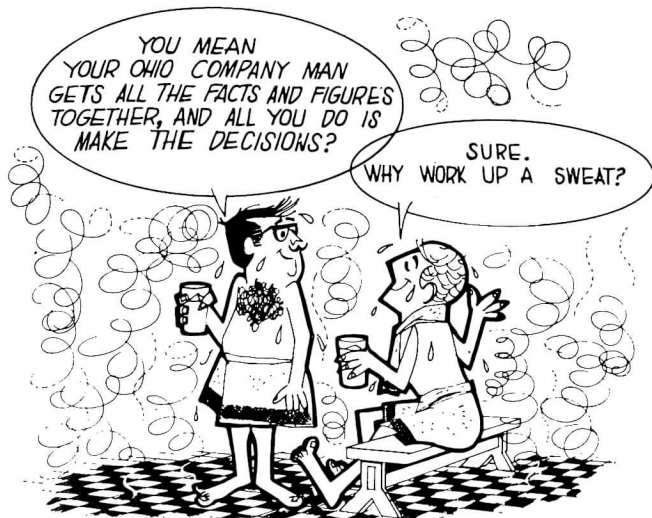

MEDICAL SOCIETY WELCOMES NEW MEMBERS

Thirteen new members of the Mahoning County Medical Society were guests at a meeting conducted by the Indoctrination Committee on Thursday, January 25, at the Mural Room.

Attending were Drs. Rashid A. Abdu, John H. O. Bleacher, Fernando A. Carbonell, Albert Burton Cinelli, Bertwin E. Einfalt, Gene D. Fry, Armand Garcia, Robert L. Gilliland, Jose Ivan Gonzalez, Joseph C. Kopinski, Mary L. McKenzie, William Moskalik and Jan P. Vette.

Discussions on a variety of medical topics were conducted by the committee, consisting of Dr. G. E. DeCicco, chairman, Dr. F. S. Coombs, Dr. H. S. Ellison, Dr. R. L. Jenkins, Dr. S. W. Ondash and Howard Rempes. At the conclusion of the meeting, sandwiches and coffee were served.

Attendance at an indoctrination meeting is required before an associate member may become active.

Let our representative in your area help you establish a sound investment program, then continuously provide facts and figures to keep you abreast of things.

As investment bankers participating actively in local and national underwritings, we are able to bring to Ohio investors a wide variety of investment opportunities in tax-frees, corporate bonds and equities. As investment dealers, we maintain markets for the securities of many companies and communities. We're in touch with major markets from coast to coast, so we can help you buy or sell listed or over-the-counter securities wherever they're bought and sold.

Our man in your area will be happy to put our facilities and resources to work for you . . . and let you make the decisions. Just ask him to come up with some investment ideas. Then watch him turn on the steam.

BULLETIN BOARD

Several physicians were elected to boards at a recent meeting of the Jewish Federation. New members of the Jewish Federation Board for three-year terms are Dr. Saul Tamarkin and Dr. Milton Yarmy. Elected to the Jewish Community Center Board for a three-year term is Dr. William Loeser. Dr. Alex Rosenblum is a three-year member of the Jewish Family and Children's Service board. Dr. Samuel D. Goldberg is president of the Jewish Federation.

Dr. Craig C. Wales was recently installed as the 52nd president of Youngstown's Downtown Kiwanis Club.

Dr. B. B. Burrowes is treasurer and chairman of the Senior Citizens Committee of Buckeye Elks Lodge 73.

Dr. Arthur E. Rappoport recently spoke at a meeting of the New York Academy of Sciences. His topic was, "Computer Coupled Automation in the Hospital Laboratory as a Tool for Enhanced Patient Care."

Dr. R. D. Murray has received notice that his line drawings have won first prize at the Arkep Galleries national show of graphics in New York City. Dr. Murray will have a one-man show at the Galleries during the first two weeks in March.

Dr. Harlan P. McGregor, athletic team physician and member of the North Lima School Board for many years, received a plaque in recognition of 20 years service with the Board.

RESOLUTION DEADLINE ANNOUNCED

Deadline for resolutions to the Ohio State Medical Association has been announced to be March 14. Resolutions must be received at the OSMA office in Columbus by that date in order to be read at the House of Delegates meeting of the state organization, beginning on Monday, May 13. Members having resolutions to submit should consult with delegates, officers or council members from the Mahoning County Medical Society.

1:00 p.m. VP, Medicine, Dr. T. S. Danowski, St. Elizabeth Hosp., Aud. #1.

The National Communicable Disease Center warns that substantial numbers of cases of A₂ (Asian) influenza can be expected during the 1967-68 season, especially in eastern parts of the country.

**If A₂ (Asian) influenza
threatens here...**

**now you can prescribe
possible immediate protection**

**Symmetrel[®]
(Amantadine HCl)**

When an outbreak strikes, it is often too late to administer influenza vaccine for effective prophylaxis. "Symmetrel," the only effective oral medication for prevention of Influenza A₂, may well reduce the incidence and spread of the disease among persons of all age groups.

"Symmetrel" is not indicated for the prevention of influenza or respiratory disease other than influenza A₂ or for the treatment of established illness. Availability of "Symmetrel" should not affect the physician's usual vaccine practices. The medication should be considered especially for high influenza-risk patients and high responsibility personnel.

For brief summary of prescribing information, see reverse side.

Prescribing Information

Indications: "Symmetrel" is indicated for the prevention (prophylaxis) of influenza A₂ in persons of all age groups. Early use is recommended, preferably before or as soon as possible after actual or suspected contact with individuals suffering from influenza A₂. "Symmetrel" should especially be considered for high influenza-risk patient groups such as those suffering from chronic debilitating diseases and elderly persons.

Contraindications: Not indicated for the prevention of influenza or respiratory disease other than influenza A₂ or for the treatment of established illness. Availability of "Symmetrel" should not affect the physician's usual vaccine practices.

Warnings: Administration to patients with central nervous system disease, particularly geriatric patients with cerebral arteriosclerosis, and patients with a history of epilepsy or other "seizures", requires strict observation for possible untoward effects (see Adverse Reactions). Patients taking psychopharmacologic drugs, central nervous system stimulants, or alcoholic beverages should be observed for possible evidence of intolerance. Those patients who experience central nervous system effects or blurring of vision should be cautioned against driving or working in situations where alertness is important.

No teratogenic effects have been seen in reproductive studies in rats and rabbits. Studies in pregnant women have, however, not been done and use of this drug in women of childbearing age should be undertaken only after weighing the possible risks to the fetus against benefit to the pregnant patient. It should not be administered to nursing mothers since it is not known whether the drug is secreted in the milk.

Precautions: Ineffective against bacterial infections. Patients should be observed for idiosyncratic reactions as with all new drugs. Geriatric patients with pre-existing serious medical illnesses with mental or physical deterioration should be followed carefully while taking "Symmetrel". (See Adverse Reactions.)

Adverse Reactions: With higher than indicated doses manifestations of central nervous system effects such as nervousness, insomnia, dizziness, lightheadedness, drunken feeling, slurred speech, ataxia, inability to concentrate and some psychic reactions including depression

and feelings of detachment were seen. Occasional blurred vision was reported at higher doses. Some of the milder and less pronounced symptoms above have been reported in a small number of patients taking the recommended dosage of 200 mg per day. These were mostly transient and disappeared with continued administration of the drug. Some geriatric patients developed paranoid or hallucinatory behavior and became unmanageable while taking 200 mg daily. Medically unselected seriously deteriorated geriatric patients showed poor clinical tolerance after several weeks of daily dosing with 200 mg per day. One elderly patient with a history of prior cerebrovascular accident developed visual hallucinations and grand-mal convulsions while on the drug at 800 mg per day. Some cases of dry mouth, gastrointestinal upset and skin rash and, rarely, tremors, anorexia, pollakiuria, and nocturia have been also reported.

Dosage: Adults: Two 100 mg capsules (or 4 teaspoonfuls of syrup) as a single daily dose; or the daily dose may be divided into one capsule of 100 mg (or 2 teaspoonfuls of syrup) twice a day.

Children: 1 yr.—9 yrs. of age: Calculate total daily dose on the basis of 2 mg to 4 mg per pound of body weight per day (but not to exceed 150 mg per day). Daily dose, given as the syrup, should be given in 2 or 3 equal portions.

9 yrs.—12 yrs. of age: Total daily dose 200 mg, given as one capsule of 100 mg (or 2 teaspoonfuls of syrup) twice a day.

How Supplied: Capsules: Bottles of 100. Each red gelatin capsule contains 100 mg amantadine HCl.

Syrup: Bottles of 1 pint. Each 5 ml (1 teaspoonful) contains 50 mg amantadine HCl.

Symmetrel[®]

(Amantadine HCl)

the only oral chemical virostat
for prevention of influenza A₂

Wilmington, Delaware 19898 U.S.A.

APPLICANTS FOR ACTIVE MEMBERSHIP

Dr. Anthony Thomas Deramo, an Internist, was born at Youngstown on November 18, 1937. He attended East High School and Western Reserve University, where he received a B.A. degree in 1958. His medical degree was conferred at the University of Miami Medical School in 1962.

From 1962 to 1963, Dr Deramo was on a rotating internship at St. Elizabeth Hospital. He took a residency in Internal Medicine at the VA Hospital, Pittsburgh, 1963 to 1966. This was followed by a Fellowship in Allergy and Immunology at the same hospital, until 1966. In July, 1966, Dr. Deramo returned to Youngstown in association with Dr. S. R. Zoss at 510 Gypsy Lane.

Dr. Deramo is certified by the American Board of Clinical Immunology and Allergy. He is a member of the American Academy of Allergy and is Chief, Allergy Clinic, St. Elizabeth Hospital.

He is single, a member of St. Charles Church, and is a Captain in the Medical Corps, U.S. Army Reserve. Dr. Deramo lives at 562 West Glen Drive. His hobbies are sports.

Dr. I. N. Dombczewsky, Superintendent and Medical Director, Mahoning Tuberculosis Sanatorium, was born at Jabloniw, Ukraine on August 11, 1899. His schooling was at Lwiw, Ukraine and his medical degree was received at Charles University, Prague, in 1928.

In addition to a residency in his native country, Dr. Dombczewsky was a resident at Sea View TB Hospital, Staten Island, N.Y., and at Molly Stark Hospital in Canton. In August, 1957, he came to the Mahoning Tuberculosis Sanatorium as Staff Physician. Following the death of Dr. H. H. Teitelbaum, he became Superintendent and Medical Director, receiving the appointment in January, 1966.

Dr. Dombczewsky is a member of the National Tuberculosis Association and the American Thoracic Society. He was a 2nd. Lt. in the First World War. His wife is the former Anna J. Leshkiw, whom he married in 1935, and they have one child, Maria Lubomyra. They live at the Sanatorium, 4880 Kirk Road. Dr. Dombczewsky's hobbies are music, arts literature and sports.

MEDICAL SOCIETY PUBLISHES AIDS

Two new brochures, published by the Mahoning County Medical Society, will serve to advise members upon retirement and to give some guidelines to a physician's family faced with closing the office at the time of his death.

Entitled, "Arranging the Physician's Personal and Office Records," the one brochure offers a check-list of important matters about which other members of the family should have knowledge. The second pamphlet, "Closing the Physician's Office," lists a number of steps which the physician should take upon retirement, or which his family should take in the event of death.

Copies of the brochures are being mailed to every member. Additional copies will be available at the Medical Society office.

Now... twice as much as before in each teaspoon

Puerto Rico	Washington State	
(Air Force Base) ---- 1	(Oak Harbor)	1
		<hr/>
		18

Mrs. Polk also interviewed 270 persons; this includes clinic patients and patients of private physicians.

178 home visits were made with the assistance of other Visiting Nurses; 68 were not at home or not found.

Educational films from the U. S. Public Health Service, entitled, "A QUARTER MILLION TEENAGERS" and "INNOCENT PARTY", also slides about Venereal Disease were shown by Mrs. Polk to various High Schools, Parent Teachers and church groups in Youngstown and surrounding localities. Altogether 3,372 persons viewed these films from January 1, 1967 to December 31, 1967.

PROCEEDINGS OF COUNCIL JANUARY 9, 1968

The regular meeting of the council of the Mahoning County Medical Society was held on Tuesday, January 9, 1968, at the Mural Room, Youngstown, Ohio.

The following physicians were present: R. R. Fisher, President, presiding, J. J. Anderson, Louis Bloomberg, G. E. DeCicco, F. A. Friedrich, C. A. Hixson, Henry Holden, R. L. Jenkins, R. D. Murray, J. V. Newsome, C. E. Pichette, M. C. Raupple, H. J. Reese, Jack Schreiber, J. W. Tandatnick and Kurt Wegner. Also present was Dr. H. P. McGregor. Absent were: Drs. J. J. Buckley, L. P. Caccamo, W. D. Loeser, E. T. Saadi, F. L. Schellhase and R. G. Warnock.

The following applications were presented by the censors and read by the executive secretary:

ACTIVE MEMBERSHIP

Anthony Thomas Deramo, M.D., 510 Gypsy Lane

Ilarion N. Dombczewsky, M.D., Mahoning TB Sanatorium, 4880 Kirk Rd.

The applications were approved. The above applicants will become active members of the Mahoning County Medical Society within fifteen days after publication in the *Bulletin*, unless objection is filed in writing with the secretary during that time.

The Medical Dental Bureau "any doctor call" report was passed around for every member to see.

A letter was read from the Little Forest Medical Center indicating the appointment of Dr. John O. Duey as Medical Director of both the Akron and Youngstown institution.

The motion was made by Dr. Pichette, properly seconded, that the Mahoning County Medical Society delineate the exact position of a Mahoning Director, and set the rules under which the Medical Society will recognize a Medical Director as such, and further that the Medical Society circularize the standards to all interested persons. The motion was passed, and will be referred to the Hospital Relations Committee.

A letter was read from the Child Achievement Center of Eastern Ohio.

A letter was read from Wesley Pollock, supervisor, Health and Safety Division, Youngstown Public Schools, asking for assistance in establishing a school committee on health. Dr. Reese gave background information. The motion was made by Dr. Bloomberg, and properly seconded, that the Mahoning County Medical Society establish a School Health Program Committee. Motion was passed.

Dr. Anderson, *Bulletin* editor, read a letter from the *Bulletin's* national advertising representative, asking if we would accept liquor advertising. The motion was made by Dr. Anderson, properly seconded, that the *Bulletin* not accept the proposed ad. Motion was passed.

Dr. McGregor presented a plan which would assign members of the Medical Society to each member of Council in order that each member would have a direct representative on council. The motion was made by Dr. Pichette, properly seconded, that a committee be appointed to study the proposal and that a definite plan be brought before the Medical Society as a whole. Motion was passed.

Dr. Schreiber introduced discussion concerning Medical Society recognition of physicians who had been in practice 25, 30 and 40 years. Dr. Schreiber made the motion, properly seconded, that the Medical Society give an annual recognition of members for 25, 30 and 40 years of service.

Dr. Pichette introduced discussion concerning the dangers of the federal proposal for re-examination of physicians. The executive secretary was asked to check with the Ohio State Medical Association for further information.

FROM THE BULLETIN

THIRTY YEARS AGO — FEBRUARY 1938

During the great Depression of the 1930's the hospital dispensaries had been closed due to lack of funds. The indigent had been cared for by the Emergency Relief which paid the doctors \$1.00 for an office call and \$2.00 for a house call. Now they were planning to reopen and there was much discussion about their function in the medical scene. It was agreed that they were needed for teaching purposes and the Society approved the acceptance of patients on a subsistence level whose medical care was not provided by any other agency. The same arrangements exists today.

Charlie Scofield of Struthers wrote an article on "Why Practice Medicine?" He said that a doctor should treat his patients so that they would be glad that he studied medicine.

TWENTY YEARS AGO — FEBRUARY 1948

The latest thing in medicine was the Papanicolou detection test for Cancer of the Uterus.

A. R. Cukerbaum wrote about the antihistamine drugs. He mentioned Torantil and Antergan which first appeared in Europe in 1942. Benadryl and Pyribenzamine were produced in our country in 1946.

W. J. Tims as Health Commissioner reported that Influenza due to type A virus was on the increase.

New members were: Clyde K. Walter, Kenneth E. Camp, Rollis R. Miller and Anthony J. Bayuk.

Harold Reese topped the doctor's bowling league with a score of 263.

Gabriel DeCicco was appointed chairman of the membership committee of the American Academy of General Practice in Cleveland and was assigned to organize a chapter in Mahoning County.

TEN YEARS AGO — FEBRUARY 1958

President Detesco wrote: "The modern physician should develop three qualities: He should be a cultured man, he should be capable of compassionate and perceptive responses, and above all he should be a scientist."

Editor Morris Rosenblum wrote: "The advance in the treatment of heart disease has been phenomenal. What will it be 300 years from now?"

Kurt Wegner had an important article on "The Infant With Congenital Heart Disease."

The annual banquet in January was held at the Youngstown Country Club. It was the first time that wives were invited. There was an informal cocktail hour and the main course was Cornish hen stuffed with wild rice. It was a gala affair.

New members were: Kurt Wegner, Elsa Shapira, Henry Holden and John (Jake) Turner.

...curb the urge to eat excessively with
ESKATROL® SPANSULE® CAPSULES

Trademark

brand of sustained release capsules

Each capsule contains Dexedrine® (brand of dextroamphetamine sulfate) 15 mg., and Compazine® (brand of prochlorperazine) 7.5 mg., as the maleate.

Especially for patients who react to emotional stress by overeating

Before prescribing, see complete information in SK&F literature or *PDR*. The following is a precautionary statement.

Contraindications: Hyperexcitability, undue restlessness or anxiety; hyperthyroidism; lactating (nursing) mothers; patients taking MAO inhibitors.

Precautions: Use in pregnant patients only when deemed essential for patient welfare. Phenothiazines may potentiate central nervous system depressants and organic phosphate insecticides. Use cautiously in hypertension and coronary artery disease. Psychological dependence may result from excessive amphetamine use. In such cases, withdrawal of the medication is recommended.

Adverse Reactions (reported or considered possible

with the components of 'Eskatrol'): *Dextroamphetamine*—Overstimulation, restlessness, insomnia, gastrointestinal disturbances, diarrhea, palpitation, tachycardia, elevation of blood pressure, tremor, nervousness, sweating, impotence and headache. *Prochlorperazine*—Sedation, dizziness, hypotension, tachycardia, dry mouth, skin rash, tinnitus, vertigo, nasal congestion, miosis, lethargy, cholestatic jaundice, leukopenia, agranulocytosis, neuromuscular (extrapyramidal) reactions (motor restlessness, dystonias, pseudo-parkinsonism), convulsions, catatonic-like reactions, reversal of epinephrine effects. For a comprehensive presentation of 'Eskatrol' prescribing information, including adverse effects reported with phenothiazines, see SK&F literature or *PDR*.

How Supplied: Bottles of 50 capsules.
