## Library hit by arson; books, magazines intact

by Lyndie Votaw

Arson was determined to be the cause of the fire which broke out in the Youngstown Public Library at the corner of Wick and Rayen Avenues yesterday morning, said Youngstown fire chief Rocky Russo. Detours set up because of the blaze inconvenienced many YSU students on their way to school.

Four separate fires, about 15 to 30 feet apart, caused extensive damage to the contents of a sixth-floor storage room, but destroyed no books or periodicals. "The fact that there were four distinct fires gave us our first lead that the fires were intentionally set," said Russo. "It was apparent that they had been set, because the material in between the four wasn't burned at all."

A two-foot window was found opened in the basement of the building, and at this time is assumed to be the exit route of the arsonist.

### Concert review

## Dave Mason at YSU

by Liz Lane

Warned an article in the Friday issue of *the Jambar* about the Dave Mason concert, "If you don't want to miss the legend you'd better be there." Obviously many didn't care whether they saw the legend.

The attendance was low and those who did attend, were blown from their seats by the wall of sound. I feel at a live performance the audience wants to be entertained and become part of the show. However, the volume was too loud for the acoustic facilities, which made the songs undistinguishable. The sound aspect of the concert was indeed poor.

Mason hurried through the numbers as though he were in a routine of "Let's finish this and get on with the next number." Every song seemed rushed, and all of his songs were fast, unlike some of his slower numbers on his albums. Only one blues type song was performed and also, that was even hurried.

The other members of his group seemed more alive and were giving the audience the show we wanted. Their jamming together showed a high degree of professionalism. The guitar and percussion were excellent, however, despite the sound system.

I feel Mason and his group forced an ovation upon the audience during the last song.

"I would say there is no way spontaneous combustion could have occurred in that room," agreed Joe Phelan, assistant superintendent of buildings for the library system. "There were no flammable materials or combustibles in there. The wiring was faultless. The area was just not conducive to a fire."

The fire was first discovered by William Hack, a maintenance man, shortly after he reported to work at 6:00 a.m. A clock in the building was stopped at 4:51, its wires damaged by the fire.

The fire did not spread extensively, as Youngstown firemen managed to confine the blaze to the storage room in which it started. Additional smoke and water damage "caused some ceiling damage, but left the building pretty well intact," said insurance investigator Bill Gregory. An exact estimate of damage is not available at this time.

Bill Rowan

FIREMEN MANAGED to control an arson fire which hit the Youngstown public library yesterday morning. At left is a gaping hole in the sixth floor wall. To the right is a shelf of books, left undamaged.

## OEA provides bargaining power for faculty, Robinson explains

by Leslie Pearce

"United we stand, divided we fall, and if our backs should ever be against the wall, we'll be together, together you and I."

A bit trite, however, not far from the truth when it comes to the OEA. At least that's the way it was described by Dr. David Robinson, newly appointed President of the union.

When most students from YSU hear the letters OEA, (Ohio Education Association), they probably slouch and retort, "What's

that?" Therefore, the *Jambar* contacted Dr. Robinson to uncover the answers to such questions. The union, or OEA, is a bargaining unit. Robinson explained, "The nature of collective bargaining is that the administration bargains with a bargaining agent to establish uniform wages, work loads, and rules for all the people who are in a certain class of employment. In this case, it is the full time faculty members. The alternative to collective bargaining would be to allow the admin-

istration to make all decisions unilaterally in a one-sided manner, and require the individual faculty member to attempt to bargain with the institution as an individual." Robinson continued, "Needless to say, when we can pitch a collective bargaining power against the administration, the fight is likely to be more fair."

Robinson also remarked that, "Obviously, much of our power has to come from the ability of the group to threaten to close the university. Then they have to pay attention to us."

Another question asked by most students would be, "What are the duties of the president of the union?" Robinson, a native Californian, responded by detailing his four principle assignments. The union president must:

1. Preside over the meetings of the executive committee, which consists of the officers.
2. Preside over the Chapter meetings, which is made of all the OEA members.
3. Be the official spokesman for the association to the university and public.
4. Be ultimately responsible for enforcing the collective bargaining agreement.

The president then summed up the outlook for the coming academic year by saying, "The collective bargaining agreement in which we are now working with is a four year agreement which (Cont. on Page 7)

Eugenia Pierce

BOY, did he take a wrong turn! Actually, this was a promotional gimmick by a local car dealer boosting the YSU football team.

## More leisure time Computer to change lifestyle

by JoAnn Nader

It's 8:00 a.m. As the alarm clock sounds, the bedroom curtains swing silently apart, the venetian blinds snap up and the thermostat boosts the heat to a cozy 70 degrees. The percolator in the kitchen starts bubbling; the back door opens to let out the dog. The TV set blinks on with the day's first newscast. After the news, comes the morning mail that is televised from correspondents who have dictated their messages into the computer network.

A futuristic fantasy? Perhaps. But while this mechanical scenario may still be years away, the basic technology is already in existence. Man is in the midst of a computer revolution that is transforming every facet of his society at an incomprehensible speed.

Not only will computers perform routine tasks with astonishing efficiency and speed, but supposedly, man's leisure time will be greatly increased and enriched, public education will assume more individualistic qualities, and medical care will be delivered with greater precision.

Not since the Industrial Revolution has man been overwhelmed by the forces of technology, or microtechnology as it is called.

What is the cause of this information revolution? The tiny, inexpensive silicon chip. Measuring only about a quarter of an inch square and quite flat, this so-called miracle chip has a calculating capability equal to that of a room-size computer of only 25 years ago.

Just as the Industrial Revolution took over an immense range of tasks from man's muscles and

enormously expanded productivity, so the microcomputer is rapidly assuming huge burdens of drudgery from the human brain and thereby, expanding the mind's capacities in ways that man has only begun to grasp. With the chip, amazing feats of memory and execution become possible in everything from automobile engines to universities and hospitals, from farms to banks and corporate offices, and from outer space to a baby's nursery.

However, human dependency on computers has already become irreversible and in that dependence, resides a frightening vulnerability. "Today, if computers were living things and there would be a plague that would kill off all computers, the entire government and economic backing processes would be in total chaos. No government could operate," says Dr. Guido Dobbert, professor of sociology, anthropology and social work at YSU.

What have we to fear from computers besides dependency? For the common people Dr. Eugene S. Santos, an expert in computer theory and professor of mathematical and computer sciences at YSU, believes that the invasion of privacy is the biggest fear "because of all the data banks around." He adds, "there is no perfect security system. No matter how secure you think your system is, there always is someone more clever that can crack the code."

This computerized privacy invasion is becoming a serious problem that our legal authorities are almost powerless to counteract. Some 3.9 billion records on individuals are now stored in the personal data systems of 97 federal agencies,

according to reports filed under the U.S. Privacy Act of 1974. Most of these records are available at the touch of a button, and in combination with records of other agencies can produce a full picture of the financial, medical, political and personal life of almost any American.

Dobbert observes that what possibly hurts the Soviet Union's computer efficiency is that they are so backward in the use of computers. "They are trying to buy our computer technology." The artificial intelligence was frowned upon by the communist ideology, therefore, Russian scientists had no government support. Actually, they had government disapproval and because of this, the Russians are five to ten years behind the USA. And with computers, "that's light years," Dobbert added.

Nonetheless, computer technology is ever-advancing, regardless of man's fears. Says Isaac Asimov, the science-fiction author, "We are reaching the stage where the problems that we must solve are going to be insoluble without computers. I don't fear computers. I fear the lack of them."

Whether the computer has a humanizing or dehumanizing effect on man is totally up to man himself, according to Dobbert. "A computer can be stifling in so far as a certain task can be programmed into a computer and people then get comfortable. They use the same thing without being innovative, and eventually they become slave to it. On the other hand, if people master the technology, then they can become very imaginative with it, and they can make it do whatever

(Cont. on page 11)

## YSU appoints 20 additional graduate assistantships

Dr. Leon Rand, dean of graduate studies and research, Youngstown State University, has announced the appointment of 20 additional graduate assistantships for the 1978-79 academic year.

The students and the departments they will serve are as follows:

Department of Biological Sciences-Joyce Snyder, 238 Boardman Blvd., Boardman.

Department of Chemistry-Pom P. Israngkun, 22 Illinois Ave., Youngstown, and Michael T. Bell, R.D. No. 1 Box 140, Burghill, O.

Department of Criminal Justice-Steven E. Votaw, 354 W.

Tenth St., Salem and Linda Moore, 1198 Will-o-Wood, Hubbard.

Department of Elementary Education-Dora Bailey, 8436 Four Seasons Trail, Koinonia and Rosemarie Eckman, 48 W. Wood Street, Lowellville.

Department of English-Jon Katz, 27 Warner Rd., Hubbard Elizabeth Pentin, 238 Hazelwood Ave. Pittsburgh, Pa. and Darnetta E. Bell, 1339 East 86th Street, Cleveland, Ohio.

Department of Management-Donald C. Skiff, 1614 Fountain Square, Austintown and Mary A. Farragher, 2452 Amberly, Youngstown

Department of Mechanical

Engineering - Hassan Sharifi-Niknafs, 7053 West Boulevard, Boardman and Kaushik Mansinh Chaudhary, 209 Park Ave., Youngstown

Department of Secondary Education - Andrew Jacobson, 911 Stambaugh Ave., Sharon, Pa. and Barbara J. Heimann, 5261 Sampson Dr., Girard.

Department of Special Education - Diana Stirbems, 519 N. Brockway, Youngstown.

Department of Guidance and Counseling - Cheryl A. Serrino, 274 Third St., Austintown, O. Marilyn Samuels, 1012 Old Harbour Pl., Youngstown and Carol A. Nicosia, 4221 Pembroke, Austintown.

## 'Assertiveness' is theme of managerial workshop

Youngstown, O. - A one day workshop on "assertiveness training" is set for Saturday, October 21, 9 a.m. - 5:30 p.m. on the campus of Youngstown State University.

Offered by the YSU department of continuing education, the workshop is designed for managers and supervisors in all work settings and will strive to improve teamwork and efficiency.

Skills to be taught in the workshop include: how to reduce defensive reactions in others; how to make negative statements without putting others down and

how to accept criticism without giving up your own convictions.

Leaders of the workshop will be Joan Enken and Kathy Chaffee, who have conducted a series of assertive training seminars at the Youngstown

Mental Health Center and at YSU. Registration fee is \$67, which includes workshop participation, materials and coffee breaks. For more information, contact the YSU department of continuing education's professional development programs division, (216) 742-3358.

## Residents will vote on council issue

by Stephen R. McClure,  
YSU News Bureau

Youngstown voters are taking note of the Nov. 7 general election date, but there's another upcoming election whose supporters say is just as important to the community, an election of representatives to a 20-member Teacher Corps Community Council.

Teacher Corps is a federally funded program which has been operating locally since 1974. It was created by the U.S. Congress in 1965 in an effort to strengthen educational opportunities available to students in areas having concentrations of low income families and minorities.

The Council will be a partner with the Youngstown Public School System and YSU in the operation of one of Ohio's seven Teacher Corps projects.

For many school districts, Teacher Corps has been a means of strengthening ties with the community by providing opportunities for parents and other residents to participate in school activities and decision making.

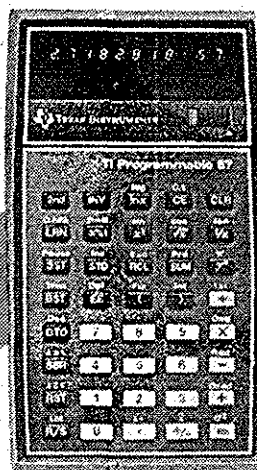

The newest program of the Youngstown-based Teacher Corps emphasizes multicultural/bilingual education, reading, personalized/individualized instruction, and career awareness. Schools participating in the project are East High School, Lincoln Junior High, Mary Haddow Elementary and Roosevelt Elementary.

Teacher Corps staff say the community council's slate of candidates will consist of student's parents, non-parents, senior citizens and representatives from the community-at-large.

Election ballots will be mailed to area residents the third week of Oct. to be returned by Oct. 27. Election results will be made public as soon as the vote is certified. From that point on, the elected council will establish a set of by-laws and will serve as the community component of the Teacher Corps Project.

Let a TI calculator help you make more efficient use of your time. This semester... and for years to come.

## It's up to you

A long-standing complaint often made by students at YSU is that big-name concerts are never presented on campus. Judging by the rather paltry attendance (2800) at the Dave Mason concert Sunday night, this complaint seems rather farcical.

Dave Mason is a big name concert attraction. As well as being a recent commercial success, he enjoys a reputation as having been part of a highly popular group, Traffic, from the sixties. His popularity is borne out by the fact that he sold out a concert at Blossom Music Center in Cuyahoga Falls this summer, no easy feat. Despite all of this, he was virtually ignored by the students at YSU.

Do the members of the student body want name attractions, or is it more satisfying to them to complain?

There are two concerts of note upcoming on campus this fall - Alex Bevan and Stephen Stills. Bevan is a performer who was extremely popular last year when he played a mini-concert at YSU. Stills, of course, is a member of Crosby, Stills, and Nash. The way ticket sales go for these two events could well determine the future of good concerts at YSU.

The choice is a clear one: Either support the future rock concerts at YSU, or take in the disco scene on American Bandstand. It's up to you.

## Letters to the Editor

To the editor of the Jambar:

Heaven forbid me to be the one to cause trouble this early in the year, however, I believe some clarifications, by the administration, are in order.

First, and most noticeable, our General Fee has skyrocketed from thirty-five dollars to fifty-five dollars per quarter. Why was the

ante upped? It is my understanding that ten dollars will be allotted to the new stadium, a project which was to cost the students nothing! Make no mistake, I am not against the stadium, however, I am against falsification of facts, which I feel is the case here.

Our real problems stem from (Cont. on page 9)

# reporter's insight...

## Proposition 13 reduces citizens' tax load, also causes decrease in public services

by Jeff Gallant

Recently, a constitutional amendment was passed in California entitled Proposition 13, designed to reduce property taxes, which people wanted. However, Proposition 13 reduced government services, a result people did not quite expect.

Citizens of the United States like to complain of government waste. Also the size of government and its priorities, not to mention the effectiveness of government. The result in California was a tax-payer's revolt, drastically cutting property taxes.

However, in California, the average middle-class people are not the ones to be helped the most by Proposition 13, instead Big Business will be helped the most.

Let's assume that I am a home owner, and assume that on my \$50,000 house I pay 10 percent a year in taxes. That's \$5,000 a year in taxes. Now let's assume that I own a small corporation that has some \$500,000 worth of property. That's \$50,000 a year in property taxes.

If taxes were cut to 5 percent, I, as a home owner would pay \$2,500 in taxes, saving \$2,500 a year. Now as a small corporation owner, I would pay \$25,000 a year, saving \$25,000 a year in taxes. Guess who makes out the most?

Now that Big Business has gotten itself a nice tax break and is saving more money than the average citizen, the average citizen has to put up with reduced government services. Libraries

now have to reduce their hours, police and fire departments must layoff men and women, schools must layoff teachers. Big Business is, however, unaffected by these cutbacks.

On the other hand, the person affected the most by these cutbacks is the person too poor to own property. He does not gain any benefit from cut property taxes because he does not pay property taxes. If he rents, his landlord is the one saving money. In addition, social services he benefits from have been cut. With less money available for welfare, ADI and other services, fewer of these services will be available to fewer people. What Proposition 13 has done, accomplished in effect, is to help Big Business, those with money.

## Questions facts in library fire, believes arson is logical answer

by Lyndie Votaw

Maybe I've been watching too much of Columbo lately, but there are certain facts about the public library fire, described on the front page, which just don't settle in my mind. By examining them, the only conclusion I can draw is that if there was an ar-

sonist, his motives did not lie primarily in destruction.

I have drawn this conclusion because the fire was started in the one room which could probably cause less damage than any other in case of fire. The storage room was located on the sixth floor, the highest in the building. Fire moves up, not down, so this would prevent the blaze from spreading quickly and easily. The ventilation in the storage room was very poor, so confining the fire was not difficult. Also, the main value of a library lies in its books, magazines, and newspapers. They are expensive, and often irreplaceable. The storage room was filled, essentially, with unused, unimportant materials and debris. The fire, even had it grown more than it did, would have been far removed from books and periodicals, as the sixth floor shelves were almost totally void. It seems more logical, then, if one wanted to destroy a library, to begin the blaze in an open space on the first floor.

It would have also been more convenient to begin the blaze on the first floor. The way things stand now, the arsonist, it appears, would have had to enter the library, climb all the way to the sixth floor, find the storage room, set four fires, climb all the way down, and exit through the basement.

This brings up another point. To do this, the arsonist showed not only great intent, but a tremendous knowledge of the library's lay-out. The storage room was in an extremely inconvenient area. I visit the library often, and after the fire, I could not

find the room without assistance. I contend that most visitors, no matter how frequent or observant, would have the same problem - especially in the dark. The only advantage I can see in setting fire to the room chosen, is that a fire-prevention sprinkling system, which is in operation throughout the library, does not extend to the storage room. And anyone choosing the room for that purpose would have to have a full understanding of the workings of the library. This fire was obviously not the work of vandals. They would have probably overturned bookshelves and looted for library fines.

The fact that someone would go to as much work as arson requires indicates to me that he could have also started his fire in a more effective location, if destruction was his motive. No, I don't think the arsonist failed at all, but rather succeeded. I think his goals were obvious: to scare, to threaten, to damage, to revenge...but not to destroy.

When I brought up these points with Rocky Russo, Youngstown fire chief, he said, "Those are valid points. And they emphasize the question I've been asking myself since it happened. If this is arson, what's the motive?"

# Student Council discusses parking at first meeting of the school year campus shorts...

Parking problems were discussed, and five new members were added to the Academic Grievance Committee in the first meeting of Student Council yesterday at 3:30 p.m.

Mario Massaro, filled in for chairman John Carano, who is in the hospital.

Mario welcomed new members Sharon Saadey, Arts and Sciences and Bill Welsh, CAST, who have taken over the duties of graduating members.

A motion was passed to add five new members to the Academic Grievance Committee. They were: Paul Suddes, Mark Morgan, Richard Barnett, Doris Sankovich and Bob Wasko. The high turnover rate of members on the senate was also discussed. Assistant Dean of Student Affairs, David Bertleson noted that

the senate was unable to get a quorum of three students in the meetings this summer.

In addition, Council asked students interested in joining a committee to get an application in the Student Government Offices.

In other Council action, President of Student Government, Tony Koury, called a meeting for all secretaries of student organizations for Tuesday, Oct. 4 at 2 p.m. and Thursday, Oct. 5 at 4 p.m.

Koury also reported on the parking situation and added that Neil Humphrey, vice president of financial affairs said that, as of Monday, Sept. 25, there were 4,725 parking spaces available for student parking and only 4,574 were filled. This is not including the Republic Steel Lot. This

is less than was reported in the Jambar last week.

It was suggested that the parking attendants find a way of communicating to let students know where to find available parking spaces.

The Vice President of Student Government, Dave Bozanich noted that the voter registration booth in Kilcawley signed 55 people up and that his office was open to anyone who has yet to register. He added that anyone who would like to vote in the Nov. election must be registered by Oct. 7, 1978.

The L.E.T.S. organization has made a plea for volunteers to aid handicapped students get around campus during the day. Anyone interested is urged to inquire at the Developmental Education Department.

## Child Development Laboratory

YSU's department of home economics announces the fall quarter opening of a special "Child Development Laboratory" for pre-school students, 3-5 years old. The program will be offered on Wednesdays and Fridays, 9:15-11:45 a.m. from Oct. 11 - Nov. 29. It will provide pre-schoolers with a curriculum including group learning experiences, art, music, science and social skills. Registration fee for the 14 scheduled sessions is \$25. For further information on registration procedures, contact the YSU department of home economics, (216) 742-3344.

## Sigma Chi

YSU's Sigma Chi fraternity is the recipient of the "Peterson Significant Chapter Award," the highest award presented by the fraternity's national chapter. It is named after Sigma Chi Foundation Chairman and former Grand Consul J. Dwight Peterson. The Award, based on the 1977-78 academic year, is given for outstanding achievement in membership, scholarship persistency in graduation, campus activities and leadership in addition to public, campus and community relations. With the award came a check for \$50, earmarked for student counseling. The money was presented to the University by YSU Sigma Chi president Jeff Johnson, and past president Frank DiPiero.

## 40 groups featured for students' week

by Becky Turocy

The Student Organization Fair proved to be the highlight of New Students' Week due to the participation of almost 40 campus organizations Wednesday.

Representatives from each club were on hand to answer questions relating to membership and to supply general information to interested students.

Among the fraternities participating were Sigma Chi, Phi Kappa Tau, Theta Chi, Sigma Phi Epsilon, Phi Sigma Kappa, Nu Sigma Tau, E Alpha Epsilon and Alpha Phi Alpha.

Sororities included in the fair were Zeta Tau Alpha, Delta Zeta, Phi Mu, Alpha Phi Sigma, Alpha Epsilon Rho, Alpha Mu, Sigma Sigma Sigma, Omicron Delta Epsilon and Alpha Omicron Pi.

Organizations appealing to students majoring in specialized fields were Alpha Kappa Psi, Pro Musica, the YSU History Club, the YSU Geography Club, the American Society of Certified Engineering Technicians, and Les Bon Vivants.

Campus groups represented at the Fair were the Baptist Student Union, Student Government, the Major Events Committee and Student Democrats.

Other organizations present at the Fair included the Pershing Rifles, the Young Worker's Liberation League, the Newman Student Organization, Circle K, Liberation for the Equality Toward Students, NAACP, the Apostolic Christian Fellowship and the Cooperative Campus Ministry.

Children who once lived months are now living years. Many of them are growing up. Some are already adults, living normal lives. Did you ever wonder what the American Cancer Society did with the money you gave us? Well, some of it went to leukemia research. And, if we had more, we could do more.

# entertainment... Mason and Taylor in concert

Jan Arcari

Only you know and I know who went to the concert that Livingston Taylor opened, because there was no advance publicity that Taylor would be the opening act of the Dave Mason concert.

Taylor opened the evening with an hour, 10 song set that feature such notable Taylor songs as "Somewhere over the Rainbow" and "Caroline Home".

Taylor and his group dished out a hand clapping foot stomping feeling throughout their performance.

An interview with Taylor and his band will appear on Friday's entertainment page.

Jan Arcari

Jan Arcari

DAVE MASON performed some of his favorites and many of his songs off his newer album "Mariposa de Ora" to a crowd of 2800 at Beeghly Sunday night.

Livingston Taylor performed "Caroline Home" as the opening cut of the Mason concert.

### Organizational Meeting

The Anthropology Colloquium will hold an organizational meeting for the upcoming year tonight at 7:00 p.m. The meeting will be held in Arts & Sciences, Room 444. Membership is open to all YSU students, and new members are welcome. Those who are interested, but cannot attend, should contact Dan Schultz, at 757-1349.

### OEA

(Cont. from page 1)

has been in effect for one full year now. Somewhere near the end of this academic year, (April or May), the part of the agreement which deals with salaries will come open for re-negotiation, but only the part that deals with salaries. Therefore, you can expect to be hearing quite a bit from the YSU OEA as this year progresses, concerning what the faculty believes must be done to keep salaries at an appropriate level in our expanding economy. Each of the last two years our salaries went up five percent while the cost of living was increasing more on the order of ten percent. We hope to recover that purchasing power."

As for his hopes for his new position, Robinson added, "One of my personal goals for the presidency of the association will be to enhance the image of the association both in university and in the community as a responsible, productive organization."

### Tantilizing excerpts are quoted from books for astute students

by Guz Scullin

"Man is basically a two legged beast; as is woman," excerpt from the soon to be released *Two-Legged Beasts* (Frawn Publishing, \$12.95). This fall many books are going to be on sale that the astute college student should be interested in. How about taking a look at some of the more outstanding selections that will be available to you soon-what do you say? No, you don't want to read about it? OK, fine by me, stop right here, go on, lay down the paper, don't read anymore. I'm going to put your name in here and make fun of you. Yeah, that's right, I'm going to make fun of you. Oh, so now you want to read this? Changed your mind real quick, eh?

Since there are many books to list, I will simply give you excerpts. And titles, fair enough?

"He demanded her supply," excerpt from *The Economics of Sex*.

"Test one, test two. Check, check, one two, one two-Bob, is this damn thing on?" from *The White House Tapes*.

"Mark Hamill stood in front of the camera and pretended he was someone else, he was acting, which can be a very important role for any actor in any movie"

from the *Making of Star Wars*.

"See Larry, Larry is a manager of a big store. See Larry manage the people who work for him. See Larry use land, labor, capital for the betterment of his business." From *A Beginner's Guide to Management*.

"Rex Queasy was one of the best private eyes in the business. It was a warm day in the big city, the streets were bustling with people. Buildings stood erect, hot dog vendors complained of the "Great Mustard Strike", and little old men looked to the sky pondering the operation of certain helicopters. It was too hot, Rex thought to himself as he got out of the oven which was in one of the four corners of his cramped office. Rex walked to his desk, and sat in his chair. Suddenly, there was a pounding at his door. Rex stood up, walked to the door, and opened it. The body of a dead man fell to Rex's feet. Down the hall Rex spied two men dressed in black fur coats running for the stairs. Without a second thought, Rex pursued anxiously. Halfway down the hall, Rex received second thoughts, and decided he might be heading into danger. Rex stopped, turned, and walked back to his office. It was a hot day, Rex thought as he crawled back into his oven." Excerpt from *The Rex Queasy Files*.

Excerpt from *The Rex Queasy Files*.

"Crime is a plague which sweeps this nation. It blackens and bleakens the beauty which bustles forth beaming from this big, bold, and blessed land. Crime is bad." Excerpt from *The Anvil And The Weasel*.

"Woke up, ate breakfast, went to work, came home, ate dinner, watched some television (in color!), went to bed, slept." From *Diary of a Boring Person*, Boring Publications, Inc.

"The two made ecstatic and erotic, electric and elastic love. The silence enveloped the room which served as their den of decadency. The only sound to be heard was the marching band on the street playing "Tie A Yellow Ribbon", and the sound of a lone 747 flying into the nearby airport, plus the sounds of the thirteen children next door playing "Red Rover, Red Rover". Quincy offered Cindy a cigarette, she refused. Cindy offered Quincy a bobby pin, he accepted. Quincy offered Cindy a stuffed poodle, she accepted. Cindy offered Quincy a coconut macaroon cookie, he smiled as he ate it. Quincy offered Cindy a bust of Alexander Hamilton, she...." From *Ominous Offerings*.

### Soccer Game

by Bill Snier

The YSU soccer team opened their 1978 season on the road with a 4-2 loss to Alliance College.

YSU drew first blood in the opening period on a goal by sophomore Craig Peck. The goal was made possible off of an assist by sophomore Bill Oakley, who kicked from the corner to Craig Peck who then rammed it home. Alliance then roared back to score the next three goals to give the home team a 3-1 advantage with only a minute left in the half.

Peck then rammed home his second goal, going the length of the field for the tally.

The Alliance victory was the home team's third in a row which increased their record to 3-3 on the year. The Penguins suffered their initial loss. YSU's next game will be Wednesday, Oct. 4 at Malone College. The Penguins' home opener will be on Oct. 18 at Roosevelt Park against Mercyhurst. The Penguins are coached by George Hunter.

## Students express varied opinions about parking situation at YSU

by Diana Cicchillo

A recent student poll indicates that parking is definitely inconvenient at YSU. 20 students were randomly selected to participate in the survey which asked the following questions: 1) Have you purchased a sticker? 2) Has parking been convenient for you? (and 3) What problems, if any, have you been confronted with?

All students interviewed had bought a parking sticker although many felt that it wasn't worth the increase from \$15 to \$20 per quarter. Jay Richards stated that the increase was unjust and said, "We are paying more for less parking spots." Of those interviewed who had attended YSU last fall, most agreed that the

parking situation is much worse this fall.

Leaving for school extra early and waiting in lines which often results in missing classes were just a few of the inconveniences expressed by students. Pam Rankin resorted to illegal parking to avoid missing class when the YSU lots were full and received a ticket. What are you to do when lots are full? The parking officials suggest parking in the Republic Steel lot. Not many of the participants in the survey were willing to accept the Republic Steel lot as an alternative. Sherry Ault, junior, Arts & Sciences, hasn't had any problems and suggests that the difficulty arises from the fact that "everyone wants the most convenient spots."

"Terrible" is how Paul Shiller,

junior, Engineering, describes the parking and suggests that a balance between stickers sold and spaces available be established. Walt Malys, sophomore, CAST, also feels that a certain number of stickers should be sold and no more.

Eric Cahill, sophomore, Engineering, is considering checking into the monthly parking cost of the downtown parking deck as a possibility for next quarter. The majority of students emphasized the importance of arriving at school early, preferably before 8:00 a.m., to get a parking space. Other responses from those interviewed were: "It's OK for me," "I park blocks away and don't like walking," and "College parking is always bad and probably always will be."

#### Applications Due

Are you a Junior or Senior who is a full time student and academically in good standing? Then you are half way there to meet the requirements of a 1978 Homecoming King/Queen Candidate.

Applications to be nominated for Homecoming King/Queen Court will be available in the Student Activities Office, second floor, Kilcawley Center at 8 a.m. Mon., Oct 2. All applications must be returned to the Student Activities Office before 3 p.m. Wed., Oct. 4. Late applications will be considered.

### Letters

(Cont. from page 4)  
the policy of YSU. Within this University exists what can be called a non-informance policy. This states that the University reserves the right to change a fee at anytime without informing the students. This is an unfair policy and it's time that it's changed, this is the root of many problems between students and the administration.

The other clarification which I deem necessary is the raise in parking from fifteen dollars to twenty dollars in one year. I suppose this additional charge is to cover additional operating costs. If that be the case then I hope that I am not able to find any pot holes in any of our lots!

I am urging all new and old students to support the removal of the non-informance policy of YSU and demand a public clarification for these increased fees, it is your right as a student of this University!

Richard T. Curry

# Penguins remain unbeaten: rooters undaunted by rain

by Bill Snier

The electricity of an expectant crowd was matched by an electrical storm at Fitch Stadium Saturday night as the YSU Penguins sloshed and slid their way to a 49-12 victory over Saginaw Valley State College.

The victory, the Penguin's fourth in a row this year and their seventh straight over the past two seasons, may move the Penguins up in the national rankings coupled with Akron's victory over Eastern Illinois. Last week, the Penguins were ranked sixth and Eastern Illinois, fourth in the Division II poll.

A torrential rainstorm plagued play on both sides throughout the game with some lightening actually touching down very near the stadium. The rain held down a very large crowd of Penguin rooters which, at kickoff was very near capacity with many more still awaiting outside, stuck in traffic jams. The lightening also caused a momentary blackout at the stadium with the storm finally causing the officials to suspend play for about forty minutes for the players' safety.

It was the Penguins defense that put the first points on the scoreboard. YSU took the opening kickoff and was forced to punt. With a second down on their own 13-yard line, Saginaw Valley quarterback Steve Zott elected to go to the air. But a strong Penguin pass rush, led by Defensive end Tom Harder, dropped Zott in the end zone for a safety, giving the Penguins a 2-0 advantage.

The Penguins increased their lead late in the first quarter on an eight yard scoring pass from quarterback Keith Snoddy to fullback Dwight Dumas. Chuck Haynali added the point to increase the Penguins' lead to 9-0.

The point-after by Haynali, by the way, gave the junior placekicker a new scholl record for point-after-touchdown (61) which broke the old record of sixty held by Dick Hartzell.

After the game delay, the Penguins came out with a little lightening of their own. On the first play following the delay, Snoddy pitched to Marschell Brumfield sweeping right end. But Brumfield slowed down and threw a pass back to the left to Snoddy, probably the quarterback's only reception of career, which picked up 28-yards. From there, it took Brumfield only two carries from the Saginaw seven to get into the end zone. With Haynali's point, YSU increased their lead at halftime to 16-0.

The second half was more of the same as the YSU tough ground game ran right through the Saginaw Valley defense. Brumfield drove the Penguins on an 89-yard drive which was climaxed by a 14-yard pass from Snoddy to tight end Emmett King, increasing the YSU lead to 22-0.

Realizing that they were going no where on the ground against the tough Penguin defense, Saginaw quarterback Steve Zott went to the air. Starting from his own 19-yard line after YSU fumbled a field goal attempt, Zott only used four passes to drive the length of the field to reduce the Penguin lead to 22-6. The big play in the drive was a 66-yard pass from Zott to Mark Guimond with Kevin Statzer making a saving tackle.

After a YSU drive stalled, Haynali punted but Melvin Mathews fumbled for Saginaw at their own 40 and Statzer recovered. The Penguins then took only three plays to get into the end zone with Brumfield scoring from six yards out to increase the Penguins

lead to 30-6.

A penalty on a punt by Saginaw, gave the Penguins the ball again on their next possession at the Saginaw 27. Two carries by Dumas and a personal foul against the Cardinals gave the Penguins a commanding 36-6 lead. But Haynali's streak of 42 straight extra points ended as the Cardinals forced him to miss the point-after.

The passing of Steve Zott gave the Cardinals their second touchdown as Zott completed six passes to move to the Penguins one. John Waters dove in for the score to make it 36-12.

On Saginaw's next possessions, the Cardinals drove to the YSU nine-yard line. But Pat Durina stepped in front of Zott's intended receiver and ran 95 yards to paydirt with the interception to increase the lead to 43-12.

The one-sidedness of the game is best reflected by the overall statistics. YSU piled up 439 yards total offense to only 208 for Saginaw Valley. Most of the Cardinals offense, by the way, came against the second-team defense.

Individually for the Penguins, Brumfield had his usual fine game. The Senior Penguin game-breaker raced for 145 yards on 28 carries. Keith Snoddy also put in a fine performance, completing 7 of 12 for 110 yards and three touchdowns. Emmett King had one of his finest days on the receiving end as the senior tight end hauled in four aerials for 56 yards and two TDs.

Next on the slate for YSU is a date with number four ranked Eastern Illinois, who is probably still smarting after Saturday's loss to Akron. A report on the current Mid-Continent Conference race and a look at Eastern Illinois will appear in Friday's

## Open line

*Editor's note: Open Line questions are written by YSU students. The answers are provided by the medical and counseling staff of Planned Parenthood of Mahoning Valley, Inc.*

### Question

I'm a guy, 25, and my girl is 23. She's my problem. We argue all the time. I love her and want to marry her, but she is cool to the idea. I'll admit that one of the reasons I want to marry her is because she is a virgin. I've spent a lot of time trying to get her down the aisle. Do you think I should keep trying to get her to see things my way, or should I just find someone else?

### Answer

Virginity is a state of mind. Perhaps you should examine your feelings since they seem to be so strong. Ask yourself honestly, why it is so important that the woman you marry must be virginal. Once this priority is out of the way, see if this woman is still so important to you.

### Question

I am 18, and this is my first year in college. My boyfriend is also a freshman. We have been going together for two years, but have not yet made love. Now that we are both in college, he thinks we ought to be mature enough to start having sex. My question is: What kind of birth control should we use?

### Answer

It takes two to tango! Perhaps you are not yet ready to enter a sexual relationship. Being in college does not produce instant maturity. Growing is a process which takes time. If your boyfriend is really understanding, he will respect your feelings. Your feelings are very valid, and if you are not yet ready to be sexual, you should not be forced. Discuss your feelings openly with your boyfriend. Remember - it's still OK to say no.

### Question

I am 18 years old, and am seeing this terrific guy who is 28. He seems to have no direction in life, however. He is a former Seminarian, but now he works part-time as a mechanic. He is constantly high, as are his friends. How can I stop his wandering through life? I care about him, but I have emotional needs too!

### Answer

Perhaps he is handling all he can for right now. He may be confused about his role now that he is no longer in the Seminary, and his use of drugs may be his crutch for escape. It seems that he needs a lot of room so he can find some direction to his life. He has problems and needs time to work them out. Probably the best thing you could do for him, and for yourself, would be to give him the room he needs.

*Students wishing to write to Open Line may address their letters to Open Line, c/o Jambar, Raven Hall, Wick Ave., 44503. Correspondence may be sent via intra-university mail. Students wishing to phone their inquiries may call Planned Parenthood at 746-5641. For personal replies, a name and address must be given.*

## Computers

(Cont. from Page 2)  
they want it to. Thus, the effects of the technology are totally dependent on the authority that runs the technology."

Santos envisions the computer as a "mind amplifier" capable of enriching man's intelligence. However, skeptics wonder if this enrichment and amplification will ever eventually control man. How omnipotent can a computer become?

"There are two schools of thought on how powerful the computer is," explains Dr. Santos. "There are mathematical functions that the computer cannot compute, nor will it ever. We can keep adding to its memory but it is still finite and some of these functions require bigger and big-

tos. "One school of thought claims that it is actually limitless; it can do anything - the other school of thought thinks that it is just an idiot."

A member of the latter school of thought, Dr. Santos finds that ger memories. This is an inherent limitation of the computer."

Improvement on the theoretical basis of the computer is impossible, according to Santos. "When you improve on it you are just improving the technology part of it, the principle of it is still the same. It has been the same since 1930."

From the 1930 concept to the miracle chip of the seventies, the mechanical-brain child of man has no doubt begun and will continue to change the way man lives.
