

# Cagers Vie For 17th Tomorrow

Dom Rosselli's cagers are set for their 17th victory attempt tomorrow against Steubenville College. The game is scheduled for 2 p.m. at Steubenville.

The Youngstown State University basketball team will bid for its record breaking 17th consecutive victory at 2 p.m. tomorrow against Steubenville College at the Steubenville Community Arena.

The Penguin cagers, Ohio's only undefeated team and ranked 4th nationally in the AP small college poll, tied the existing mark of sixteen straight wins set by the 1963-64 cage squad by defeating Geneva College 95-57 on Wednesday night.

Coach Dom Rosselli came nearer to the elite "400 victory club" as he coached the Penguins to their 398th victory under his helm.

Approximately 2500 fans packed Austintown Field House to watch the

cagers completely control all aspects of the game. Bill Johnson's and Chuck Montgomery's backcourt play and Will Teague's and Ron Smith's rebounding paved the way for the easy victory. Coincidentally, Youngstown's 16th straight win in 1964 also came at the hands of Geneva.

Billy Johnson led the five Youngstown players that scored in double figures in the easy win with 30 points. Ron Smith scored 21, Chuck Montgomery 13, Bob Patton and Wayne Davis 10 each in the game that was completely dominated by the Penguins.

Following the fray at Steubenville the Penguins will return home on Wednesday evening to face their perennial rivals, the Gannon Knights. Gannon is also nationally ranked in both wire service polls.

Incinerators Run At Night—

### YSU Not In Air Report

A city investigation that cited major polluters in the Youngstown area did not consider the University in its study. It was reported last week that the study disclosed facts that may prompt strict state anti-pollution controls in Youngstown and consequently affect the University's thousands of commuters.

Walter Rauh, city smoke engineer, stated yesterday he was not aware of any University owned pollution-making equipment. When informed that the

University owned and used three smoke-producing incinerators at night, Rauh responded that since city officials could not see the smoke the effects of its pollution could not be determined. Rauh added that "city officials would not be inclined to work at night to investigate such reports."

University incinerators are maintained in the Engineering Building, Elm Street School, and the Arts and Science Office Building. Mr. Raymond Orlando, director of the physical plant, said the incinerators are used each night usually between the hours of 12 midnight and 6 a.m. to burn paper.

Orlando disclosed that steps are now being taken to determine the volume of trash burned by the incinerators.

"Exhaust fumes from cars and parking on the University's unpaved lots add to air pollution," Rauh said.

At the Board of Trustees last Thursday, University officials indicated that plans for portable parking decks are continuing.

Dr. John J. Coffelt, vice president for administrative affairs, stated yesterday that consideration of the parking decks would not be affected by Rauh's pollution control report.

Rauh stated that a city ordinance prohibited charging for parking on unpaved lots. Further investigation revealed the ordinance passed last year prohibits charging parking fees on any unpaved lot, but is not retroactive and therefore does not affect University lots.

The University charges for parking on three unpaved student lots.

Orlando stated that the University as yet has not been approached by either city, county or state officials on pollution.

### Soci. Students In City Service Agencies

Through the Social Service courses offered in the university's sociology curriculum, 120 YSU students are now serving as service agency volunteers.

The Social Service courses, initiated by Dr. Virgil Smith, assistant professor of sociology, began Winter quarter, 1968 to "give students exposure to welfare agencies."

Agencies, such as the Volunteer Service Bureau, place students into various programs, such as Senior Citizens Service, Head Start, "Big Brother," and other city welfare programs.

Dr. Smith recently said in an interview, that "this concept might broaden throughout the whole college with the value that every liberal arts student must have exposure to city organizations and the community."

Since its beginning, the enrollment of the classes has steadily increased, so that at times there are not enough positions

for the students.

Four classes of Social Service 1 & 2 are offered this quarter with three hours credit under the Catalogue numbers 720,721.

### Attendance Cutbacks Won't Affect Concert

Struthers Field House attendance cutbacks have not stopped plans for a special Major Events concert, March 7.

Miss Grace Listorti, Major Events chairman, explained that the amount was expected to be three to four thousand dollars higher, but because of the low ticket sales during Winter Weekend, an extra \$3000 was removed from the Student Council fund.

The Winter Weekend concert cost approximately \$16,000 and ticket sales amounted only to about \$9000, she explained. The

remaining \$7000, which usually is paid by ticket sales had to be expended from the fund.

The balance of the Student Council fund for Major Events is \$25,000, to be split between the Special Concert - \$5000, and Spring Weekend - \$20,000.

**Ticket Sales Set**

A projected ticket sale of 10,000 is also included in the Major Events Committee budget.

Miss Listorti said that no groups have been contracted yet, but that the group will be one that the "students will be interested in seeing."

#### Neon Sign-Up

1969 Neon sign-up continues until February 6, John Moritz, editor, said yesterday. Price is \$1 for full-time students, \$6 for part-time and all faculty.

Moritz said the money should be paid at the Bursar's Office in Jones Hall.

Receipts should be taken to the Neon office, 3rd floor of East Hall.

Mailing address and name should be typed or clearly written on the back of the receipt.

For further information, call University ext. 477.

## Newman Features Prize Film-Maker

Richard Myers, independent film-maker, whose works have twice won first prizes at the Ann Arbor Film Festival, will feature three of his prize-winning films in an all day program at the Newman Center, Sunday, February 1.

A teacher of cinematography at Kent State University, Myers won his first critical acclaim with his film *First Time Here*, which, in the words of critic and author Pauline Kaul, was the "major discovery of 1964." *First Time Here* is a fantasy story. It deals with a journey through a "glittering-cardboard world" of a carnival exhibit which shows the results of an atomic bomb

blast on a mock city. In 1965, Myers reclaimed his success at the film festival with *Coronation*.

Myer's film *Akan* won him national prominence in 1969. Critic Roger Ebert called this full-featured film a "totally personal experience." "It is so personal," he said, "so embarrassingly honest at times, that it makes commercial 'personal' films like 'Easy Rider' seem evasive."

The program, open to the public, is sponsored by the Newman Club and was made possible with the assistance from the University Artists Lecture Series Committee.

Richard Myer, nationally acclaimed underground film maker will appear at the Gates of Eden Coffeehouse all day Sunday.

## SC Tutoring Program Is Successful

"In its year of existence the Student Council Tutoring Program has been successful in supplying tutors to students who needed help," said Charlene Carasi, Education Chairman of Student Council.

"The Program," Miss Carasi said, "was set up to act as an agent to pull students and tutors together. Student Council does not gain anything from this endeavor. All financial matters are settled between the tutor and the tutoree."

The tutoring program was designed in fall of 1968 by Mike D'Onofrio, secretary of finance for Student Government. Since its establishment the program has been pulling in possible tutors but receiving a smaller number of tutorees.

Miss Carasi feels that the unbalance is due to a lack of good publicity for the program which left the student body generally misinformed about the program's operations.

#### Tutor Matching

The matching of tutor with tutoree is one of the more important parts of the program. Miss Carasi explained that "many kids feel funny about asking for help. By having the tutoree go over the tutor applications and pick the person he wants himself, he has a chance to pick someone close to his needs, such as comparable course and teacher backgrounds."

At first she expected the program to be "weighted" in tutors from only one or two schools. But she explained that she has wide variety of tutors on file and can accommodate any student needing aid.

Potential tutors need a 2.5 overall average and an "A" or "B" in the subjects they wish to tutor. Applications are available in the Student Council Office, room 108 in Kileawley.

**INTERNATIONAL FLAVOR SPARKS PROGRAM**— Among the acts performing in the Fifth Annual Variety Show of the International Student Organization at Youngstown State University is this Philippine group shown during one of the final rehearsals for the program which is set for 8 p.m., Saturday, January 31, in Strouss Auditorium. Left to right are: Diane Nichols, Adrienne Gonzalis, Johann Gonzales, Ester Lopez and Leticia Espinosa, kneeling. The theme for this year's show is "Parade of Nations," featuring songs and dances from countries throughout the world. Chairman for the event is George Basto, YSU graduate student, with co-chairmen Linda Brewer and Uwe Haushalter.

## Bill Deadlock To Affect Vets

1,300 full-time veterans and an unknown number of part-time veterans attending YSU on the GI Bill will be greatly affected by a House-Senate deadlocked bill to increase monthly payments, Mr. Thomas Richards, veteran's advisor, said yesterday.

The deadlock is a result of disagreements over the exact amount of the increase. The House, in passing the measure last August 24, provided a \$165 monthly payment for the single full-time veteran. Full-time veteran eligibility at YSU is thirteen-quarter hours. The Senate, which acted October 23, raised this to \$190. On December 18, the House voted to increase its original figure by \$5 to \$170.

President Nixon, on the other hand, said the administration would support an increase only to \$147.

Marital status and the number of credit hours are the chief factors determining individual monthly benefits for veterans.

### Military Ball Candidates

Applications for Military Ball Queen can be obtained from the Dean of Women's office until February 6.

A candidate must have one year of school remaining as of June 1970 and can be approved by the Dean of Women's office to be eligible. The queen will be elected at the Pollock House at 8 p.m. February 15.

### Garcia To Speak

Dr. Alfonso L. Garcia, associate professor of foreign languages, will speak on "The Culture of the Other Americans" at the monthly meeting of Beta Pi chapter of Delta Kappa Gamma, tonight.

# Criminal Justice Program Ups Enrollment One-Third

The Criminal Justice department has increased its student enrollment by one third since revision last September.

Jack Foster, head of the department and editor of one of its textbooks, says that the program in corrections has been particularly successful because it offers the students a chance for placement in state, federal and local

agencies in this area. A special program this summer may enable some students to work in the Ohio state prisons.

For students majoring in the field the courses are designed to provide practical experience. For them the curriculum is twofold.

The first phase is based on observation. Students in their junior year are required to take a

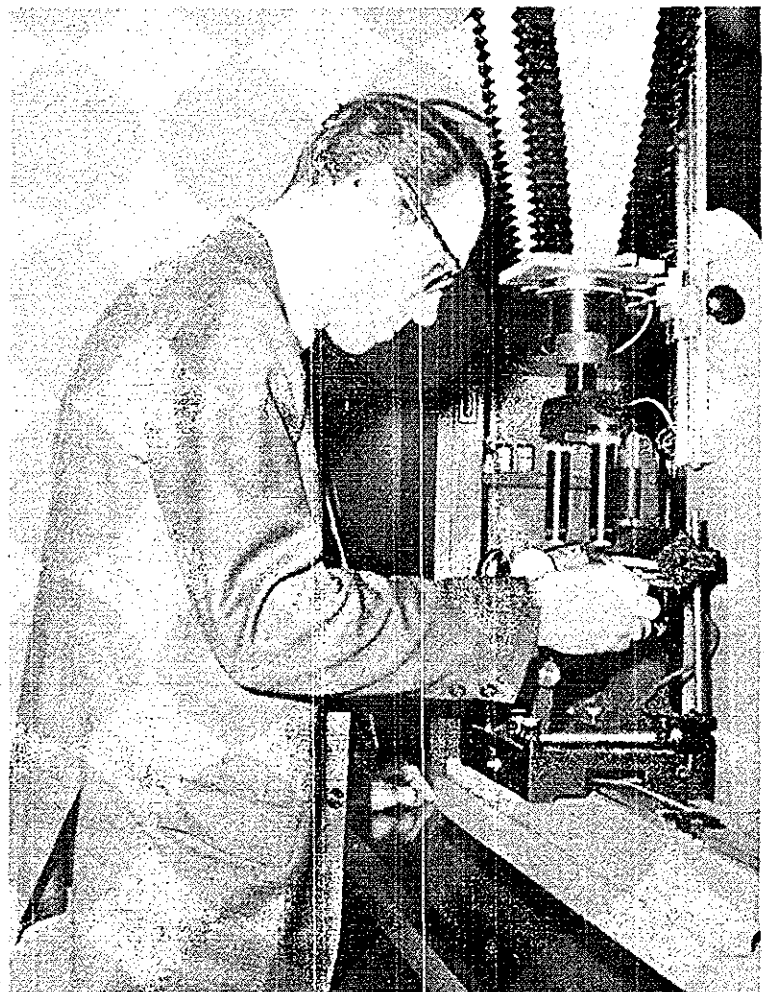

course in which observation in agencies is done one hour per week. They then attend a seminar to discuss their observations.

This observation and other required courses for the major lay the groundwork for the second phase of the program - participation. The student in his senior year is assigned enforcement cases with a particular agency and is required to follow them through the entire eleven weeks of the quarter.

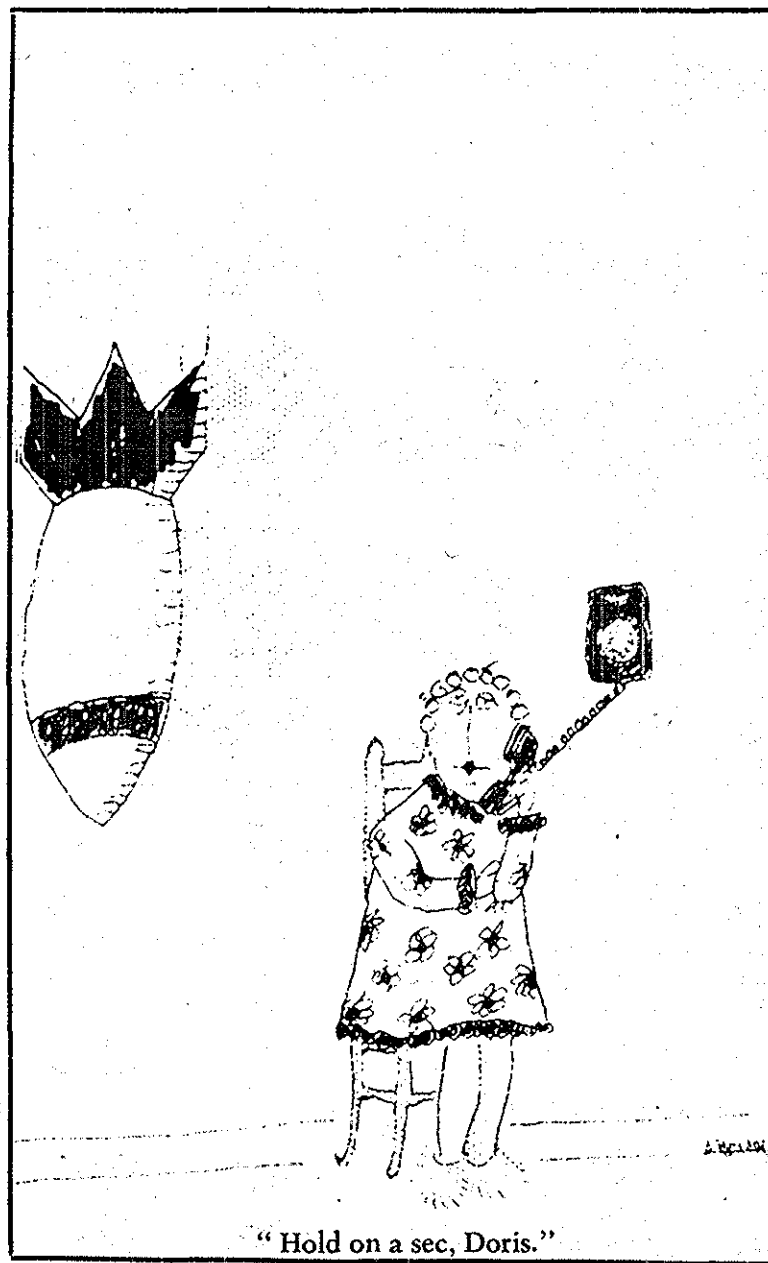

Another course in case management stresses interviewing and counseling. Mr. Foster expresses the hope that in the near future a close circuit television will be available so the students may participate in and observe simulated interviewing situations.

Each course is designed to go beyond classroom study. "You need to acquire certain skills" as well as a "body of knowledge" Mr. Foster says. The department of Criminal Justice aims to combine the two.

Because the department has changed so recently, students in the department of sociology and psychology were invited to look at the possibility of a combined major or minor. Presently, several students are majoring in criminal justice under schedules that have been altered to meet special needs.

Jack Foster, criminal justice department chairman, is shown here analyzing fingerprints on the department's fingerprint analysis machine.

Steven Hansen, a novice brother of the Society of St. Paul, is an artist for the Society's Alba House Communications in Canfield. The cartoon above is from the "All American" series which he has recently created. Hansen's work will appear periodically in the Jambor.

## Essay Contest Offers Maverick As Prize

Ohio's eighth Annual Traffic Safety Slogan-Essay Contest opens February 1 and runs through March 31, Highway Safety Director Warren G. Nelson announced today.

A 1970 safety-equipped Ford Maverick automobile and Ohio's No. 1 license plates will be the grand prize for the adult state winner. The juvenile (under 16) state winner will also receive a set of special numbered license plates and \$35 cash. Second and third place winners in this division will be awarded \$15 and \$10 respectively.

Rules for the contest are as follows: (1) Contest is open to all Ohio residents, of all ages. (2) No contestant may have a driver license under suspension. (3)

Contestant may not have had driver point conviction in the last 12 months. (4) All entries must show county of residence. (5) Entrants under 16 must give age and name of school. (6) Entries must include slogan and brief essay, and must be post-marked no later than midnight

Tuesday, March 31. (7) Decisions of contest judges are final. Official entry blanks may be obtained from all Ford dealerships, all members of Ohio Association of Insurance Agents, the Ohio Department of Highway Safety, and from deputy registrars.

## "Interest Test" Set For Test Center

The vocational "interest test," first given by YSU's Counseling Center last year, is offered now to students wishing to become more familiar with their vocational aptitudes and interests.

Test results are discussed directly with the student by Dr. George Letchworth, director of counseling, or one of the other four counselors at the Counseling Center.

Appointments to take the interest test can be made by either calling or stopping at Ford Hall, first floor.

## Newman To Hold Religious Experiment

A limited number of openings are available for the Newman *Weekend Experiment in Christian Living* to be held February 13-14-15.

Six cabins have been reserved in the Atwood Lake Lodge complex for the program, which is a radical departure from traditional religious "retreat" exercises.

The weekend is an ever-developing attempt to get people to open up to one another through shared religious experiences; it uses the best of many group dynamics techniques; discussion-in-depth, provocative films, improvisational theatrics, excursions to "Hidden America," and unashamedly emotional liturgy.

A wide variety of backgrounds, temperaments, and religious affiliations is being sought to insure the success of the

## Advertising Society Installs New Officers

The Society for Advancement has installed twelve new members. They are Anthony Audia, Robert Garzewski, Tony Germano, Natalie Lewis, Dick Mautz, Joyce McDonough, Norris Mealy, Peter Minestrella, Edward Walter, William Watson, William Thomas, and Frank Valenti. Mr. Ken Thompson, Director of Salaried Personnel at Packard Electric, spoke at the installation on college recruiting, starting salaries, and the responsibilities of a personnel director.

At Dana Hall--

# Faculty Chamber Music

The Youngstown State University Dana Concert Series will present "An Evening of Faculty Chamber Music," 8 p.m., Monday, February 2 in the Dana Recital Hall.

Opening the program of contemporary music is "Ten Variations for Violin Duo," composed by Dr. Mark F. Walker, professor of music in the YSU Dana School of Music, and featuring Dana faculty members Kathryn Walker and Elizabeth Jones.

"Improbabilities," a piece based on a poem by e.e. cummings and written by Charles Rullman, instructor of music at Dana, and will be performed by Rullman and Mrs. Jones, with YSU music students, Joan Jacobs, Marsha Rullman and David Zanghi.

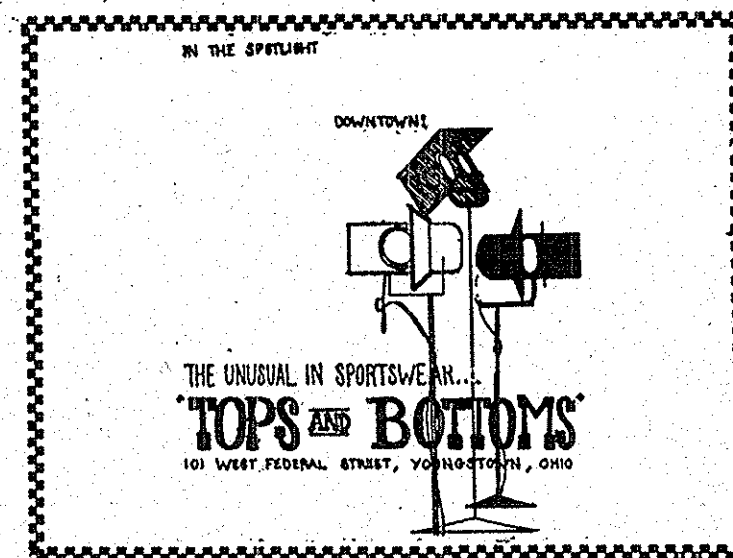

Another composition by Dr. Walker, "String Quartet," will be presented by Dana Faculty String Quartet, which includes Fred Rosenberg, assistant professor of music, Dr. William Conable, assistant professor of music, Mrs. Walker and Mrs. Jones. This same group will also perform "String Quartet in Four Parts," written by John Cage, the avant-garde composer who recently appeared on YSU cam-

pus with the Artist Lecture Series.

Concluding the program is another piece by Rullman entitled, "R. P. D. Opus, 21," which will be highlighted by the use of

a tape recorder and a slide projector. Walter Mayhall, instructor of music, will add the special photographic effects.

The program is free and open to the public.

### YSU Summer European Area Studies Program

'On my own, I couldn't have afforded to see as much.'

Jay Olmstead, a junior elementary education major, figures he couldn't have afforded to see as much of Europe on his own than he saw while participating in the European Area Studies Program. The 48 day, twenty city tour costs \$1,075. On his own, Jay figures he would have spent at least five hundred dollars more.

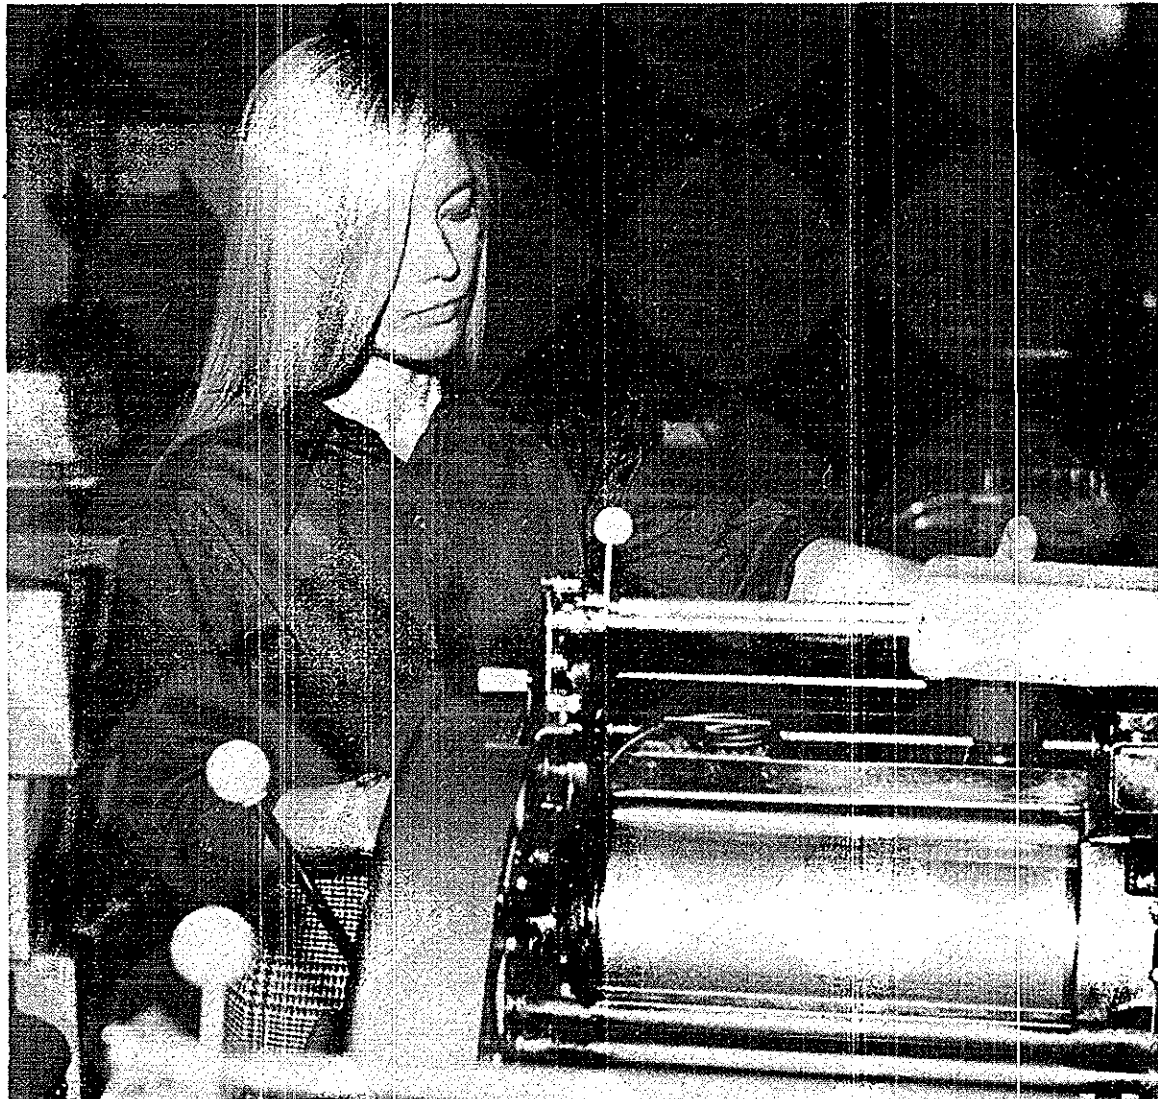

On his own, Jay would have returned with memories of a beautiful but expensive trip.

As an EASP participant, he returned with the same memories, saved maybe five hundred dollars, and gained nine hours of academic credit. The course is taught by Dr. Leon Laitman, geography, and Dr. Agnes Smith, history. Contact them soon for information.

### AIE Gets \$100

Student chapter of American Institute of Industrial Engineers has received a \$100 donation from its Youngstown Chapter.

## Should you drink beer straight from the bottle?

If you're on a blanket party or something, carrying along a glass is pretty clumsy. But when it's convenient, we think it's a shame not to use one. Keeping Budweiser inside the bottle or can is missing half the fun.

Those tiny bubbles getting organized at the top of your glass have a lot to do with *taste* and *aroma*. Most beers have carbonation pumped in mechanically. Not Budweiser. We go to a barrel

of trouble and expense to let Budweiser create its *own* bubbles with the *natural* carbonation of Beechwood Ageing. So you really can't blame us for wanting you to get it at its best, can you?

Just for fun, pour your next four or five bottles of Bud® into a glass. If you don't agree that the extra taste, clarity and aroma make a big difference, go back to the bottle.

We won't say another word.

### Budweiser is the King of Beers.

(But you know that.)

ANHEUSER-BUSCH, INC. • ST. LOUIS • NEWARK • LOS ANGELES • TAMPA • HOUSTON • COLUMBUS

# Art Head And Student Hold Two-Man Show

Jon Naberezny, art department chairman, and William Buzulence, graduate student in art, will begin a two-man show of their works at Butler Institute of American Art Sunday, February 1.

Naberezny's paintings are recent works done during the past two years and illustrate a change of style from his previous collage and abstract expressionism. These new works are examples of the new trend of optic painting which have been a very important phase of contemporary ideas stemming from a better understanding of science and op-

tics for the past twenty years.

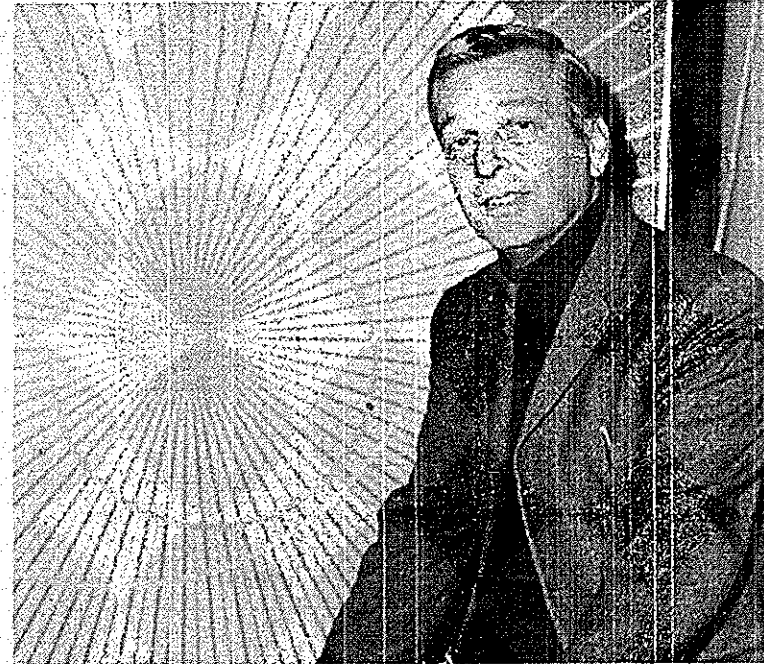

Naberezny elects to work in the area which color itself is the determining factor. He claims that visual experience (not related to the memory factor) may be caused by a scientific understanding of color—that when certain values of color grouped in various patterns, unusual vibratory effects are achieved, and that these effects are physical responses on the part of the observer.

William Buzulence applies three-dimensionality to painting, creating an effect of sculpture through both color and an actual

third dimension. These works fall into the category of the hard-edge method of painting—but become more interesting because of the actual building-up of shapes.

### Buzulence

Buzulence is concerned primarily with the creation of an organized, three-dimensional, colored form which makes its own statement as a thing of beauty. His aesthetics is that of a universal nature which derives its validity from a common appreciation of balance, rhythm, and a grouping of simple shapes.

Jon Naberezny, head of the art department is shown above standing beside one of his Op-Art pieces which will be included in the two-man show.

## ENGINEERS, MATHEMATICIANS:

At NSA,  
our successes depend on yours.

Because of the nature and scope of the National Security Agency's mission, our successes are in direct relation to your achievements.

At NSA, we are responsible for designing and developing secure/invulnerable communications and EDP systems to transmit, receive and analyze much of our nation's most vital information. The advancing technologies applied in this work are such that they will frequently take you beyond the known and accepted boundaries of knowledge. Consequently, your imagination and resourcefulness are essential qualifications for success.

The Career Scene at NSA: ENGINEERS will find work which is performed nowhere else . . . devices and systems are constantly being developed which are in advance of any outside the Agency. As an Agency engineer, you will carry out research, design, development, testing and evaluation of sophisticated, large-scale cryptocommunications and EDP systems. You may also participate in related studies of electromagnetic propagation, upper atmosphere phenomena, and solid state devices using the latest equipment for advanced research within NSA's fully instrumented laboratories.

MATHEMATICIANS define, formulate and solve complex communications-related problems. Statistical mathematics, matrix algebra, and combinatorial analysis are but a few of the tools applied by Agency mathematicians. Opportunities for contributions in computer sciences and theoretical research are also offered.

COMPUTER SCIENTISTS participate in systems analysis and systems programming related to advanced scientific and business applications. Software design and development is included, as well as support in hardware design, development and modification.

Career Benefits: NSA's liberal graduate study program permits you to pursue two semesters of full-time graduate study at full salary. Nearly all academic costs are borne by NSA, whose proximity to seven universities is an additional asset.

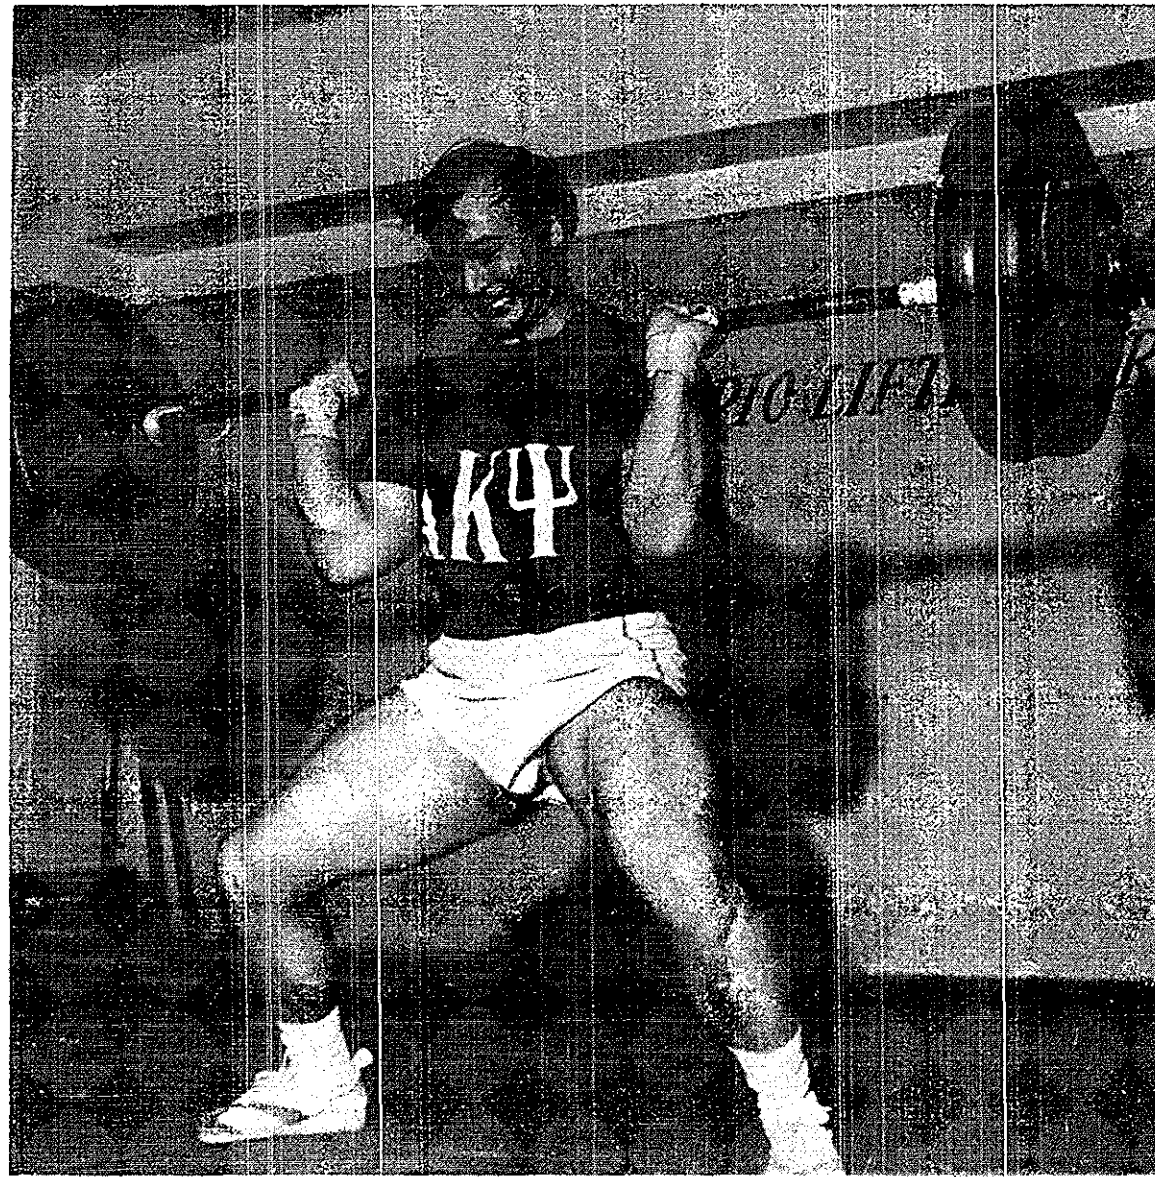

Starting salaries, depending on education and experience, range from \$9,169.00 to \$15,000.00, and increases will follow systematically as you assume additional responsibility. Further, you will enjoy the varied career benefits and other advantages of Federal employment without the necessity of Civil Service certification.

Check with your Placement Office for further information about NSA, or write to: Chief, College Relations Branch, National Security Agency, Ft. George G. Meade, Md. 20755, Attn: M321. An equal opportunity employer, M&F.

... where imagination is the essential qualification.

Mastran pressing better than 250 lbs. with winning technique.

## Lift Champ To Represent YSU At NCAA Tourney

Tom Mastran, a senior business major, placed first in the heavyweight class of the Cincinnati Open Weightlifting Contest last Saturday, his first meet as a heavyweight. Mastran pressed 305 lbs., snatched 265 lbs., and jerked 340 lbs. for a total of 910 lbs. in gaining his impressive victory.

Mastran, who is a member of the Youngstown Barbell Club, will represent YSU in the NCAA weightlifting tournament at Princeton University in April.

Mastran works on lifting about three days a week for 3½ hours and one day a week swims, runs and boxes for general fitness. He also golfs

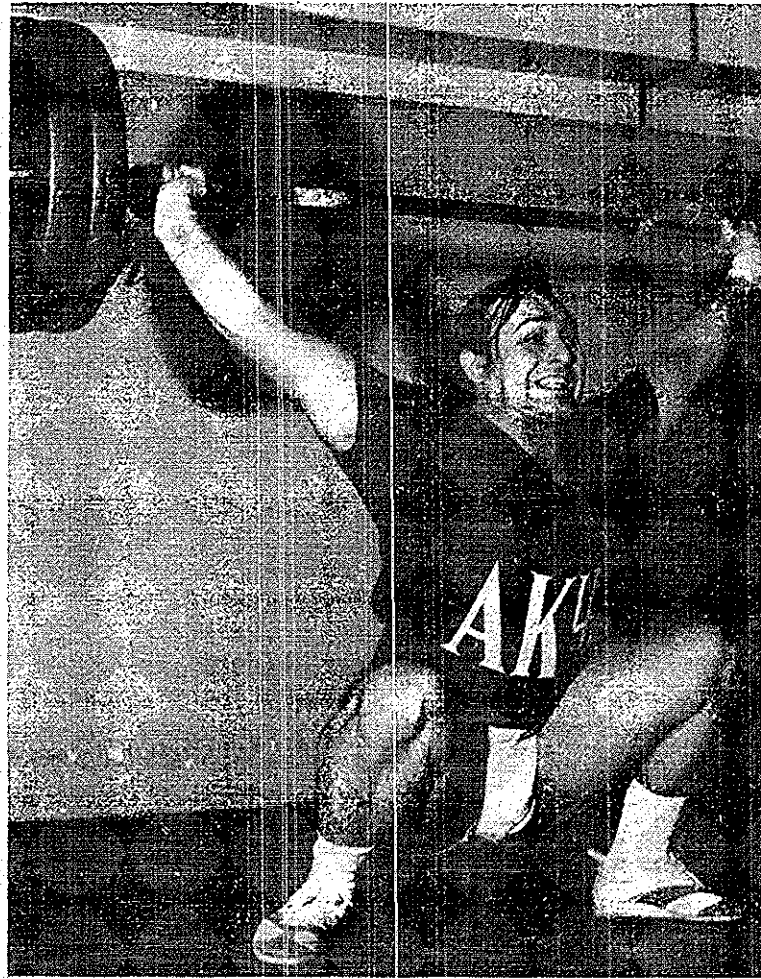

during the spring and summer months.

Mastran started lifting when he was twelve years old, finding he had a natural inclination for it. He was also a champion gymnast until 14, when he quit it for lack of a coach. He set 10 area high school lifting records while at Liberty High School, which still stand.

After returning to Youngstown from Kent State in 1966 he resumed lifting and went on to place fourth in the Jr. Nationals and seventh place in the U.S. for the middle weight class.

Mastran was unable to lift in 1967 because of an ankle operation but in his first meet in 1968 he placed second in the Ohio State Championships by only five pounds.

This past year he placed first in both the Senior District State of Ohio and the Regional Tournaments which includes Ohio, West Virginia and Kentucky.

### Tankers To Meet WVU

Youngstown State's swimmers will try to even their record the hard way Saturday afternoon by knocking off once-beaten West Virginia University at Morgantown, W. Va.

The Penguins, 1-2 after trouncing Wayne State 61-48, have downed the Mountaineers only once in four previous meetings. That was on a close 53-51 decision three years ago at the YSU pool. WVU dropped the Penguins 57-47 last season.

Tom Mastran in final phase of "clean and jerk".
