Weekend Begins Tonight; 800 Tickets Still Available

The Rascals

Over 800 Winter Weekend tickets are still available Tom Martindale, director of student account services, confirmed yesterday. Ticket sales are unusually low for the traditionally sold-out affair.

Concern over a cut in attendance by the Struthers Fire Chief and its effect on the social budget was expressed last week by the major events committee. The lull in ticket sales is expected to add to the burden. Ticket sales Tuesday were extremely high as a result of the announcement of the attendance cut, Martindale stated, but sales have been slow ever since. Tickets for the weekend will be

sold through 5 p.m. today in the Cashier's Office in Jones Hall. Only two tickets with each validated ID card will be sold. Price per ticket is \$2.50

The weekend will feature three top area groups and national recording artists The Rascals in the two day program.

A dance beginning at 8 p.m. tonight in Kilcawley Cafeteria featuring the Road Show and The Sound Barrier will kick off the festivities.

The traditional Sunday night concert will start at 8 p.m. at Struthers Field House and feature the Omegas and the Rascals.

Avante-Garde Composer John Cage Set Here Thursday At Dana Recital Hall

Avant-garde composer John Cage, one of the most brilliant and innovative musicians of this century, will make his debut on the campus Thursday, January 22, as the fourth guest in the University's Artist Lecture Series.

A Guggenheim Fellow and the recipient of a National Academy of Arts and Letters award for having extended the boundaries of music, Cage's topic, supported by four tape recorders and four amplifiers, will be: "Diary - How to Improve the World (you will only make matters worse) continued."

A student of Henry Cowell and Arnold Schoenberg, Cage has been on the faculty of the Cornish School in Seattle, the School of Design in Chicago, Black Mountain College in North Carolina, and the New School in New York City, plus having been composer in residence at the university of Cincinnati. He has also been in the Centers for Advanced Studies at Wesleyan University, Connecticut, and at the University of Illinois.

It was at the University of Illinois, on May 16, 1969, where his newest composition "HPSCHD" was premiered. "HPSCHD" is the word harpsichord with the vowels removed and is scored for one electronic harpsichord, six conventional harpsichords, eight movie projectors, 52 tape recorders and 64 slide projectors, and produced a four-and-one-half hour, as one critic says, "eye-and ear-boggling kinetic phantasmagoria."

Not confined solely to composing music, Cage is noted as a stimulating and controversial thinker, plus being an extremely witty writer. His book "A Year From Monday," published in 1968, is studded with quips and anecdotes. His latest novel, "Notations," was published last winter.

The musical happening, slated for 2 p.m. at the Dana Recital Hall, is sure to be punctuated by some of the more famous Cage stories and sayings, and is free and open to the public.

John Cage

Two Students Here Start Manson Money Fund

The Charles Manson Defense Fund, announced in a *Jambar* classified advertisement Tuesday, is a serious endeavor of two YSU students who believe Manson has been unfairly tried in the news media.

Manson is charged in California in connection with the murder of Sharon Tate and others.

Steve Lambey, a freshman business major, and Richard Yecies, a sophomore Arts and Sciences major, are the fund's organizers and they say only legal questions prevent the launching of a large scale effort.

Since Tuesday morning, they have received at least ten phone calls, among them two offers of

money and several crank calls.

Lambey said he has written to Manson, who is confined in San Quentin Prison, advising him of their efforts. Following legal investigations this weekend, he said they will solicit funds through advertising in area media.

Contacted by the *Jambar* yesterday, Dennis Haines, a local attorney and representative of the American Civil Liberties Union, said licensing is not required but neither the fund nor contributors may apply for tax exemptions unless fund approval is received by the Internal Revenue Service.

Lambey said they intend to rent a local post office box so that contributions can be mailed.

Cites Favorable Relationship—

Pill Man Against Critics

BOSTON AP — Dr. John Rock, codeveloper of the oral contraceptive said Thursday he deprecates critical testimony being given to a U.S. Senate subcommittee on dangers of the pill.

"I deplore the fact that biologists and statisticians aren't a little more temperate in expressions of their theories," he said. "They would not hold these theories if they had more association with the obstetricians and gynecologists who have been working with women for the last eight years."

Rock, 79 and now professor emeritus of gynecology at the Harvard Medical School, devel-

Wine Flows As 747 Is Christened

WASHINGTON AP — Mrs. Richard M. Nixon christened the nation's first operational jumbo jet, the "Clipper Young America" at Dulles International Airport yesterday.

Standing on a tall platform, the President's wife pulled a lever which sprayed the nose of the huge Boeing jet with a pink fluid that appeared to be champagne. The christening spray continued while a band played the national anthem, and still persisted after Pan American World Airways President Najeeb E. Halaby pulled the lever back. Then Mrs. Nixon stepped up and moved the lever back and forth also in an apparent effort to cut off the flow. She too was unsuccessful and the spray lasted for minutes longer.

In a ceremony inside the Dulles terminal before the christening, Halaby said the 362-passenger 747—scheduled to go into trans-Atlantic service next Wednesday—represented progress in every respect, including safety.

Referring to emergency evacuation tests conducted by the Federal Aviation Administration on a 747 at Roswell, N.M., earlier this week, Halaby said that in one of the tests several of the 11 escape hatches on the plane failed to work properly.

Halaby said the evacuation was established within the time period, so that the plane was safe, but evacuation was not very comfortable or sure.

Halaby said the difficulty was due to the fact that workmen installing the two rear chutes mistakenly thought they were interchangeable, and installed the left chute on the right side and vice versa.

Halaby said the chutes will be reinstalled on the proper sides and the difficulty thereby will be remedied so that the airplane can enter service as scheduled.

oped the oral contraceptive with Dr. Gregory G. Pincus, biology professor at Boston University who died at the age of 64.

Warnings that the pill has been associated with high rates of blood clotting, sometimes fatal, and may cause cancer have been presented to a hearing held by Sen. Gaylord Nelson, D-Wis. Dr. Hugh J. Davis, of Johns

Would Be Assassin Of Agnew Arrested

NEW ZEALAND — Police arrested an unidentified young man who, they said, telephoned two assassination threats against Vice President Spiro T. AgneFriday and appeared at his hotel.

Man Called Twice

The police gave this version: A man telephoned the hotel during the night and said assassination of Agnew was being planned by the Progressive Youth Movement, which is conducting antiwar protests during the vice president's visit. He said the assassin would be dressed in a government messenger's uniform and would go to Agnew's suite carrying a .45 caliber pistol. Such a man appeared shortly afterward and made the call.

Arrested At Hotel

The police told him to go home. He called again after the police shift changed, and returned to the hotel. He was arrested and charged with threatening language. Police said the man would be arraigned tomorrow.

Many Demonstrators

Agnew meanwhile met with Prime Minister Keith Lolyoake while a dozen demonstrators stood vigil outside his hotel. They were the largest group

Pollution Board Changes Format

COLUMBUS, Ohio AP — The Aid Pollution Control Board is changing the format of its hearing in Cleveland next week because of complaints about the conduct of a hearing in Cincinnati last month.

Several labor, religious and health groups complained that certain persons representing special interest groups were given priority over other witnesses at the Cincinnati hearings.

Board members will register at the Cleveland hearing and draw witness's names from a hat.

Hopkins University school of Medicine, told the subcommittee, for example, that the pill might cause cancer. Synthetic hormones in the pill have caused breast cancer in five species of animals, he said, and every agent shown to cause cancer in humans also has been to cause cancer in animals.

"There is no reason to pre-

sumed," Davis added, "That the single exception will turn out to be the oral contraceptives. Rock replied: "Careful observation of women who have used oral contraceptives for many years indicates that if there is any relationship between ingested estrogen and cancer, of the breast or pelvic organs, it is a favorable one and not a bad one. Estrogen, a synthetic form of a female sex hormone, is the key agent in the birth control pills. Rock was critical of testimony based on experimental animal studies.

of demonstrators to have protested Agnew during his nation tour.

Largest Protest Yet

Protest leaders said they hoped for an even larger group tonight when Agnew attends a state dinner at the hotel.

Consulting Fees Paid By Schools

COLUMBUS, Ohio AP — Data for a \$283,000 consultant's fee for management of Ohio's 12 state universities was provided by the schools themselves, a legislative committee was told yesterday.

A parade of college officials said the consulting firm of King and Associates was used in determining the management practices at the schools.

University officials, mostly presidents, gave their views of the report to the joint House-Senate Education Review Committee that hired the management consulting firm.

All said there were some suggestions they welcomed, but the reports were mostly superficial.

A spokesman said several names would likely be drawn at the start of the hearing so witnesses could gain some idea of how long it would take to be heard. After those names are exhausted others will be drawn as needed.

The Cleveland hearing will be concerned with air pollution standards for a region that includes Lorain, Cuyahoga, Medina, Summit, Stark, Lake, Geauga and Portage counties.

Purpose of the hearing is to give the board some idea of local sentiment before it provides pollution.

NEON Appointments
All clubs and organizations please contact the NEON office for picture appointment. Pictures are being taken from January 11 to January 24. It is necessary that you contact us before Wednesday January 14.

Ameduri Named Teaching Fellow

Robert A. Ameduri, assistant professor of biology, has been selected as a Teaching Fellow in the School of Education and is a college supervisor of student teachers at Kent State University, where he is now working on a Ph.D. in science education.

Ameduri received a bachelor of science in chemistry from YSU, a master of science from Case Western Reserve, a master of science in education from Westminster College, Pa., and did additional graduate study at Louisiana State.

Draft Book Says--

No One Really Draft-Free

Young men who drew high numbers in last month's draft lottery should not consider themselves "safe" from the draft, according to David Kendall and Leonard Ross, authors of the book, "The Lottery and the Draft: Where Do I Stand?" It will be published by Harper & Row on March 1.

Different local boards will run through the numbers at different rates, and some may go through the entire pool. "There are no safe days," assert the authors.

Aside from local variations, the authors conclude that the national average cut-off may be far higher than the number predicted by the Pentagon (166). The Pentagon statement that men with the highest numbers (244-366) will have a low probability of being drafted may be far from the mark.

Kendall and Ross present an alternative set of predictions, suggesting that if 1970's draft call is 225,000, then the national cut-off point might be as high as 240, rather than 166.

Kendall and Ross list three reasons for Defense Department over-optimism: first, the Department assumes that the lottery will have no effect on enlistments, although it seems likely that many men with high numbers will no longer enlist, while those with low numbers will not be substantially more likely to enlist than previously. Second, the Pentagon neglects the possibility that many more men with low numbers will obtain deferments, thus raising the lottery number which will have to be reached to achieve the draft quota. Finally, the Department overlooks the inefficiency of local boards in classifying and processing registrants. Some boards, according to the authors, reclassify men as I-A only when necessary to meet a draft call. These boards may run through the entire sequence of lottery numbers every month, and even dip into lower priority groups of men who have been told they are virtually draft exempt. Kendall and Ross call this up-and-down variation in the lottery cut-off point the "yo-yo

effect." "Many men who think they are draft-free may find themselves surprised before the beginning of Spring."

The Kendall-Ross book warns strongly against "playing games" with the draft. Some men with middle and high lottery numbers have been planning to hold their deferments until close to the end of the year, then resign them if their number hadn't come up. Since they would no longer be in the "prime age group" after the end of the year, they might avoid the draft altogether. But Kendall and Ross conclude that few local boards are likely to cooperate with this scheme. Simply by sitting on the registrant's file, a local board can wait until the new year to take away his deferment. He will then be liable for that entire calendar year, just like anyone else.

In their conclusion, Kendall and Ross are highly critical of Selective Service procedures. "The current Selective Service procedures represent a partnership of formalized injustice with random error. Like cases are treated differently; the rule of law is

replaced by the rule of clerks." They urge reforms along the lines suggested by Yale President Kingman Brewster, Senator Edward Kennedy and the President's National Advisory Commission on Selective Service (the Marshall Commission).

The Kendall-Ross book was written with the assistance of a research team of twelve Yale Law Students. David Kendall, 25, is a second-year law student at Yale, a member of the *Law Journal* and a Rhodes Scholar; he will be commissioned a second lieutenant in the Army this June. Leonard Ross, 24, is a Ph.D. candidate in economics at Yale, a graduate of the Yale Law School and former Editor-in-Chief of the *Law Journal*. He holds lottery number 50.

Clarify Grading On Attendance--

Grade Policy Reviewed

The Student Affairs Committee and the Academic Affairs Committee will be asked to formulate an official "grading on attendance" policy, Dr. William Coffield, academic affairs vice-president, said yesterday.

Only "guidelines" exist at present Dr. Coffield explained, and an official policy is needed to clarify faculty grading policy on class attendance.

Questions on the existing attendance policy were raised by Michael Novotny, a senior business major, in the *Jambar's* January 13 Letters to the Editor column. Novotny claims that his grade in a five-hour business course was lowered because of inadequate attendance in the course. Dr. Coffield described the present administrative policy, or lack of it, as "nebulous." He stated that presently the only guideline for instructors concerning attendance is stated in the Faculty Handbook and that is not official policy. The Faculty Handbook says "Since a student's grade in a course is an indication of the quality of his achievement in that course, if his absence from class is a direct cause of inferior achievement, his grade will reflect such absence. He may be penalized for failing to do assigned work but not for simply not being present nor may the number of credit hours he receives in the course be reduced for absence." "If a

student can do well on all examinations in a course without having attended that class regularly, it is evident that either the examinations ignore what was done in class or the class work is not essential to mastering the material of the course--at least for that student."

The statement provides for a broad latitude by the course instructor on whether or not attendance will affect the students' final grade in the course, Dr. Coffield said. Instructors now make use of their professional standards as they see fit.

U.R. Phase Three Stands Unchanged

The status of Urban Renewal Phase Three, YSU expansion program remains unchanged Mr. Robert Machuga, director of Youngstown Urban Renewal reported yesterday at the Young Republican's meeting.

In October 1969 Phase Three was cancelled due to a shift in the national goals of urban renewal. It has since been reinstated but further down on the list of priorities.

The status of all city renewal projects has shifted toward production of moderate-low class housing, thus priority of programs involving YSU has been set back. Machuga stated that there is no indication of the program being dropped.

"Any changes due to the new city administration can only help" said Machuga in reference to YSU's Phase Three Project.

"A Republican administration and a Republican mayor in Youngstown is far more compatible than a disparity in party memberships."

The current Urban Renewal program will concentrate on slum clearance and the rebuilding of housing in those immediate areas. Projects in the downtown district will continue as planned.

Bellini Work Published

Dr. Paul X. Bellini, assistant professor of civil engineering, William Rayen School of Engineering, Youngstown State University, has has a technical paper accepted for publication in the March, 1970, issue of the *Journal of the Acoustical Society of America*.

Education Without Representation (Continued from page 4)

still in the planning stages, and will probably not even be considered before the upcoming elections in March.

Student Council added that there have been two reapportionments since 1967, but no increase or decrease in the number of seats given to the individual schools.

The last time any changes were made in the number of seats on Student Council was approximately four years ago, when, because of increases in enrollment figures, three seats were added to Student Council, and it was decided that these seats should be occupied by Representatives at Large. No other changes have been made in the size of Student Council since then.

Now, as the size of the University increases with every quarter, Student Council is considering reapportionment. But, according to the chairman of the elections committee, this will not be done before the elections in March.

In viewing the current enrollment figures, serious thought should be given to completing reapportionment before the March Elections are held, giving more representation to the school of Arts and Sciences, the largest in the University system.

Proportioned representation should be given to the Technical and Community College, the fourth largest school within the University.

As it stands now, the graduate school is also without representation, unless it is represented by members of the undergraduate schools. It should receive a seat on Student Council since it is larger than the smallest school, The Dana School of Music, which now has one seat.

Faculty Survey Plans Tentative

Tentative plans for Student Government's faculty evaluation were released yesterday by Penny Laakso, Student Government vice-president and evaluation chairman. The survey is scheduled to begin sometime in early February.

The plans call for approximately 200 or 300 student supervisors to distribute folders containing evaluation questionnaires to designated classes in all schools on a specific day in the three week evaluation period. Supervisors will ask for the consent of the class instructor before the folders will

be distributed.

Students will then complete the questionnaire and place the answer sheet in the folders and bring the forms back to Council offices for submission to the computing center.

According to Miss Laakso, arrangements are not complete with the computing center and it is not known if the computers can program all the evaluation information.

Miss Laakso showed some concern as to what effectiveness of the evaluation would be. She proposed to her evaluation committee that a pilot survey where questionnaires would be sent out, answered, and returned by randomly picked students be conducted before the actual evaluation. The committee decided that there was an immediate need for the evaluation and decided not to abandon its present effort.

Fraternities Select New Officers

Two social fraternities recently elected new officers for the winter and spring quarters. New officers of Sigma Alpha Epsilon fraternity are Jim Clark, president; Bob Panzino, vice-president; Jim Diffley, treasurer; Dale Clemmens, secretary; George Jordon, warden; Bob Geragi, Chaplain; Steve Buchanini, chronicler Rich Savich, correspondent.

New officers of Theta Xi are Tim Williams, president; Don Leone, vice-president; Ron DeSantis, treasurer; Skip Delisio, corresponding secretary; Dennis Leone, house manager; Gary Belloma, scholarship chairman; and Rich Davis, sergeant at arms.

Med Frat To Meet

There will be a meeting of Lambda Tau Medical Technology Fraternity at 4:00 Monday, January 19 in Ward Beecher Science Complex, room 422.

Hoop Tickets On Sale

180 student tickets for the YSU-Westminster basketball game at New Wilmington, Pa., Jan. 24, are now on sale. Tickets are \$1.00 each and are available at the Athletic Business Office.

Art Change Discussed At Wedn. Gates Talk

The differences in the endeavors of artists throughout the Hellenistic period through early Christianity was the topic discussed at the Gates of Eden Coffeehouse by James G. Lucas, assistant professor in the art department, Wednesday night.

Through the use of slides belonging to the art department, he showed the differences in forms that the human body took during the Hellenistic period in Art, primarily Greek artists, and through the period of Constantine The Great.

The most important point

made throughout the talk was that with the coming of Christianity, the human body took on a more grotesque form than it had in the times of the Hellenistic artists. The body of man and woman was shown out of proportion with what it really is, and treated as a lewd thing rather than the thing of beauty as was portrayed in Hellenistic Art.

Lucas also added to his talk on Hellenistic Art, the periods throughout the Early Oriental art, pointing out such things as the sexual attitudes of the Oriental religions. It is interesting to note that throughout India and most of the Orient, the female is considered to have the stronger sex drive and that the male has the lower sex drive, in direct contrast to western thought.

CORPS

January 7, 1970

Dear Student,

Contrary to pernicious rumor the Peace Corps is still alive and well. Also it is still very dependent on the young people of this country to make it work. 96% of this summer's programs will be filled from college campuses. We are in particular need of graduates in: Education, Science, Business, Math, Home Ec., and Engineering. We also need people with Agricultural backgrounds.

IS PEACE WORTH WORKING FOR?

How about foam
on your beer?

none? 1 inch? 1½ inches?

You'll hear some people say there shouldn't be any head at all. They say the phooey on the foam...where's the beer?

They shouldn't. Anyway, not when the beer is Beechwood Aged Bud-

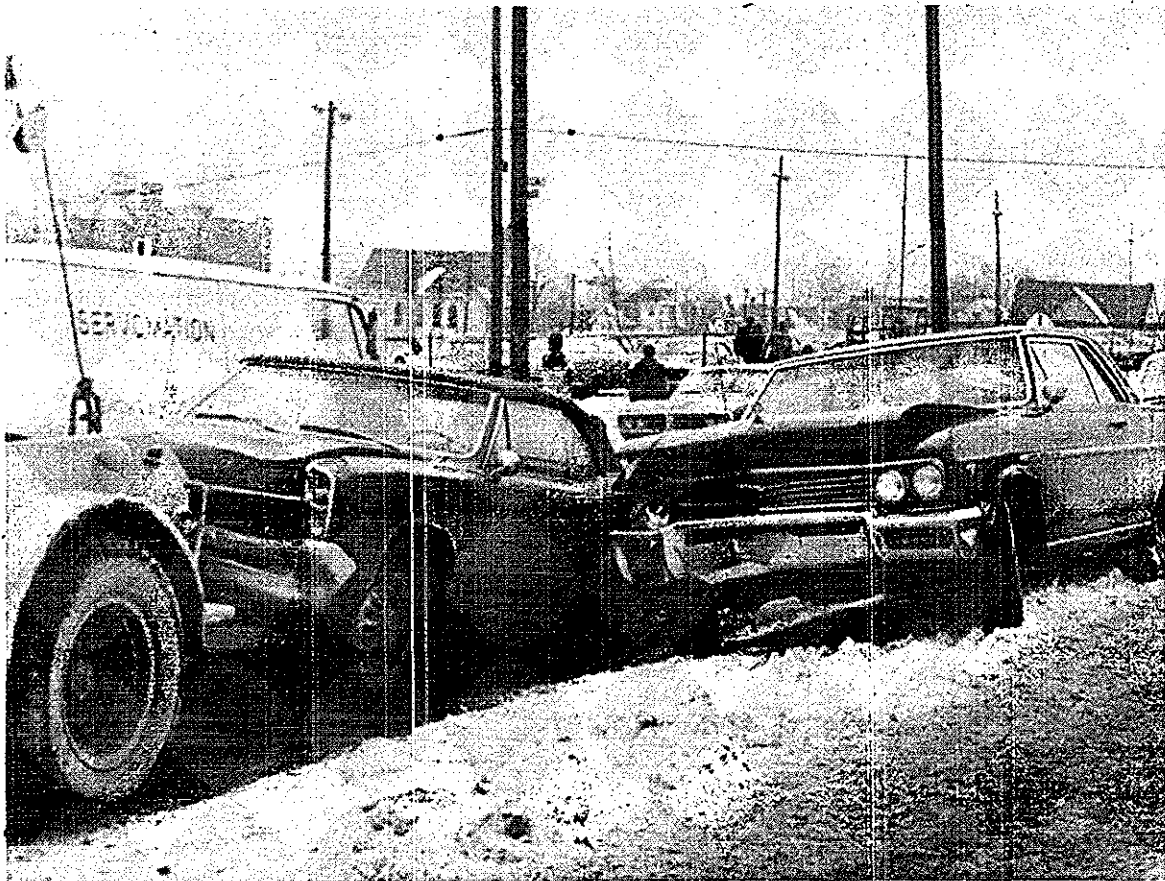

head of foam. Those little bubbles add to the taste, the smoothness, and the drinkability. So pour your Bud with about an inch-and-a-half collar. Two inches if it's a tall glass.

Budweiser is brewed so it will kick up a good

Now let the foam tickle your nose...and your taste. That's the answer.

Budweiser is the King of Beers.

(But you know that.)

Two student operated cars were involved in this accident on the corner of Elm and Arlington Streets. Poor driving conditions around campus plagued area commuters.

Mentor Program Gives Student Aid

Students needing assistance in their course work can get free assistance from the Mentor Program Office in Ford Hall. Counseling is given on an individual basis; and also special meeting times have been scheduled for the following course:

Counseling in Communications is available in Room 16 in Ford Hall on Monday from 10-11 a.m.; Tuesday from 9:30-11 a.m. and 6:30-7:30 p.m.; Wednesday, from 10-11 a.m. and 5-6:30 p.m.; and Friday from 10-11 a.m.

Counseling in Social Science is available in Room 109 in the Arts & Science Office Building. Students are asked to report to the departmental office at any time.

Counseling in Reading & Study Skills Lab is available on Tuesday at 11 a.m. and Wednesday from 6-7 p.m. in Room 211 of the Engineering & Science Building.

Study areas are also available at Ford Hall between 1-5 p.m. Monday through Friday.

Basketball Creates Student Seat Problem

Lack of student and general admission seats which necessitated the turning away of students at the YSU-Kenyon game may continue to be a problem at future basketball games, James Morrison, athletic business manager stated yesterday. Students have been able to find seats prior to the January 14 encounter at the Austintown Field House.

Morrison said that student attendance at basketball games fluctuates with the success of the team and is often hard to predict before game time. Reserved seats, which number 660, on the other hand, can easily be

determined and filled each game, Mr. Morrison pointed out.

500 Season Tickets

Season reserve ticket holders, which number approximately 500, are given top priority at capacity games, Morrison stated. Season tickets account for about \$875 per game.

General admission tickets are not sold prior to the opening of the box office and students are permitted to enter capacity games before further general admission tickets are sold, Morrison said.

Approximately 1000 students attend each game and are admitted by ID card. Capacity at the Austintown Gym is 2300, not 7000 as reported by Collier, Morrison added.

Isgro, Bednarcik Hit Performances In Student Govt.

Moves to increase communications among Student Government personnel were taken at yesterday's Student Council Meeting by Council Chairman Greg Bednarcik and Student Government President Pete Isgro.

Bednarcik asked Council members to summarize Council committee and Student Faculty committee work that had taken place since Oct. Isgro then announced that he will require members of the Executive branch to file reports on the work that they do. As an example of the problem, Isgro said he had not received any minutes from Major Events. As a result of the general situation Isgro

said, "people just don't know what's going on." He expressed particular concern that he and all student government people in the future should have the benefit of past reports.

Bednarcik also asked Student Council members to report any student committee members who had ignored their responsibilities. Bednarcik said that Student Government should "get new people if students don't show up" for committee meetings. Both also stated that they hoped to appoint more observers to the Faculty Senate after more applications had been received from schools other than Arts and Sciences and Engineering.

Biology Dept. Gets Grant For Undergrad Research

The department of biology has received a \$14,000 National Science Foundation grant for a program in undergraduate research, Dr. George Kelley, department chairman announced yesterday.

The award is the second largest among the six Ohio recipients.

Dr. Kelley said the program begins this summer when three students from area universities investigate "Cycling of Food and Energy within an Animal Community" under the direction of Dr. Lauren Schroeder, assistant professor of biology. Descriptions and applications for the program will be sent to various

Biology departments.

The students will work on a full time basis from June 18 to Sept. 2, 1970. Each student will receive eight quarter hours credit and a \$600 stipend plus travel expenses.

The fall program will be available to YSU students only. Eighteen positions are open with choices in three fields: "Cellular Physiology" led by Dr. Anthony Savota; "Factors Regulating Manufacture of Blood Cells" led by Dr. James Toepfer, and "Immunity Development of Response to Disease Causing Organisms" headed by Dr. Kelley and Dr. Paul Van Zandt, all of the biology department.

Selection is based on student motivation toward biology, scholarship achievement, selection by a panel with support and sponsorship by a faculty member and sufficient background in prerequisite and related subjects.

Editor Speaks On News-Opinion Link

M. Stanton Evans, lecturer and newspaper editor, will speak at the Boardman Glenwood Middle School at 7:30 p.m. Monday, January 19. Mr. Evans will discuss the controlling influence of the media.

One of the founders of Young Americans for Freedom, he received the Freedoms Foundation awards for editorial writing and the Headliners Club award for "consistently outstanding editorial pages." He is a member of the Advisory Board of the Intercollegiate Studies Institute.

Tickets are \$1.00 in advance and \$1.50 at the door. Mr. Evans' appearance is co-sponsored by the Youngstown Area Educational Forum and the Youngstown Libertarian Society.

Scabbard & Blade at 1 p.m. in Pollock House

Order of Diana at 7 p.m. in TKE House

Sisters of Golden Heart at 6 p.m. in Sig. Ep. House

The Law Enforcement Assistance Administration of the U.S. Department of Justice has awarded YSU \$17,500 to provide financial assistance to students who are pursuing, or are interested in pursuing, law enforcement careers, it was announced today by Dr. Albert L. Pugsley, University president.

The funds, which come under the Law Enforcement Education Program (LEEP), will be issued to eligible students as loans and/or grants to improve and strengthen law enforcement.

Under the LEEP program, first priority for student aid will be given to officers of publicly funded law enforcement agencies or loans to police or correctional personnel of States or units of local government.

The LEEP program makes funds available for students for the payment of tuition and fees per academic quarter for full-time or part-time enrollment in programs leading to a degree or certificate in an area related to law enforcement. Beneficiaries

must be full-time employees of a publicly-funded law enforcement agency for a period of two years following completion of any course of study funded by a grant or loan. Failure to honor this commitment obligates the recipient to repay full amount of the grant or loan.

Inquiries regarding the LEEP program should be directed to the Office of Student Financial Aids, East Hall, or to the department of criminal justice, Jack D. Foster, chairman.

Hockey Plans Now In Progress

Interested in playing hockey? Contact Hank Garono, supervisor of landscaping at YSU, who says he has been approached by about 15 resident students from Kilcawley who are interested in forming an intramural team.

Garono said if enough students show interest, a limited schedule for games on the new Kilcawley skating rink could be set up depending on weather conditions.

He said installation of an artificial rink, which would alleviate dependence on below freezing weather for ice, would be needed before games could be scheduled on a regular basis.

Raymond Orlando, physical plant director, said the possibility of installing an artificial rink at the present Kilcawley rink

had been investigated and found to be impractical. He cited high cost and maintenance problems as major reasons.

Orlando estimated such an installation would cost \$100,000. He added construction in another location would be even more costly but did not rule out the possibility of construction of an artificial rink as a future possibility for the University.

Orlando said if enough students indicated interest in playing, hockey nets could be put up on the Kilcawley rink.

Garono pointed out that several students are using the Kilcawley rink and added that construction of a artificial rink might be something for the university to look into for the future.

Sorority Rush To Continue To Jan. 23

Formal Sorority Rush Sign-up has begun and will continue until January 23.

The first event, Greek Preview, an informal gathering for sorority members and rushees will be held from 2 p.m. to 5 p.m., January 25 in Kilcawley Student Center.

During the next two weeks, January 30 - February 1

and February 6-8, individual sororities sponsor parties for rushees.

Bids are announced at 4:30 p.m. Monday, February 9 in the Dean of Women's Office.

Interested girls, with 12 completed hrs., a 2.2 accum, and in good standing can apply between 9 a.m. and 4:30 p.m. daily in the Dean of Women's Office.

Neon Editor Reveals New Format For 70 Yearbook

The 1969-70 Neon will differ greater from past years, John Morritz, editor, said yesterday.

Plans at this time call for four separate books to be included in a leather case. Morritz said the new format was established so that emphasis could be more clearly defined.

Each of the four books will have a unique theme and will be bound with a paper cover.

The Neon offices are located on the third floor of East Hall.

Computer Center Shifts To Teaching Schedule

The YSU Computer Center, an outgrowth of the old data processing department, recently shifted its emphasis from administrative to instructional use.

Dr. Ronald Jonas, director of the Computer Center, explained that the Center which had previously been concerned with administrative processing, could attribute the shift to "student awareness rather than a change in organization or policy."

The new direction was most obvious in November, 1969, when instructional use of the computers increased from thirty to fifty percent over previous months.

Dr. Jonas stated that the majority of student use comes from class assignments rather than in-

dependent interest. Presently twenty four science and business classes, about 360 students, are using the computers for class oriented work.

Although the Computer Center is available to faculty and students for independent study, only faculty members have so far taken advantage of the computers for both research and classroom preparation.

The Center is able to accommodate increasing requests by having operators on duty from 8 a.m. Monday to 5 p.m. Saturday. Because the Center only closes for a few hours a week, Dr. Jonas said those who felt the Center is badly organized and does nothing are

poorly informed.

He foresees future uses for the computers as almost unlimited because computers are not limited to the sciences. He cited sociology, psychology, economics, and languages as disciplines which can make important strides with computers.

D.C. Intern Program Planned

YSU students have the opportunity to participate in the Washington Summer Intern Program, a Civil Service Administration project where 400 students will be employed in federal government agencies in the nation's capitol this summer.

Dr. William H. Coffield, vice president for academic affairs, said a faculty committee to select three YSU students has been formed with Miss Ivis Boyer, chairman of the political science department as head. Three other faculty members are yet to be chosen.

Candidates must be undergraduate with at least 90 quarter hours completed by the end of the current academic year. Also required is a 3.5 accum. Current graduate students in the upper half of their class are also eligible. Extra-curricular activities which demonstrate leadership potential will also be considered.

Students will be employed by Federal agencies and will draw salaries. They will participate in scheduled seminars and analyze government programs related to domestic and international affairs.

"The Program will give the participants an opportunity to see Government in operation, and should help to make their education more relevant," Mr. Robert E. Hampton of the Civil Service Commission, said.

Additional information is available from the political science department, room 387, Arts and Sciences Office Building.

Look For ADvent
Of A Decade

End Greek System 1st Forum Topic

Self-styled student orators interested in arguing the maintenance or abolishment of campus fraternities and sororities are urged to apply for speaking positions for the first University Debate Forum.

See application form elsewhere in today's Jambor.

The Forum will be held at 8 p.m. Tuesday, January 27, in the Engineering Building Auditorium and is intended to bring students together for the argument of significant campus issues.

The Forum Executive Committee, will select topics from those submitted by interested student and faculty. All issues will be defended by an affirmative side, who advocate a change in the "status-quo" and a negative side, "who oppose changing the "status-quo".

YSU swim star Nick Gavolos executes a perfect dive off the 10 meter board at the YMCA.

Chem. Prof. To Speak At U. of Cinci.

Dr. Irwin Cohen, YSU professor of chemistry, will be one of several guest speakers at a special two-day public symposium at the University of Cincinnati this Friday and Saturday, January 9 and 10.

Devoted to molecular quantum mechanics, the symposium will be held in honor of Dr. Charles A. Coulson, a visiting professor from Oxford University, England, and a specialist in chemistry and theoretical physics.

Also appearing on the program will be Dr. Janet Del Bene, a 1965 graduate of YSU, who is currently a post-doctorate research assistant at Carnegie-Mellon University.

The author of numerous scientific publications and the recipient of several National Science Foundation Grants for research, Dr. Cohen is a native of Cleveland and received bachelor of arts, masters of arts and Ph.D. degrees, all in chemistry, from Case Western Reserve University.

*CEILING AND VISIBILITY UNLIMITED

At Pratt & Whitney Aircraft "ceiling and visibility unlimited" is not just an expression. For example, the President of our parent corporation joined P&WA only two years after receiving an engineering degree. The preceding President, now Chairman, never worked for any other company. The current President of P&WA started in our engineering department as an experimental engineer and moved up to his present position. In fact, the majority of our senior officers all have one thing in common — degrees in an engineering or scientific field.

To insure CAVU*, we select our engineers and scientists carefully. Motivate them well. Give them the equipment and facilities only a leader can provide. Offer them company-paid, graduate education opportunities. Encourage them to push into fields that have not been explored before. Keep them reaching for a little bit more responsibility than they can manage. Reward them well when they do manage it.

Your degree can be a B.S., M.S., or Ph.D. in: MECHANICAL • AERONAUTICAL • ELECTRICAL • CHEMICAL • CIVIL • MARINE • INDUSTRIAL ENGINEERING • PHYSICS • CHEMISTRY • METALLURGY • MATERIALS SCIENCE • CERAMICS • MATHEMATICS • STATISTICS • COMPUTER SCIENCE • ENGINEERING SCIENCE • ENGINEERING MECHANICS.

Consult your college placement officer — or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

CAVU* might also mean full utilization of your technical skills through a wide range of challenging programs which include jet engines for the newest military and commercial aircraft, gas turbines for industrial and marine use, rocket engines for space programs, fuel cells for space vehicles and terrestrial uses, and other advanced systems.

Two YSU Wins Will Tie Record

Youngstown State, Ohio's only undefeated college team, can move to within one game of tying the longest Penguin win streak this Saturday night when it visits Alliance College at Cambridge Springs, Pa.

The varsity contest will start at 8:15 p.m. with the two JV clubs clashing at 6:30 p.m. The games were originally slated for Fitch High Field House until a schedule conflict necessitated the switch. Alliance will visit YSU on Feb. 21.

Dom Rosselli's Penguins, rated 4th on the AP and 15th on the UPI small college polls, will be seeking their 12th straight victory. The longest YSU win streak was 13 in a row recorded by the 1963-64 and 1956-57 clubs. The Penguins will also be after their fourth straight road victory, one shy of last year's five straight, the best road win streak in the past five seasons.

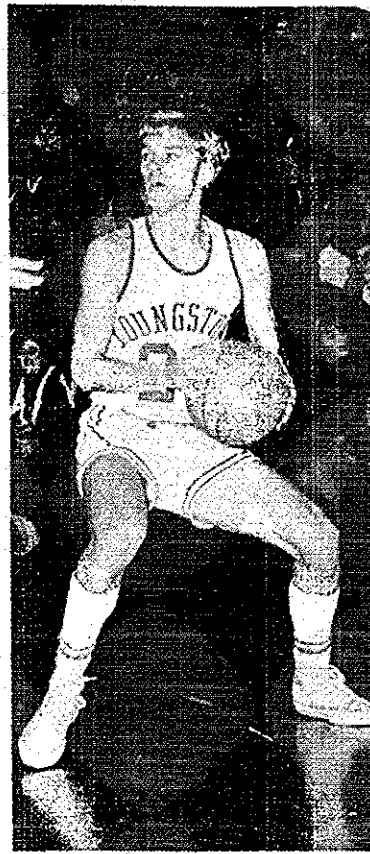

YSU owns a 32-7 bulge in the series with the Eagles, winning the last three meetings and seven of the last eight. The Penguins posted 105-84 and 66-53 victories last year. The Eagles last won in 1967-68, upsetting the Penguins (67-65) in overtime at Alliance after YSU had won 8 of its first ten games.

Ted Haluch's Eagles are fighting a four-game losing streak and have a 3-5 season mark.

All American divers Dale Welk (above) and Nick Gavolas exhibit perfect form in demonstrating a reverse and a one and a half from a pike position.

Billy "The Kid" Johnson Shoots Up Penguin Score

Bill Johnson

John McElroy, YSU's greatest basketball player of all time is gone, but because of the round ball antics of an understudy, his absence is not as hard to take. Billy "the Kid" Johnson, a former Canton Lincoln superstar, has paced the Penguin scoring this year with 261 points and his ability to move the ball and come up with key steals on defense has put the Penguins among the nation's top five.

In his freshman year, Johnson led the Penguins at the charity stripe with an 81% clip. His five-for-five free throw tosses in the final two minutes of the Steubenville tilt gave the Penguins a road-trip victory. He scored in double figures seven times last season, including an 18-point performance against Hiram.

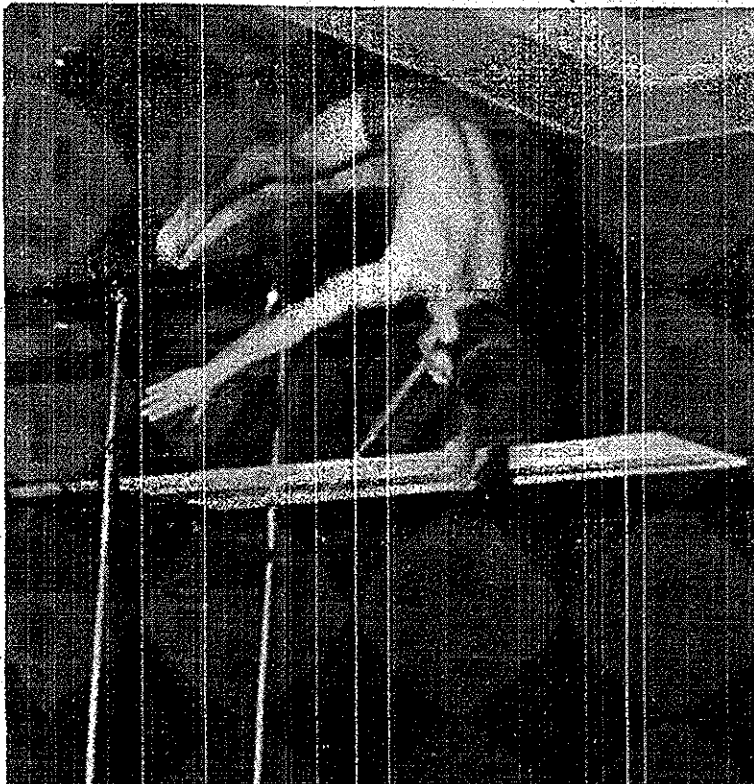

He leads the Red and White

this year with an average of 23 points per game and his career high of 39 points against Kenyon last week makes him only the fourth Penguin in YSU history to go over 38 points in one game!

Johnson is the all-around ballplayer. He plays defense as well as he shoots. Hustle and determination are two very descriptive words of Johnson in action.

His high school days of two years ago witnessed the guiding his Canton Lions into the state semi-finals, only to be beaten by the eventual state champs, Columbus Linden McKinley.

An all-Canton product, Johnson supplies the Penguins with a secure future for the next two seasons. A mop of blond hair, the flash of the number 20, and the soft touch of another easy "two" delights Penguin fans at each YSU encounter.

DiCross Named "Hero of The Week" -

Intramurals Open 70 Season

Youngstown State University Intramurals opened its 1970 season last weekend with a ten-game slate during a three-day period. The first game of the 1970 campaign witnessed the Bombers forfeiting to the Grovers 2-0, while Kyle trounced the Ken-Men 70-33 in the p.m. tilt. Ken DiCross, Penguin griddler, won the "hero of the week" award by pacing his Can-Am teammates to a 47-46 verdict over the Chess Club with a 20-foot bucket in the last two seconds!

Friday night's action saw the YSU Engineers competing for the intramural crown. The Metallurgical Engineers

tripped the Civil Engineers 54-36 in the opening contest. The Mechanical Engineers held the Electrical Engineers to a season low with a 47-18 massacre. The night's finale witnessed the Chemical Engineers squeezing by the Industrial Engineers 39-37.

On Saturday afternoon, the Field clobbered the Miners 88-41 in the opening contest for a season high in YSU Intramurals. HPE decimated the Knights 54-49 in the second tilt, while the Brothers outscored the Tar Heels 53-43 in the third game. The last game of the week saw a powerful LTD quintet stomp Kilcawley 68-32.

Intramural Coaches

Coaches and managers of all independent intramural squads please acknowledge any fraternity players on your team. Rules of the YSU Intramurals state that no player may participate in both IFC basketball and YSU Intramurals. Violation of this rule will result in an immediate dismissal of the player from the league and a loss for each game he participated in for that team.

Rosters will be checked by both officials and the supervisor, Mr. John Jackson.
