YOUNGSTOWN UNIVERSITY, YOUNGSTOWN, OHIO

VOLUME 35, NO. 11

PLAN FESTIVE MAY DAY CEREMONIES

DANCE STARS BUDDY MORROW

"NIGHT TRAIN": Playing for dancing tonight at the Yankee Lake Ballroom will be renowned Buddy Morrow and his "Night Train" orchestra. Buddy is a favorite on college campuses throughout the nation, playing the right kind of music for a gala May Day dance.

FEATURED: Reigning over the entire day's festivities, will be Joan Melek, Beta Sigma Omicron Sorority, 1959 May Day Queen shown above. Janice Georges and Anna Marie Battagline are in her court.

Anna Marie Battagline

Joan Melek, a member of Beta Sigma Omicron Sorority, will reign as queen today over Youngstown University's most elaborate social activity of the year, the annual May Day Festivities. Commencing with a gala and colorful pageant on the lawn of Pollock House in the early afternoon, the day will be filled with activities that conclude with the evening dance at Yankee Lake Ballroom.

Janice Georges of Alpha Omicron Pi Sorority and Anna Marie Battagline of Phi Mu Sorority are the members of the queen's court.

Following the opening ceremonies on the Pollock lawn at 1:00 p.m., during which the May Pole Dance and the Friendship-Chain will take place, the Youngstown University Honor Guard will form an arch of sabres for the royal party's procession to the coronation throne.

Sonia Linynsky, last year's May Queen and a member of Beta Sigma Omicron Sorority, will crown the

May Pole Dance

The May Pole Dance, a traditional event during May Day festivities, will be performed by two pledges from each sorority. The Friendship-Chain, a colorful activity, will be composed of two officers from each women's organization.

Dave Prosser will be master of ceremonies for the afternoon. The winners of last year's Greek Sing, Kappa Sigma Kappa Fraternity and Tri-Sigma Sorority, will serenade the royal party. Mrs. Violetta C. Robinson of the Physical Education Faculty is in charge of the May Pole Dance.

The dance will begin at 9:00 p.m. at the Yankee Lake Ballroom on Route 7 near Brookfield, Ohio. The Buddy Morrow "Night Train" Orchestra will play for dancing until 1:00 o'clock.

The theme of decorations for the dance will be a "Japanese Garden". Featured will be an illuminated painted scene behind the band, overhanging Japanese lanterns will grace the dancing floor.

Co-Chairmen of this year's May Day festivities are Dave Clark and Gerry Rhodes of Sigma Phi Epsilon Fraternity. Ron Lengel and Ken Hoffman are in charge of decorations and guests.

All students are strongly urged to attend the afternoon ceremonies. Classes are excused from 1:00 to 3:00 p.m. The program is open to the public and students may invite their parents and friends.

Dana Opera A Hit!

Last Friday evening 78 students from the Dana School of Music Opera Workshop presented an enchanting performance of Johann Strauss' operetta "Die Fledermaus" in C.J. Strauss Memorial Auditorium.

Realizing the human effort that goes into a production of this magnitude, and bearing in mind also that this was student talent, not professional, a few words of praise are in order.

"Die Fledermaus" was very entertaining and colorful. The music was ably conducted and the lead parts were performed very capably. The scenery was a bit amateuristic, but it was authentic and added immensely to the beauty of the opera.

All in all the opera provided three hours of very enjoyable entertainment to those in attendance ... and now comes the thorn. There were only around 100 persons at the opera Friday night. Seventy five percent of the patrons were adults and elderly persons. Only a handful of students were seen.

The opera was sponsored by funds taken from the student activity fee. Every student paid for the production. And yet, despite the fact that admission was free, students remained apathetic. Too bad! If YOU missed the opera think about it for awhile. You missed a great performance.

End Registration "Blues"

Pre-registration is finally over. It is during this registration period students begin to wonder whether or not it is worth the time and effort to go to college.

Part of the problem lies in the student advisor system. The obvious impersonal relationship between student and faculty advisor is the cause of many headaches for students.

Students are seen running from one advisor to another trying to work out a schedule. Advisors give many and varied answers to student's problems and no one ever seems to know the correct answer to their problems.

After settling on a haphazard schedule some advisors affix their signature to the student's schedule and that's all they do; no suggestions, recommendations or foresight in planning a four year program for the bewildered student.

Results: Students spend time and money going to summer school or to college for five years, trying to make up required courses he needs in order to graduate.

There must be a solution to alleviate this problem and put an end to pre-registration "blues."

Mounting Safety Problem

An estimated 900,000 young men and women will come of driving age during 1959. If they all become drivers and follow the tragic path of today's young motorists, 243,000 of them will be involved in a highway accident that kills someone.

Of course this will not happen because all 900,000 will not become licensed drivers this year. Perhaps this is because so many fearful parents have read the grim figures of what's happening to these young drivers under 25 years of age.

In its new highway safety booklet, "The Luckless Legion", The Travelers Insurance Companies report that during 1958 these drivers under age 25, who make up less than 14 per cent of all licensed drivers, were involved in 27 per cent of the fatal highway accidents and 20 per cent of the non-fatal crashes that perhaps maimed someone for life.

It does not take a mathematician to conclude that their record was twice as bad as their numbers would warrant.

Where does the responsibility rest for this shocking condition? Is it with the schools, the parents, traffic authorities, or these young men and women themselves?

We feel it is a combination of all these things. More schools must provide driver-training instruction, many more parents must face up to this problem that could cost the life of their children, traffic courts must "get tougher" and most important, the young drivers must realize that tragedy will strike as a result of thoughtless actions behind the wheel.

The Campus Voice

By

Vilma Terte

Today we are going to discuss seriously what, if any, are the advantages of an I.D. system.

Carole Albright

Is a sophomore elementary education major and a member of Beta Sigma Omicron sorority. "I think the Identification Card would be appreciated by the Y.U. student body. It would bring to an end the student's worry about losing two little books of activity tickets which are now crammed into a wallet and his looking for a crumpled tuition receipt every time he wanted to borrow a book from the library. This plan should work out very well on our campus. The big problem would be photographing all the students. At other schools, such as Ohio State, the students are photographed at pre-registration and receive their ID cards at a final registration in the fall."

Joe Allegretto

Is a junior working on the dual education course. "The proposed I.D. system has been tried and tested successfully at various other schools. For example, Kent State University and Western Reserve University. Such a system has proved greatly advantageous at the above mentioned schools for services like the Health Bureau, cafeteria and sundry school activities. In contrast we have few of these activities at Youngstown that would be made more convenient by the use of an I.D. card. Therefore I see little advantage in advocating such a system here at our University."

Shirley Jean Shepas

Graduated from Poland Seminary High School and at present is studying secondary business education. "The Identification System, I believe, has its good and bad points. First of all, though, I would like to know if anyone has any definite knowledge on what the identification system is, how it would affect each student, and how it would benefit the school. Because of the high loss, particularly of freshman students at our school, perhaps it would be best to require an I.D. card only at the beginning of second semester. The cost of starting the I.D. system should not be too much more, so that each student would not suffer a great loss. If it could be arranged for each student to have his or her picture taken at the same studio, we might be able to get a much reduced price. I feel that full-time and part-time students should be required to have an I.D. card if the students at our school think an I.D. card is plausible."

Olev Tennola

A senior majoring in Physics. "I am against any form of I.D. cards. A student will lose his or her individuality and become part of a system (prisoners all are given their numbers along with their picture). The I.D. card will also eliminate the lending of one's activity or athletic books to a friend. At the present moment I am a number to the business and records offices and with an initiation of the I.D. cards, I'll be a

Letters to the Editor...

Is May Day Tradition Dead?

Co-chairman Asks for Support

Dear Editor:

Youngstown is a school of few traditions and seems destined to lose another. This year Bare Brunch was cancelled because of student apathy and accused vandalism last year. May Day is now following in its footsteps.

Many of the faculty and administration are convinced that this should be the last May Day, saying that the students do not care any more. As co-chairman of May Day, I have found them wrong; it is now up to the students to PROVE them wrong.

I have received complete support from the students in all that I have asked. I must now ask the entire student body for support. If students attend the pageant this afternoon, and urge their parents and friends to do the same, May Day will continue to be part of Youngstown University. Otherwise it will become part of the past.

David C. Clark

1959 May Day Co-chairman

Dear Editor,

Thanks for your excellent safety editorial in the April 24 issue of the Jambar.

"Wonderful. Keep it up."

Bucky Gillespie and I aired it over WBBW and WFMJ. I am going to send it to other locations

Charles Vimmerstedt
Manager, Safety Council of
Greater Youngstown

Coeds Can Compete

For Miss Ohio Honors

The Miss Ohio Pageant will be held in Mansfield, Ohio on August 6 and 7 at the Ohio Theatre. All Youngstown University coeds are eligible to enter this contest.

To be qualified for this contest and the scholarships being sponsored by the Pepsi-Cola Company you must contact the Junior Chamber of Commerce which has your hometown in its franchise.

The representative for the Youngstown area is Donald R. Ford, 120 East Market St., Warren, Ohio.

The Miss Ohio Pageant is being sponsored by the Mansfield Junior Chamber of Commerce.

number to everyone else concerned. At present I am carrying in my wallet; my selective service card, draft card, driver's license, Y.M.C.A. card, Young Republicans' Card, National Insurance, English Society card, Y.U.S.A., Youngstown University Students Association card, A.A.A. card, Social Security card, Blue Cross card, Mont Treblant ski club card. This totals to an even dozen and I refuse to carry one more card and make it 13, as I am superstitious."

Book Explains Work Opportunities Abroad

The United States National Student Association announces the publication of the 11th edition of "Work, Study, Travel Abroad," a comprehensive guide to student travel.

The guide is divided into three main classifications of work, study and travel. Subdivisions of the travel section deal with tour selection, a currency conversion table, passport data, clothing hints and a listing of festivals and special events in Europe in 1959.

Under the study section, the reader will find material on summer sessions at European universities and awards for study abroad.

The book discusses prospects for American students to obtain summer or permanent employment abroad and all necessary information for the student who is looking for an exciting job abroad. A listing of work camps and voluntary work projects is also given.

"Work, Study, Travel Abroad" costs \$1 and may be obtained by writing USNSA Educational Travel, Inc. 701 7 Ave., New York 36, N.Y.

Alpha Iota Meets

To Discuss Conclave

Final plans have been made for Alpha Iota's Conclave to be held at Hotel Pick-Ohio, May 15 through 17.

Fifty guests were present from the Youngstown Alumni and Alpha Eta Chapter at a meeting last Tuesday night. Luncheon was served buffet style with a yellow daffodil center piece.

One hundred and fifty delegates and members are expected to attend the three day meeting which will be climaxed on Saturday evening with the crowning of a state queen in the Pick-Ohio ballroom and the installation of the new state officers will be at a brunch to be held in the Cascade Room.

The Travelers Insurance Companies studies show that exceeding the speed limit caused 12,770 deaths and 980,000 injuries during 1958 on our highways.

Speed was blamed for more than 40 per cent of the traffic deaths and injuries in the U.S. during 1958.

Sigma Tau Sophomore Award Presented to Thomas B. Williams

Thomas B. Williams Jr. was awarded the Sigma Tau Award for 1959 at an initiation banquet at the Tod Hotel Thursday, April 23. The Sigma Tau award is given by Sigma Tau Engineering Honorary Fraternity to the outstanding sophomore who is following the engineering curriculum.

David Lathom, president, and Professor Frank D'Isa, fraternity advisor, made the presentation. The award consists of a silver metal, an engineering handbook and a walnut plaque with the recipient's name engraved on it.

Sigma Tau initiated 11 new members at the banquet. They are: Roy Setterberg, A.B. Henry, Paul Kovach, John Cigolle, Richard Lantz, James Wortman, Roland Raco, Walter Oskorip, Joseph Gontz, James Nicoli, and Sam LaLama. Dean M.J. Charognon presented keys to new members.

Wayne Ault, professional engineer from Automatic Sprinkler Co., gave the main speech. He was made an honorary alumni member. President Jones was present to welcome the new members.

Sigma Tau President D. Lathom, on the left, presents the Sigma Tau Award to Thomas Williams at a recent dinner.

Prexy Jones Predicts Big Boom in Campus Development

Dr. Howard W. Jones outlined campus development plans, including the construction of a student union and physical education plant, at the annual Alumni dinner-dance at the Mahoning Country Club recently.

President Jones emphasized the need of a student union on the Youngstown campus. "No one who is familiar with campus life will doubt the need for the student union". He also added: "With students on the campus from 8 a.m. to 10 p.m., we have no place for the informal student life that is an important part of college experience."

He continued: "We need a building with adequate food facilities including a banquet room and sandwich shop and meeting rooms and student offices that will permit the development of interest groups."

Thanks Alumni

Dr. Jones expressed his appreciation to the alumni for their support of the student union building and assured them the university will "more than match" alumni contributions.

Atty. Theodore Cubbison, president of the Alumni Association, presided. Also speaking on future plans were Dr. J.E. Smith, Dean of the College of Arts and Sciences; Olive Pope McCarty, Dean of Women; Prof. M. Jean Charignon of the Engineering School and Prof. Mae Turner of the Secondary School faculty.

Alpha Tau Gamma Holds Ninth Clinic

Alpha Tau Gamma, honorary accounting fraternity, held its ninth annual accounting clinic on April 29 at the Mural Room, with several noted speakers presiding.

Speakers for the affair were William E. Dickerson, professor of accounting at Ohio State University; James R. McCoy, chairman of the accounting department at Ohio State University; George Kasten, comptroller at General Fireproofing Company, and Thomas Anderson, assistant manager of Ernst & Ernst in Youngstown.

Topics discussed were "Tax Planning Opportunities", "Internal Profit Measurement", "Cost", and "Auditing".

Drivers under 25 years of age were involved in 27 per cent of the fatal accidents in 1958.

Statistics Show Speed Causes Most Accidents

The following statistics were recently published by the Public Information Department of the Travelers Insurance Company concerning automobile accidents and deaths for the year 1958.

Traffic accidents on U.S. highways during 1958 caused more than 2,825,000 injuries, although deaths decreased five per cent. The record number of injuries represented a 12 per cent increase during the year over the 1957 totals which is more than twice the percentage increase of a year ago.

In the year 1957 drivers under 25 were involved in 27.1 per cent of all fatal accidents and more than 20 per cent of non-fatal crashes.

The Travelers Insurance Company also reported that excessive speed was the biggest single cause of traffic accidents and was responsible for more than 2,825,000 injuries and 36,700 deaths on U.S. highways during 1958.

Cars that did not have the right-of-way were involved in 25.2 percent of the accidents causing a total of 608,400 injuries during the year.

Reckless driving was blamed for 10.4 per cent of the injuries.

Crossing at intersections was the chief cause of the 7,700 pedestrians killed and 245,800 injured.

An interesting fact is that 97.1 percent of the drivers involved in fatal accidents had more than a year of driving experience and that 87.9 percent of the drivers involved were men.

Add 5 to Dean's List

Frank So, David Yeager, Louise Maron, Rosalie Hewitt, and Sally Avery have been added to the Dean's Honor List according to an announcement from the Dean's office last week.

YU Pins Explained

The Y.U. pins are awarded on the basis of scholarship and extra-curricular activities. The student earns one point for each hour of A and 1/2 point for each hour of B and an equal number of points for campus activities. In other words, he may not have more points for activities than he has for scholastic ability. A list of the points allowed for extra-curricular activities may be obtained in Room 110 in the Main Building.

Reports Many Advertising Jobs Waiting in New York

Editor's Note: This report by E. Carl Beil strives to give the general student body an insight into the activities conducted at the recent Inside Advertising Week. E. Carl Beil, representing Youngstown University, reports:

Creativity, product, market research, salesmanship; these are only a small range of concentrated activities that went into the planning and successful efforts of the "Inside Advertising Week". Gathered were 50 of the top advertising students representing University's from Maine to California. But for the question in most minds is, what was accomplished by attending this conference? And my answer is -- that after meeting with the executives in the advertising world or better known as "Madison Avenue admen" I realize a better and deeper appreciation for the field as an art rather than a means to higher income.

In comparing courses offered at Y.U. to those of other Universities across the country, I feel that we here at Youngstown are subject to a more varied course of instruction in the Business field and especially advertising. Other schools of learning teach the basic courses plus 6 or at the most 9 hours directly relating to advertising. Here we have 21 hours pertaining directly to the field. We certainly are receiving a solid background in learning.

What are the opportunities of a

college student coming out in June? In the New York area the jobs are plentiful. The way to get them is to go after them. They will not be knocking on your door, you have to "plan ahead", and remove the element of fear which defeats so many of the masses.

Participating in the "Inside Advertising Week" included McCann-Erickson Adv. Agency, Esso Oil Co. Local Trademarks, N.B.C., Pharmaceutical Industry, Saturday Evening Post, Mead Paper Co., Wall Street Journal, Industrial Advertising Association and the Advertising Typographers Association of America. Finally a new phase was added, "mediarama" which covered panel discussions on Direct Mail, Magazine, newspapers, Outdoor and Television Advertising.

The week ended with a Graduation Banquet in the Grand Ballroom of the Hotel Biltmore where executives of the advertising industry joined in honoring these students. The main speaker of the evening was Mr. Fred Manchego, Author of "The Huckster's Revenge".

"Inside Advertising Week" was a true success.

JAMBAR Staff to Attend Ohio Newspaper Convention

Ten members of THE JAMBAR staff will attend the annual convention of the Ohio Collegiate Newspaper Association being held at the Akron University campus May 1 and 2, which will feature a student panel on various phases of newspaper publication, and a

professional panel to enlighten the college representatives.

John Hernandez, JAMBAR editor, will be on the Editorial Staff Organization panel and Jim Quilty, JAMBAR sports editor will participate on the sports panel.

Mickey Kaiser, past editor of THE JAMBAR, is president of the 1959 OCNA convention and Tom Ost of Akron University is chairman.

Participating in the professional roundtable will be Frances B. Murphey, chief, Summit County Bureau of the Akron Beacon Journal, and editor of the Talmadge Home News, representing weeklies and women in journalism; Mort Leggett, editor, Wingfoot Clar., Goodyear, representing employee publications; and Forrest Skill, director of publications, B.F. Goodrich, representing internal plant publications. Personnel from the Akron Beacon Journal will represent dailies. Murray Powers, managing editor, and Dick Shippy, sports editor, will preside.

Representatives from colleges all through Ohio will check into the Sheraton Hotel by 4:00 today. A tour of the Akron Beacon Journal is planned for the afternoon, and a professional roundtable later.

Robert E. Hoyt, Washington correspondent for Knight newspapers, will speak at the annual OCNA awards banquet Saturday, May 2, in the Hilltop room of the Akron University Student Building.

Managing Editor Ill

Dave Manley, a managing editor of THE JAMBAR, is in the North Side Hospital following an attack of blood poisoning last week. His condition is reported good. He is in Room 341.

Cinema "16" Presents "Young and the Damned"

A Spanish import, "The Young and the Damned", will be shown in the Audio-Visual Room in the Library on Wednesday, May 6, as part of the Cinema "16" cultural series.

Produced in Mexico, "The Young and the Damned" brings to the screen the raw portrayal of adolescent gangs in the outskirts of Mexico City. It is a story of "Blind, vengeful, lawless, delinquent youths who are pitted against the damaged, retentive fearfulness of the older ones."

"Indeed a credit to the movie medium ..." says the New York Herald-Tribune, "most powerful ..." -- Time; "... unmodified humanity ..." New York Post; "... frightening and flawless." -- New Yorker.

Marcel Marceau, the inimitable French pantomimist, will be introduced to many students in the added short film, "Marcel Marceau's Pantomimes", included in this fare will be "David and Goliath", "The Butterfly Chase", and "The Lion Tamer."

Commencing with "The Young and the Damned", the Cinema "16" series will be limited to a one-day showing. Therefore, it is advisable for all who wish to see the remaining roster of the films to do so each Wednesday through May 20.

Automobile-bicycle collisions during 1958 injured 59,300 persons.

Peggy Lou Dignan to Reign As Newman Club May Queen

Peggy Lou Dignan will be crowned May Queen of the Newman Club on Sunday, May 3, at the Cardinal Mooney Shrine, and will reign with her court at the Dinner-Dance that evening at Mahoning Country Club.

Newman Club Queen

The day will begin with Mass in the morning at 11:00 o'clock, in the Mooney chapel. Following the Mass the crowning will take place at the Cardinal Mooney Shrine, with an impressive ceremony planned.

In the evening there will be an informal dinner-dance at the Mahoning Country Club beginning at 6:30.

Music will be provided by Al Hreno and the Four Suns. Co-chairmen are John Kocis and Dave Manley. Father Petric and Dean Gillespie will chaperone.

Any student of the university and his friends are invited to celebrate in this festive affair.

Cheerleading Tryouts

A note of clarification: cheerleading tryouts will be held on Thursday, May 7, instead of Friday, May 8. You must sign up before 3:00 p.m. Thursday in Dean McCarty's office in room 210 of the Main Building.

Thursday Holy Day

Catholic students are reminded that May 7 is Ascension Thursday -- a holy day of obligation for all Catholics.

Masses will be held at St. Joseph's church at 7, 8, and 5:30; and at St. Columba's at 7:30, 9, 10:30, 12, 12:30, and 4 o'clock.

Looking **M** Around...

WITH PAT McCARREN AND FRANK GUARNIERI

Hello again after a week's absence. Just think -- we were the ones who held this paper together during Lent when copy was scarce, and then we get cut out, by a fraternity brother to boot. We want to thank those who sent letters of protest to the editor because we were left out in the cold last Friday, so "Thank you very much, mom!"

We are starting a new organization on campus -- The Procrastinators' Club. A New Year's Eve party is being planned for June 30. Barb Fortunato has come up with a good motto -- "Always put off today what you should have done yesterday."

The boss of the silo has the idea of filling the office with flowers. He says that they purify the air. Well, we aren't sure about that, but there are bees buzzing all over the place, presenting a hazard to life and limb.

Did you ever sit in the lobby of the library and count how many people try to open that locked door DESPITE the sign (which has been there for at least four weeks)? The percentage of those who do try is rather high, but around here people don't believe in signs anyway.

We noticed that the fall schedules have no class rooms listed. There MUST be a logical reason for this, but we predict mass confusion the first week or so of classes in the fall, that is, in addition to the usual.

We went into the University Library the other day to look at the book on Nostradamus that the library purchased because of the recent JAMBAR story. Mr. Jones, had librarian informed us that the book was stolen the very day he bought it. Why is it that college students persist in destroying property?

Noticed the other day that three windows are broken in the new Science Building already. Was it local vandals, carelessness on the part of the construction workers, or a "stunt" by some one or more of our fellow students? We did not investigate, but we hope that it is not the latter.

Florence Zammarelli, YU Night School student and Warren elementary school marm, tells us she likes our column so well she reads it to her class each week if they behave. Talk about contributing to the delinquency of minors:

Just because some students stuff themselves in phone booths, not everyone does it. We are BRICK STUFFERS! As anyone with two fairly good eyes could see, last week the phone booth in front of the Annex was full of bricks. One of our pledges counted them and said there were 158 bricks in it.

The sons of Wm. Rayen are planning to renew one of the big social functions during the 59-60 school year after a lapse of approximately 10 years. If you're really interested, the date has been turned in to the calendar committee.

Have you noticed how much cooler the Snack Bar seems when the windows are open, and the lights are turned off? It also saves electricity, but that is incidental. Attention Mary: Get ready for a run on iced tea and lemonade -- they really hit the spot on these warm days.

From the hallowed halls of Raye School of Engineering comes the cry of the masters of the slide rules concerning the weather ... "How can it be so nice outside and be snowing inside?"

For a first hand report on conditions in Jeanette, Pa., see Lynn Newland. He was down there with the Sig Ep pledges a week ago.

Congratulations to all those who made the Dean's List. To those who did not see their names in print last week (ourselves included), remember that the Dean has TWO lists. We're thinking of a twelve page edition for next week listing those on the other list.

Anyone looking for pigeons -- they can be had for the taking at the engineering building. To paraphrase, build a better pigeon trap and the world will beat a path to your door.

What Tri Sig is responsible for the key to the Pollock House? Whoever she is, she forgot it one night, and the pledges had to have their meeting out on the lawn. We'll bet they can still see flashbulbs popping, right Miss V.?

In the library ... a library assistant who, on the night of April 16, put on a 3 act play in one violent scene adjusting venetian blinds which were afflicted with dropsy.

The weaker sex is the stronger sex because of the weakness of the stronger sex for the weaker sex.

Liberal Arts Graduates Face Complex Job Decision

Graduation is just about here and for Y.U. seniors it is time for considering the job they would like to enter.

The first thing to consider is what kind of job you want. The ideal job is the one in which your special skills will be utilized in the field of your special interests.

If you have majored in one of the technical or professional fields the choice is predetermined. But, if you're a Liberal Arts major, with no special field of interest, your choice will be a complex one.

To reach the best conclusion concerning your choice you must determine a practical compromise between your wishes, abilities and the available opportunities.

How to Find the Job

After this intensive self-analysis,

your next step is to find the job, that is most suitable for you. Flexibility on your part is essential in locating the right job.

Getting the job involves contact with someone who has use for your services -- either directly or through the use of an intermediary. Direct contact with an employer can be made most readily through "help wanted" column in the newspapers. Such jobs are usually available on the day on which they are advertised.

The intermediate approach may be

made by your college placement bureau or through the services of a commercial career consultant.

An additional source may be found with a private employment agency.

Which Job Will You Choose?

If you are in the position of choosing between two or more jobs, the selection may not be a simple one. Many factors enter into the job decision. Such things as salary, working for a large or small organization, social contacts, travel and unforeseen demands.

When applying for a job it is imperative that you look your best, dress well and approach the job with humility and willingness to learn what you can and an understanding of what you have to give.

In 1958, more than 49 per cent of the traffic injuries resulted from weekend accidents.

But soft! What taste from yonder **FILTER-BLEND** ...

IT'S WHAT'S UP FRONT THAT COUNTS

This filter, be it e'er so pure and white
Must needs give flavor too, full clear and bright
Else would the trusting smoker, filled with hope
Again be dashed, dejected be... and mope.

And thus we come to Winston's obvious truth
It's what's up front that counts -- and 'tis, forsooth
In that the fine tobaccos, in the end
Are by exclusive process -- Filter-Blend --
Become the tastiest taste that e'er hath played
Across your dancing taste-buds, man or maid!

Be ye not slow, therefore, to test the wit
Of what we say: that Winston, friend, is it;
For that with ev'ry smoke ye do delay
Ye are not gath'ring rosebuds while ye may!

"We are advertised by our loving friends..."

Penguin Sports

Track Team Notches First Campaign Win

The Youngstown University cindermen, behind another record breaking performance by Dom Chick in the shot put, notched their first victory of the campaign, topping Hiram, 71-56, last Thursday.

Chick's heave of 44 feet, 6 inches eclipsed the old standard by five inches but he shared the spotlight with a trio of double winners.

Ray Carter captured the century dash in ten seconds flat and the 120 in 22.9 seconds. Bill Coleman added triumphs in the broad and high jumps. Ed Domitrovich made it a clean sweep of the field events by topping the pole vault and the discus.

Wally Boyer booted home a winner in the high hurdles in 16.7 seconds while the Penguins 800 relay team grabbed a ninth first with a clocking of 1:35.8.

The Penguins next meet is Saturday in a quadrangular event at Slippery Rock. Other team entries are the host Slippery Rock State Teachers College, Edinboro State Teachers College and Buffalo University. Slippery Rock is rated as one of the top track teams in the tri-state area.

Crowd watches steam shovel at work, on its side this sign: "NOW OPERATING, EDDIE BRIGGS - FORMERLY SEEN IN SUCH HITS AS: 'MID-TOWN TUNNEL' - CITY BANK BUILDING - 8TH STREET BRIDGE."

Intra-Mural Softball Schedule

Mon. May 4	3:00 1	Alpha Phi Delta	vs. Kappa Sigma Kappa
	3:00 2	Bombers	vs. Pitts
	4:00 1	Sigma Phi Epsilon	vs. Sigma Tau Gamma
	4:00 2	Theta Chi	vs. Upsilon Upsilon
Tues. May 5	3:00 1	Sigma Tau Gamma	vs. Tau Kappa Epsilon

Baseball Team Grabs 15-7 Win From St. Vincent

Evening their record at 1-1, the Youngstown University baseball team journeyed to Latrobe, Pa., to face the tough St. Vincent College nine last week.

The Penguins jumped out to a quick 5-0 lead in the early innings, rallied to stave off a St. Vincent rally in the second, and they went on to win 15-9.

Starter Mike Santor was chased from the mound when St. Vincent managed seven runs in the second inning. Tom Raptis came in relief and scattered four hits over the remaining seven innings to gain the victory.

John Fusco and Steve Clapp were the big guns at the dish for the Penguins. Fusco had three hits, scored two runs, and knocked four runs across the plate. Clapp had two hits, and scored four runs. Center fielder Jerry McKinney belted a homer for the Penguins.

Beat Gannon, 17-2
In the season's opener, the Pen-

guins blasted Gannon College 17-2 in a slugfest at Evans field. The Penguins battered four Gannon hurlers for 18 hits while freshman Bob Chuey limited the visitors to seven hits. Bushman had three hits, including his first home run of the year.

Chuey, in his first mound assignment, had razor sharp control as he struck out 11 Gannon swingers without issuing a single walk.

Akron Wins, 10-6
At a battle fought in Akron, the Penguins suffered their first defeat when the Zippers came storming from behind to upset the Penguins, 10-6. Akron came up with five runs in the sixth and added two more in the eighth to ice the contest.

Freshman Lind Shields started for the Penguins, but was relieved by George Smalko after giving up eight runs. He was charged with the loss.

Simpson went into his boss's office and asked for the day off to celebrate his silver-wedding anniversary.

The boss, after thinking it over, replied, "Okay, Simpson, but I hope I'm not going to have to put up with this every twenty-five years."

Netters Win Gannon Match By 5-4 Score

The Youngstown University tennis team won its first match of the season last week against Gannon College. The final score was 5-4. The outcome of the match wasn't decided until the doubles matches. The Penguins led 4-2 after singles play. The number one and two doubles teams lost in close matches. The number three doubles combination, won its match handily, 6-0, 6-3, thus making the final score 5-4, in favor of Youngstown.

Lost First In 15 Games
Steve Szabo lost his first tennis match in his college career. He was unbeaten in 15 matches last year and won the first one this year. Cas. Szymanowski, beat him, 6-4, 6-3.

Other Penguins winners were Ralph Lane, Paul McBride, George Graban, and Don Kornspan, all in singles play.

Loss to Akron, Hiram
In the first match of the season the netters lost to Akron, 6-3, away from home. The only points scored for Youngstown were by Ralph Lane and Steve Szabo in singles play and this pair turned up to win their doubles match.

Hiram College defeated Youngstown last Saturday at Volney Rodgers, 6-1. The match was interrupted by rain in the last two doubles matches. The much improved Hiram won every singles match but one. Steve Szabo managed to outlast Jeff Kahan 9-7, 6-3; to win for the Red and White.

Play Against Fenn
The netters play tomorrow against Penn University of Cleveland at Volney Rodgers at 2 P.M.

Cars that did not have the right of way injured 608,400 and killed 3,890 persons on U.S. Highways in 1958.

Sport Shorts...

Football: Coach Dike Beede reports great progress by Larry Markasky at the quarterback spot. Harold Green, last years number one signal caller, has an indefinite school status and Markasky is set to step into the top spot. Tom Majowsky has ousted his competition at the center position to gain the starting berth. Ed Howley has been switched from guard to tackle. Pete Arlow, Jim Sevenich, and Dick Lewis are battling for the two guard slots.

Baseball: Ace outfielder and hard hitting Tom Razum, injured on a second base slide against Akron, missed the St. Vincent's game. Razum rapped out five hits in his first seven trips to the plate prior to the injury. Charley Bushman demonstrated his power against Gannon with three hits, two for extra bases, Jim Brahney walked thrice and blasted a bases loaded triple in the same contest. Bob Chuey exhibited amazing control in striking out 11 without issuing a base on balls in going the distance.

Golf: Dick Schwartz, member of the YU golf squad competed in the North-South Amateur but failed to qualify. Dick had quite a vacation, though. In the Kent golf match, snow fell here and there to make the going even more difficult for the local golfers.

Track: Dom Chick is making a habit of establishing records against Hiram. It was in the YU-Hiram meet of last year that Chick first broke the school record. He repeated the performance again last week.

Penguin Linksters Lose Season Opener

Despite Tom Barto's low gross 76 over a rain soaked Kent State golf course, the Flashes ripped the Penguins Linksters 18-6 in their first outing of the campaign.

Ed Antonelli followed Barto with a 78. Other scores for the Youngstown contingent were: Mike Mijic, 81; Fred Quinn and Mike Antonelli, 82's; and "Jabby" Barber, 84.

Do You Think for Yourself? (THESE QUESTIONS CAN TELL YOU A LOT ABOUT YOURSELF!*)

- When you feel that certain fads are foolish do you talk against them? YES NO
- Do gadgets such as new cigarette lighters often intrigue you so you want to take them apart? YES NO
- Do you think that political candidates should write their own speeches instead of using a "ghost writer"? YES NO
- Given the choice, would you prefer having an apartment of your own to living at home with your parents? YES NO
- Do you prefer a salesman who is anxious to make a quick sale to one who will patiently answer all your questions about the product? YES NO
- When arriving late for a party, are you inclined to join a group of close friends rather than attempting to strike up new acquaintances? YES NO
- If you met somebody with a beard, would you tend to consider him "off-beat" and treat him with reserve? YES NO
- Are you normally reluctant to go on a "blind date"? YES NO
- Do you base your choice of a cigarette on what people tell you rather than doing your own thinking? YES NO

You'll notice that men and women who think for themselves usually smoke VICEROY. Their reason? They've made a thinking choice. They know what they want in a filter cigarette. They know that VICEROY gives it to them! A thinking man's filter and a smoking man's taste!

*If you have answered "YES" to three out of the first four questions and "NO" to four out of the last five... you really think for yourself!

Familiar pack or crush-proof box.

The Man Who Thinks for Himself Knows — ONLY VICEROY HAS A THINKING MAN'S FILTER... A SMOKING MAN'S TASTE!

Engagement Ring That Shows Your Personality

Engagement rings are one of our oldest, most treasured means of proclaiming romance. A diamond says "engaged" just as plainly as a wedding ring says "married"; the diamond is a pledge of devotion just as the wedding band is a bond of wifehood.

Since diamonds are the hardest substance known to nature, they are practical, contrary to all the arguments about the expense of them. A girl may wear her diamond every day for sixty years, as many of them do, and then pass it down the family, as good as new.

There are several things to check for when buying your diamond — the first is clarity. They are graded according to the number, kind, and location of tiny imperfections. It may be classified as "flawless" if no inclusions are shown when magnified ten times.

Color is the next thing to check. The famous Hope diamond is as blue as a sapphire. But the standard for the engagement ring is a clear, frosty sparkling white — the white of the drops in a waterfall. The purest white is the rarest, of course, and is the most expensive.

Examine Cut

Finally, the cut of the diamond should be checked carefully. Fine cutting is needed to reveal the full beauty of a diamond. Each tiny facet must be symmetrically polished into the world's hardest natural substance, and at an angle that may not vary by more than half a degree.

The price of a diamond doesn't seem so unreasonable when one considers that to find a rough stone that can be polished into a one-carat gem, they have to blast, dig, crush, wash, and sort over 250 TONS of ore! Also, the old mines in India are practically exhausted and so are the important diamond areas of South Africa.

There are several different cuts of diamonds which go in and out of style periodically. The brilliant is probably the most common — it is a round shape, used as center stone and often as side stones on the betrothal ring.

The emerald cut is very fashionable right now ... it is oblong or square with straight sides. The Marquise is a pointed boat shape. Others which are shaped like their names are pear, heart, and oval.

As for settings, white gold seems to be the most popular these days, for several reasons. It is the same price as yellow gold, and it enhances greatly the white lights of the diamond. In fact, even in yellow gold settings, white gold is usually placed around the stone. Yellow gold is sentimental because our grandmothers wore it; in the last century, they had little else to use. Platinum

Motor vehicle accidents killed 36,700 and injured 2,825,000 on U.S. highways during 1958.

Suggestions for Summer Enjoyment On The Beach

By Frank Court

The time is drawing very near when we shall throw away our winter worries and head for the beaches to frolic carelessly in the warm sunshine.

But we must admit, all that concerns warm weather and bathing is not joy. There are certain factors which must be considered now, if we plan to make a success of our beach ventures later. Such factors constitute a definite plan, which when executed, will insure complete and undisturbed happiness in the sand.

One of the biggest problems that will face us is crowds. We all remember at least one instance when the beaches were so crowded we could not find room to place our snorkel tube or even build a sand castle. To avoid such a situation it is recommended that we smear ourselves with Limburger cheese. We shall then have no trouble finding room. As a matter of fact, we should have the whole beach to ourselves.

Want a Tan?

Another problem, certain to arise in the near future, is that of the tan. We all try desperately to attain that golden bronze look. Some people remain for days in the sun gaining an envied tan. Other people try, but all they do is burn and blister. For these poor individuals we have some good news. You too, can attain a beautiful tan. Simply place yourself in an oven and turn the temperature up to 400 degrees. If you baste yourself regularly you should have no trouble obtaining that golden brown fried look.

If this doesn't work, then invest a few pesos and buy yourself a bottle of the most precious of all, and the strongest.

You should pick the ring style that does the most for your hand. A small stone in a simple, tailored setting would be very suitable on a dainty girl. A marquise cut, because of its slender lines and points, is charming for a graceful hand. An emerald cut of oblong shape is more slimming to the fingers than a square one. Finally, most cuts and shapes may be had with little polished rims around the gem, giving an illusion of greater size.

If you keep some of these facts in mind, you should pick a diamond which will satisfy you for the rest of your life.

of the new discovery called Instant Tan. The sensational new thinking man's spray that literally sprays on a tan. Instant Tan contains the miracle wonder drug H2SO4. (For the benefit of the Engineering majors, this is otherwise known as sulfuric acid.) We guarantee that by using this new product your tanless skin worries will be over completely. Mainly because you won't have any more skin to worry about.

One last bit of advice; if while sunbathing in the sand you begin to experience an itchy, crawling feeling, don't blame it on the sun or the stagnant water. The truth is that you probably have been lying on top of an ant hill. This will no doubt cause an alarm, but if you keep perfectly still you won't frighten the busy little fellows. As a matter of fact, if you are a Biology major this will afford a wonderful chance to join in their daily habits. You might even try to get an interview with their leader.

JAZZ . . .

. . . My Beat

Lynn C. Newland

Although it is difficult to set the styles of jazz into convenient well-defined eras, it is still done with considerable success.

The Swing Era

The era of Swing is said to have begun in 1935 and was brought to a close in 1945. It is still played and appreciated by a small core of Swing enthusiasts.

Swing was quite popular and sold from coast to coast. This music was followed closely by the teenage set who utilized the music's beat for the popular dance steps of the day: the Lindy and the Jitterbug.

The music played by the bands of this jazz era was called either "hot" or "sweet". The music of Guy

ADVENTURES IN SOCIAL SCIENCE: NO. 3

Today, ranging again into the fascinating world of social science, let us take up the subject of anthropology—the study of man and his origins.

The origin of man was indeed a puzzle until the Frenchman, Jean-Louis Sigafoos, discovered the skull and shinbone of Pithecanthropus Erectus in Java in 1891. What Sigafoos was doing in Java is, incidentally, quite an odd little story. Sigafoos was a Parisian born and bred. By day one could always find him at a sidewalk cafe, sipping barley water and ogling the girls; each night he went to a fashionable casino where he gambled heavily at roulette and go-fish; in between times he worked on his stamp collection, which was one of the largest in Paris.

Well sir, one summer Sigafoos lost his entire fortune gambling at the casino. He was seriously contemplating suicide when, quite unexpectedly, a letter arrived from one Lotus Petal McGinnis, a Javanese girl and an avid stamp collector, with whom Sigafoos had been corresponding from time to time through the international stamp collectors journal. Until now the nature of their correspondence, though friendly, had been strictly philatelic, but in this new letter Lotus Petal declared that although she had never laid eyes on Sigafoos, she loved him and wanted to marry him. She said she was eighteen years old, beautiful and docile, and her father, the richest man in the tribe, had agreed to give half his fortune to the husband of her choice. Sigafoos, penniless and desperate, immediately booked passage for Java.

The first sight of his prospective bride failed to delight Sigafoos. She was, as she said, beautiful—but only by local standards. Sigafoos had serious doubts that her pointed scarlet teeth and the chicken bones hanging from her ears would be considered chic along the Champs Elysees.

But sobering as was the sight of Lotus Petal, Sigafoos had an even greater disappointment coming when he met her father. The old gentleman was, as Lotus Petal claimed, the richest man in the tribe, but, unfortunately, the medium of exchange in his tribe was prune pits.

Sigafoos took one look at the mound of prune pits which was his dowry, gnashed his teeth, and stomped off into the jungle, swearing vilely and kicking at whatever lay in his path. Stomping thus, swearing thus, kicking thus, Sigafoos kicked over a heap of old bones which—what do you know!—turned out to be Pithecanthropus Erectus!

But I digress. From the brutish Pithecanthropus, man evolved slowly upward in intellect. By the Middle Paleolithic period man had invented the leash, which was a remarkable technical achievement, but frankly not particularly useful until the Mesolithic period when man invented the dog.

In the Neolithic period came the most important discovery in the history of man—the discovery of agriculture. Why is this so important? Because, good friends, without agriculture there would be no tobacco, and without tobacco there would be no Marlboro, and without Marlboro you would be without the finest filter cigarette that money can buy, and I would be without a job.

That's why.

© 1959 Max Shulman

Without tobacco you would also be without Marlboro's sister cigarette, Philip Morris, a non-filter smoke that can't be beat. Philip Morris or Marlboro—pick your pleasure.

Lombardo was termed "sweet", and that of Benny Goodman "hot". This music was never called "hot jazz"; the name being considered immoral by broadcasting companies. Therefore it was given the name "swing music".

The music that evolved from Dixieland was different from its predecessor in many respects.

This new jazz was smoother, fuller and easier to appreciate than Dixieland.

Swing bands grew in prominence and became commercialized during this period. Improvisation was not found in this music and true jazz musicians would not play with the

big swing bands; they called them "Mickey Mouse" bands.

Benny Goodman is considered to be the King of Swing, but only because he was more widely known. The true mainstay of jazz during this period was Count Basie and his music. He is responsible for keeping the elements of true jazz alive.

The Swing Era enjoyed great popularity for ten years, but was brought to a close by the sale of records and a tax on dance floors. Also, the booming voice needed to sing in the bands that played in large dance halls was put out of vogue with the advent of the microphone, thus stifling an important aspect of Swing music.
