

## Four New Buildings Secured for College

Four buildings have been secured for the college from Camp Perry through the Federal Works agency, it was announced recently by Dr. Howard W. Jones. The structures will make possible the planned increase of 300 students at mid-year.

Under the agency plan the government will move the buildings from the camp, erect them, and insofar as possible, provide equipment. The two-story structures are lap-sided rather than tar-papered as were many wartime constructions. Dr. Jones states that the buildings will be erected behind the parking lot near the business school. Two will provide classrooms while the remaining buildings will house library, faculty and administrative offices.
