will attend all and all other committee members are invited in
addition to those designated.

3. The consensus of the committee was to ask that the Senate be
asked to postpone to the December meeting of the Senate--con-
sideration of the Proposal since school/college hearings could
not be completed until November.
4. Meetings are to seek input and give information. Committee members,
especially those new to the committee, should review the proposal
and the introductory remarks made to the June Senate meeting.
The committee will discuss the background of the proposal so
that all are informed and can answer questions at the hearings.
